

Saranya Chowdary Pathuri

☎ (470)836-2073 — ✉ saranya1410.pathuri@gmail.com —

Skills

Languages	Java, C/C++ , Python, JavaScript, TypeScript, HTML, CSS
Databases	SQL, MySQL, PostgreSQL, MongoDB
Frameworks	React, Node.js, Express.js, Angular, Spring Boot, Next.js
Cloud	AWS (EC2, RDS, S3, Lambda, SQS, SNS, ECS, CloudWatch, ELB)
Software Development	Data Structures & Algorithms, DBMS, REST API, JPA, Hibernate, Microservices
Others	Git, Postman, Docker, Kubernetes, Jenkins, CI/CD, OAuth, MaterialUI

Experience

Tidy Inn LLC

Aug 2023 – Present

System Architect & Software Developer (Co-op)

Property Management Website

- Spearheaded property and tenant management features, reducing manual administrative tasks by 60%.
- Facilitated tax calculations and reporting, improving compliance and transparency by 30%.
- Optimized API performance, reducing response time by 45% via query indexing and caching.
- Designed a real-time notification system for lease and maintenance updates, increasing tenant engagement by 50%.

Tidy Inn Motel Management Website

- Led the development of a room booking and maintenance platform, increasing check-in efficiency by 50%.
- Incorporated SMS notifications, improving guest communication and reducing missed check-ins by 20%.
- Streamlined repair and inventory tracking, decreasing by 35% in operational bottlenecks.
- Established an automated guest feedback system, increasing response rates by 40% and improving service quality.
- Real-time reporting dashboards were implemented, reducing the manual report generation time by 70%.

State Street Corporation

Jan 2022 – Dec 2022

Software Developer

- Enabled failure detection for data feed uploads, reducing issue resolution time by 40%.
- Enhanced data accuracy by implementing automated validation processes and logging mechanisms.
- Deployed database triggers, reducing the anomaly detection time by 50% and streamlining data integrity checks.
- Collaborated in 20+ Agile sprints, contributing to on-time delivery of critical features and keeping up with project goals.

Education

University of South Florida

Jan 2023 - Dec 2024

Master of Science in Computer Science

(Machine Learning, Introduction to Artificial Intelligence, Computer Vision, Social Media Mining, Computer Architecture)

VNR Vignana Jyothi Institute of Engineering & Technology

Aug 2018 - Jun 2022

Bachelor of Technology in Computer Science

(Operating Systems, Big Data Analytics, Java, Data Base Management, Linux, Software Engineering, OOP)

Projects

Job Match AI

Aug 2024 – Dec 2024

- Built an AI-powered job matching tool that processes 1,000+ job descriptions weekly.
- Designed an API architecture that allows interactions in real-time LLaMA model, reducing the response latency by 20%.
- Scraped and extracted job postings from 100+ company websites, improving data accessibility.
- Integrated AI summarization using LLaMA 3.1 in Groq Cloud, improving the readability of job descriptions by 50%.

XV6 Operating System Enhancements

Aug 2023 – Dec 2023

- Implemented basic Unix commands like `uniq`, `find`, `head`, and `tail` to extend the XV6 functionality.
- Engineered scheduling algorithms (FIFO, Round Robin, SJF) to improve CPU utilization and task management.
- Incorporated locality-aware memory allocation, optimizing memory usage for process execution.
- Improved system performance by refining file system management and improving I/O handling.

Health Inventory Management System

Jan 2020 – Jun 2020

- Developed a real-time inventory management system, reducing supply chain inefficiencies by 30%.
- Optimized data handling with JPA and Hibernate, ensuring 25% faster query performance.
- Built 10+ RESTful APIs for seamless communication between front-end and back-end.
- Introduced role-based access control (RBAC), strengthening data security and user management.
- Used Git for version control, maintaining clean code and efficient team collaboration.
