PROFESSIONAL SUMMARY:

- A results-driven ForgeRock professional with 6 years of experience in designing and implementing secure identity and access management solutions.
- Proficient in ForgeRock **OpenAM**, **OpenDJ**, Access Gateway, and Identity, **JavaScript** Management. Skilled in SSO, Federation, SAML 2.0, OAuth 2.0, and OIDC protocols.
- Experienced in troubleshooting, system performance enhancement, and providing expert support.
- Recognized for delivering innovative solutions and improving efficiency and security in ForgeRock environments.
- Adept at training sessions, documentation, and staying updated with the latest ForgeRock releases and industry trends.
- A collaborative team player committed to achieving project goals and client satisfaction.
- My experience extends to installing and configuring Webagent installations, and registering the Webagent and I am well Good at **Java Script**.
- ForgeRock **OpenAM**, and configuring Password management, Single Sign, Access certification, Provisioning, and governance in Identity Now.
- Utilized ForgeRock Monitoring tools and **JMX** for effective monitoring and performance optimization of ForgeRock solutions.
- Successfully integrated ForgeRock solutions with various third-party applications, ensuring seamless interoperability.

- Actively engaged in staying updated with the latest ForgeRock releases, security best practices, and industry trend.
- Experienced in integrating ForgeRock systems in customers' on-premises infrastructures, successfully meeting security, scalability, and integration needs.
- Recognized for delivering thought leadership in the IAM field, including remaining current on new technologies and best practices to foster continuous development.
- Actively interested in keeping up with the newest ForgeRock releases, following security best practices, and tracking industry trends.
- Collaborated extensively with security and compliance departments to ensure adherence to industry standards and laws.
- Worked closely with ForgeRock and other technology vendors to resolve complex issues and customize solutions.
- Containerization and Orchestration: Utilized Docker and Kubernetes to deploy ForgeRock components in containerized environments for efficient resource utilization and scalability.
- Designed and implemented cross-domain identity federation using ForgeRock Identity Gateway to enhance interoperability.
- Applied zero-trust principles to ForgeRock configurations in cloud environments, improving overall security posture.
- Integrated ForgeRock with SIEM solutions to enhance threat detection and enable proactive security measures.
- Optimized ForgeRock environments for high availability and load balancing, achieving superior performance under high transaction volumes.

TECHNICAL SKILLS:

IAM Servers and Products	ForgeRock stack(OpenIDM, OpenAM and OpenDJ), Sailpoint(Identity Now), Keycloak, Okta, Auth0, LDAP
Integration Tools	Identity Gateways, Identity Management Connectors, Identity Gateway Connectors, Identity Management Scripting
Reporting Tools	BIRT Reports, JasperReports, Tableau, Microsoft PowerBI
Application Servers	Apache Tomcat, Web Sphere 7.x 8.x and Web logic
Database Server	Oracle DB2, SQL Server, MySQL, PostgreSQL, MongoDB
Web technologies	JSP, JavaScript, Bootstrap, AJAX, XML, XHTML, CSS, AngularJS, React.js, Node.js, HTML, SQL
Programming Languages	Java 1.8/11, Core Java, SQL, Groovy, PL/SQL, Python, HTML, CSS
Cloud Services	Azure, AWS, EC2, S3, RDS, Cloud Watch, ELK, Kubernetes, PCF
Version Control	GIT, CVS, SVN, Clear case

Methodologies	Agile, Scrum, Waterfall, TDD
Operating System	Windows, Mac, Linux, UNIX
Spring Frameworks	Spring IOC, Spring Batch, Spring Boot, Spring Security, Spring Cloud
Modeling Tools	Microsoft Visio, Rational Rose

PROFESSIONAL EXPERIENCE:

Client Name: Donato Technologies (Location: 12100 Ford Rd, Suite 306, Dallas, TX 75234)

Role: ForgeRock Developer

January 2023 – Present

- Led the design and deployment of ForgeRock solutions for multiple clients, ensuring integration with existing infrastructure and alignment with security requirements.
- Configured ForgeRock components to support Single Sign-On (SSO), Federation, and various authentication protocols, enhancing user experience and security.
- Conducted in-depth assessments of client IAM needs, developing customized solutions to address specific organizational challenges.
- Coordinated with security and compliance teams to ensure all IAM implementations met industry standards and regulatory requirements.

- Provided technical leadership and mentoring to junior team members, fostering a culture of continuous learning and improvement.
- Managed project timelines and deliverables, ensuring successful completion of IAM projects within scope and budget.
- Engaged with clients to gather requirements, provide updates, and address concerns, ensuring high levels of satisfaction and successful project outcomes.
- Designed and implemented Role-Based Access Control (RBAC) mechanisms within SailPoint, ensuring precise access management aligned with organizational objectives.
- Demonstrated ability to integrate IAM solutions with cloud platforms like AWS, Azure, and Google Cloud, ensuring consistent access control across hybrid environments.
- Collaborated with stakeholders to develop RBAC policies that align with organizational security and regulatory mandates, ensuring robust access governance.

Client Name: Targa Resources

Location: [1000 Louisiana Street, Suite 4300, Houston, Texas, 77002]

Role: IAM Intern (July 2022 – Dec 2022)

- Assisted in the development and implementation of Identity and Access Management (IAM) policies and procedures to enhance security and user accessibility.
- Supported the configuration and integration of IAM tools, including user provisioning, deprovisioning, and access governance processes.
- Conducted data analysis and generated reports to monitor and improve system performance and security compliance.

- Collaborated with cross-functional teams to ensure seamless integration of IAM solutions with existing infrastructure.
- Gained hands-on experience with ForgeRock components and related IAM technologies, contributing to live projects under expert guidance.
- Assisted in troubleshooting IAM-related issues and provided technical support for end-users.
- Documented system processes, configurations, and updates to maintain comprehensive records for future reference.
- Participated in security audits and assessments, identifying areas for improvement and recommending actionable solutions.
- Conducted research on industry best practices and emerging IAM technologies to assist the team in staying ahead of security trends.
- Developed and presented a project report summarizing internship contributions and key learning outcomes to senior management.

Client Name: Innominds (Location: Serilingampalli, Kondapur, Telangana 500084, India)

Role: IAM Support Engineer

Aug 2017-June 2021

- Regularly perform system maintenance tasks such as updates, patches, and configurations to uphold optimal performance and bolster security measures.
- Promptly address user inquiries, troubleshoot issues, and deliver timely resolutions, ensuring a seamless IAM user experience.

- Utilize proficient problem-solving abilities to investigate and resolve access related concerns, password challenges, and authentication issues.
- Assist in the implementation and upkeep of access governance strategies, ensuring adherence to security protocols and regulatory standards.
- Collaborate with diverse teams to enforce Role-Based Access Control (RBAC) and streamline access management processes across the organization.
- Play a pivotal role in incident response, swiftly addressing security breaches and implementing corrective measures to mitigate risks effectively.
- Maintain comprehensive incident documentation and actively contribute to postincident reviews to bolster system resilience and improve response strategies.
- Conduct user training sessions to enhance understanding of IAM tools, functionalities, and best practices, empowering users to utilize the system effectively.
- Develop and maintain documentation, including user guides and troubleshooting manuals, to facilitate self-help options and streamline support processes.
- Contributed to the documentation of IAM processes, setups, and troubleshooting procedures, as well as changes about the transfer from SailPoint to ForgeRock Identity Cloud.
- Participated in user training sessions on IAM best practices, security protocols, and technologies to raise general understanding and adherence
