
PROFESSIONAL SUMMARY

Results-driven **Java Full Stack Engineer** and **Software Developer** with over 5 years of experience designing, developing, and deploying enterprise-grade, **cloud-native applications** across finance, healthcare, retail, and consulting sectors. Expert in **Spring Boot**, **microservices architecture**, and **API development**, delivering high-availability, scalable systems that boost performance by double-digit percentages. Adept in **frontend frameworks** (React.js, Angular) and **backend optimization** (SQL, NoSQL, performance tuning), with deep expertise in **AWS** and **Azure** deployments. Proven ability to lead **Agile/Scrum** teams, integrate **DevOps pipelines**, and implement **TDD/BDD** for improved software quality and delivery speed.

CORE COMPETENCIES

Java Development, Full Stack Engineering, Microservices Architecture, RESTful & SOAP API Development, React.js & Angular Development, Cloud Solutions (AWS/Azure), Serverless Architecture, CI/CD Automation, SQL & NoSQL Database Optimization, Test-Driven Development (TDD/BDD), Agile/Scrum, DevOps Practices, Performance Optimization, Cross-Functional Collaboration

TECHNICAL SKILLS

Programming: Java, JavaScript, TypeScript, SQL, HTML, CSS

Frameworks: Spring Boot, Spring MVC, Hibernate, React.js, Angular, Bootstrap

Databases: SQL Server, MySQL, MongoDB

Cloud & DevOps: AWS (EC2, S3, EKS, Lambda), Azure Blob Storage, Azure Functions, Azure DevOps

Tools & Platforms: Docker, Kubernetes, Jenkins, GitHub Actions, Maven, Gradle, Terraform, Git, Bitbucket

Testing Tools: JUnit, Selenium, Mockito, Postman, Cucumber, TestNG

Messaging/Streaming: Kafka, RabbitMQ

Methodologies: Agile, Scrum, Kanban, TDD, BDD, SDLC

PROFESSIONAL EXPERIENCE

McKinsey & Company

Java Full Stack Developer / Software Engineer |

06/2024 – Present

Project Overview: Led modernization of enterprise systems including a client onboarding portal, KPI dashboard, and procurement analytics platform using **Spring Boot**, **Angular**, and **microservices architecture** to deliver scalable, cloud-ready solutions.

- Engineered **microservices-based architecture** with Spring Boot, Docker, and Kubernetes, reducing downtime by **35%** for mission-critical tools.
- Orchestrated migration from monolith to **Angular 14** + REST APIs, cutting load time by **60%** and enhancing UI/UX.
- Automated CI/CD pipelines via Jenkins and GitHub Actions, improving release cycles by **50%** and deployment success rates.
- Optimized SQL Server & MongoDB queries, increasing retrieval speed by **40%** for global financial reporting tools.
- Developed cross-platform expense management app with Azure Blob Storage & Kafka, reducing processing errors by **20%**.
- Implemented TDD using JUnit, Selenium, and Mockito, boosting code coverage to **92%** and reducing UAT bug leakage by **70%**.

Tools & Technologies: Java, Spring Boot, Angular 14, Docker, Kubernetes, Jenkins, GitHub Actions, Azure Blob Storage, Kafka, SQL Server, MongoDB, Agile/Scrum, TDD

Virtusa Consulting Services Pvt Ltd –India

Java Full Stack Developer / Backend & Frontend Engineer |

05/2020 – 06/2023

Project Overview: Delivered full-stack solutions in healthcare, telecom, retail, banking, and logistics using **Java**, **React.js**, and **Spring MVC**, driving efficiency, uptime, and automation gains.

- Built **responsive UIs** in React.js + Bootstrap, improving user satisfaction scores by **25%** in six months.
- Refactored backend services in Spring MVC/Hibernate, cutting memory usage by **30%** and improving throughput.
- Deployed AWS EC2 + Kubernetes-managed Docker containers for retail inventory, improving uptime from **97.2% to 99.9%**.
- Integrated Stripe and Twilio APIs for invoicing/notifications, increasing automation coverage by **60%**.
- Consolidated data sources via Kafka/MySQL for unified analytics dashboard, improving reporting accuracy by **38%**.
- Automated testing with Postman & Mockito, reducing manual test hours by **50%** and boosting sprint velocity by **20%**.

Tools & Technologies: Java, Spring MVC, Hibernate, React.js, Bootstrap, AWS EC2, Docker, Kubernetes, Stripe API, Twilio API, Kafka, MySQL, Postman, Mockito, Agile/Scrum

PROJECTS

- **Intelligent Service Ticket Routing System:** Spring Boot + Kafka backend for NLP-driven ticket classification, improving response time **45%**.
- **Predictive Maintenance Dashboard:** React.js + Azure IoT + ML model, reducing downtime **30%**.
- **AI-Powered Resume Parser:** Angular + Python REST API for ML-based resume extraction, boosting recruiter productivity **50%**.

EDUCATION

Master's in Computer Information Systems | Rivier University, Nashua, NH | May 2025

Bachelor's in Computer Science & Engineering | Geethanjali College of Engineering & Technology, India
