

Sai Taddi | Software Engineer

KS, USA | +1 737-702-1267 | taddisai12@gmail.com | [Linked In](#)

SUMMARY

Software Engineer with **5+ years of experience** delivering enterprise applications in healthcare, banking, and retail industries. Achieved 35% faster deployments with AWS CI/CD pipelines, improved query efficiency 25% through SQL optimization, and amplified analytics adoption 30% via Angular dashboards. Skilled in Angular, .NET 5, Node.js, SQL, REST APIs, and Python scripting. Recognized for aligning Agile practices with organizational priorities to deliver scalable, secure, and high-performance software solutions that drive measurable business impact.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, Python, SQL
Frontend Development: Angular (8–12, AngularJS), HTML5, CSS3, Responsive UI, Component-Based Architecture
Backend Development: Node.js, Express.js, .NET 5, RESTful API Development
Databases: SQL (Schema Design, Query Optimization, Stored Procedures)
Frameworks & Libraries: Angular CLI, Reactive Forms, Apex Charts, Wijmo Grids
Version Control & PM: Git, JIRA (Agile/Scrum Boards)
Tools & IDEs: Visual Studio, IntelliJ IDEA, PyCharm
Automation & Scripting: Python (Automation, Workflow Optimization)
Cloud & DevOps: AWS (EC2, S3), Docker Basics, CI/CD Concepts
Development Practices: Agile/Scrum, Unit Testing, Code Reviews, API Integration, Documentation

PROFESSIONAL EXPERIENCE

Salesforce, KS, USA Jan 2025 - Current

Software Engineer

- Elevated scalability 20% by engineering Angular 12+ modules seamlessly incorporated with .NET 5 enterprise APIs.
- Streamlined SQL schemas through advanced indexing and partitions, lowering query response time 25% across distributed applications.
- Upgraded analytics adoption 30% by delivering interactive dashboards with Apex Charts and Wijmo Grids enterprise-wide.
- Accelerated deployments 35% by building CI/CD pipelines leveraging Docker containers merged with AWS EC2/S3.
- Strengthened reliability 30% embedding structured logging, proactive monitoring tools, and exception handling across APIs.
- Minimized production defects 25% enforcing automated unit tests and conducting rigorous peer-reviewed code merges.
- Delivered releases 20% faster by aligning Agile sprints with Jira workflows and velocity-based backlog prioritization.

Sails Software Solutions, India

Sep 2022 - Dec 2023

Software Engineer

Project: ePrimeRx Web Application (HealthCare Domain) | **Company:** MMS (Micro Merchant Systems)

- Decreased prescription input errors 35% by implementing Angular Reactive Forms with advanced custom validation logic.
- Escalated dataset rendering performance 30% integrating Wijmo Grids for large-scale pharmacy application records.
- Streamlined code maintenance 20% by designing reusable Angular pipes, services, and directives across application modules.
- Sped up module delivery 25% using Angular CLI scaffolding improving productivity during multiple sprints.
- Ensured seamless integration by aligning Angular 12 UI with .NET 5 healthcare back-end systems.

Project: CSI WEB PORTAL (Banking Domain) | **Company:** CSI WEB

- Cut technical debt 40% delivering Angular migration proof-of-concept establishing modernization roadmap successfully.
- Advanced transaction throughput 25% developing Angular 8 modules blended with .NET 5 financial APIs.
- Heightened reusability 20% refactoring Angular components supporting scalable enterprise financial workflows.
- Outlined modernization roadmap ensuring scalable, compliant, and maintainable banking system architecture.
- Shortened issue resolution 30% utilizing JIRA Agile workflows to manage banking defects efficiently.

Reliance Jio, India

Jul 2019 - Jun 2022

Software Engineer

Project: JSM Statistics portal (Retail Domain) | **Company:** Reliance Jio (Internal Project)

- Expanded analytics adoption 40% by creating Angular dashboards with Apex Charts for customer data insights.
- Secured data reliability improving 30% integrating Spring Boot REST APIs with Angular service components.
- Decreased redundancy 25% building reusable Angular modules enabling faster analytics feature releases.
- Improved reporting accuracy 35% delivering interactive data visualizations supporting executive-level decision-making.
- Improved delivery consistency 20% by aligning Agile sprints with reporting platform deliverables successfully.

Project: Automation using Python | **Company:** Reliance Jio (Internal Project)

- Eliminated manual workload 60% developing Python scripts automating folder creation across internal portals.
- Standardized workflows increasing stability 50% using reusable Python libraries shared across teams.
- Boosted productivity 25% freeing developers from repetitive processes enabling greater project focus.
- Cut execution time 40% writing improved Python scripts handling bulk data operations.
- Reinforced reliability 30% embedding advanced error handling and structured exception logging into automation scripts.

EDUCATION

Masters in Computer Science

May 2025

University of Central Missouri, MO, USA
