Power BI Data Analyst with 2.8+ years of experience in the IT industry. Effective and forward-thinking Data Reporting and Data Management Specialist bringing forth valuable industry experience and skills to achieve data driven results.

Summary

- Experienced Data Analyst with 2.8+ years in the IT industry, specializing in Data Cleansing, Manipulation, Visualization, Automation, Development and Deployment of Dashboards using Power BI Desktop.
- Power BI Expertise in creating automated and interactive dashboards to monitor application incidents, reducing manual tracking processes, and resulting in a 30% improvement in incident recognition and response time.
- Data Management Proficiency in cleaning and transforming datasets from various sources such as SharePoint, Dataflows, SQL Server using Power BI tools such as Power Query, DAX (Data Analysis Expressions), Data Modelling, Data Refreshing, Row Level Security (RLS) and ServiceNow tool.
- Proficient in creating different visualizations using Bars, Pie charts, Maps, Scatter Charts, Table, Matrix, KPI, Gauge, Doughnut Chart, Cards, etc.
- Extensive knowledge in various reporting objects like Filters, Conditional Formatting, Power Automate and Formatting the reports.
- Proficient in NumPy and Pandas for advanced data manipulation, transformation, and analysis.
- Ability to handle multiple tasks and meet deadlines. Capability to work independently or as a part of a team and communicate with key stakeholders to help meet business challenges.

Experience

MARCH 2022 - PRESENT

Data Analyst | Tata Consultancy Services [TCS] | Bangalore, Karnataka

- **Incident Data Reporting:** Created and managed over 25 comprehensive Power BI reports to analyze incident data for Westpac Bank applications, leveraging data from ServiceNow.
- **Data Integration:** Extracted and imported data from multiple sources, such as SharePoint, Dataflows, SQL Server, Oracle, ServiceNow into Power BI, ensuring 99.9% accuracy and up-to-date incident management reporting.
- **SQL Server Data Ingestion:** Managed data integration from multiple sources into SQL Server, ensuring efficient data import processes to maintain data accuracy and performing necessary transformations to meet reporting requirements.
- **SQL Server Transformation:** Executed complex SQL queries and procedures to transform raw data into meaningful insights before connecting to Power BI for visualization.
- **Data Transformation:** Cleaned and transformed data by handling duplicate and blank values, creating and managing relationships, etc.
- **Trend Analysis:** Conducted detailed trend analysis of incident data to identify recurring issues and potential areas for improvement, enhancing overall service quality.
- **Performance Optimization:** Optimized Power BI reports, reducing load times by 40% and enhancing user experience.

- **Business Requirement Analysis:** Involved in reviewing business requirements and analyzing data sources and databases for the design and development of reports and analysis.
- **Process Automation:** Automated manual tracking processes by implementing Power Automate workflows, reducing manual effort by 30% and increasing data accuracy.
- **Data Relationships:** Experienced in creating relationships between multiple data sources, publishing, and manual refreshing the reports.
- **DAX Functions:** Created automated summary cards using DAX functions, providing real-time metrics and key performance indicators (KPIs) for management.
- **DAX Calculations:** Utilized DAX to create 100+ calculated measures, columns, and custom calculations for detailed data analysis.
- **Data Refresh Schedules:** Ensured timely data refresh schedules, reducing data latency by 40% and ensuring up-to-date information availability.
- **Data Accuracy:** Collaborated with cross-functional teams to ensure data accuracy and consistency, resulting in a 15% reduction in data discrepancies.
- **User Training:** Trained end-users on Power BI report usage to increase report adoption and engaged in continuous improvement initiatives.

Skills

- **Advanced Excel:** Pivot Tables, Charts, Lookups, Power Query and Power Pivot
- **Power BI:** Power Query, Data Modelling, DAX, Bookmarks, Filters, Row Level Security [RLS], Publishing, Scheduled Refresh, Power Apps, Power Automate and Custom Visuals
- **SQL:** DDL, DML, Querying Data, Joins, Filtering & Sorting, Aggregation Functions, Sub queries, Views, Indexes, Stored Procedures, Functions, Triggers, Normalization and Window Functions.
- **AWS services:** EC2, S3, CloudWatch, IAM, Amazon RDS.
- **Python:** NumPy, Pandas, Seaborn, Matplotlib, Data Integration, EDA
- **Soft Skills:** Analytical, Problem Solving, Multitasking, Communication, Time Management

Education

B S Abdur Rahman Crescent Institute of Science and Technology | B Tech | Chennai, Tamil Nadu

Computer Science and Engineering - 7.8 CGPA [June 2021]

Personal Details

- Date of Birth: 19th Jan 2000
- Languages: English, Telugu, and Tamil
- Address: Gachibowli, Hyderabad, Telangana
