

SATEESH KOPPARAPU

Java Developer

+1 (732)-721-8002 Extn 117

Deeti@crincit.com

PROFESSIONAL SUMMARY:

- **17+ years** of extensive IT experience in all phases of the **Software Development Life Cycle (SDLC)** which includes developing, design, analysis, testing and Integration of various web-based and **client/server applications** in multi-platform environments with **JAVA/J2EE** technologies.
- Extensive experience as a Java TechLead in designing enterprise standard Java applications, including providing solutions to fix issues in existing services.
- Very good experience in managing onsite and offshore development teams by coordinating with other functional teams like QA.
- Significant expertise in modern technologies and tools such as **Java EE, Spring, Spring boot, Micro services, Hibernate, MySQL, Oracle, MongoDB, AWS, Azure and IBM Cloud**.
- Good understanding **Core Java SE** concepts like **Streams API, Time API, Functional Interfaces, Multithreading, Transaction Management, Exception Handling, Lambda functions, Generics and Collection API**.
- Good knowledge on working with **Relational database ORM frameworks** like PostgreSQL, MySQL, Oracle 11g.
- Expertise to interact with **ORM frameworks** like **Hibernate, Spring Data, iBatis and JPA**.
- Experience in developing **enterprise applications** using frameworks like **Spring, Struts, Servlets**.
- Proficient in implementation of **spring frameworks** like **Spring MVC, Spring IOC, Spring REST, Spring AOP, Spring transaction Management, Spring Data, Spring DAO, Spring Batch and Spring Boot**.
- Worked on **micro services**-based architecture using **Spring Boot** interacting through **REST API**.
- Worked with **WSDL** in implementing **SOAP services** using **Apache CXF Framework**.
- Experience in **messaging queue services** like **Jboss MQ and Apache Kafka**.
- Solid experience in **Apache Subversion (SVN)** and **Jenkins** and **Bamboo** Continuous Integration Server.
- Worked on projects implementing **RESTful services (JAX-RS, Spring Boot), SOAP (JAX-WS, Apache CXF, WSDL) and configured using Swagger**.
- Hands on experience with **design patterns** like **MVC, Singleton, Factory Pattern, Session Facade, Service locator, Front Controller and DAO pattern**.
- Authenticated Users accessing **RESTful services** using **JWT (Jason Web token)**.
- Used **AWS Amazon web services EC2** to run applications and workloads.
- Used **AWS Amazon web services** cloud formation templates and **AMI** to recreate instances
- Experience in using **Log4J**, and Version Control using **SVN, Git Hub, Clear Case and Bitbucket**.
- Experience in developing Reports using **Talend ETL and SSIS Packages**.
- Proficient in **SQL, PL/SQL** developed **Stored Procedures, Triggers, Functions and Packages** besides writing **DDL, DML and Transaction** queries with development tools like **TOAD and SQL Server**.
- Expertise in implementing Service Oriented Architecture (SOA) using Micro services, SOAP/RESTful web services and JMS.

- Worked extensively with **Waterfall, SCRUM** Methodologies.
- Excellent analytical, problem solving and interpersonal skills. Ability to learn new concepts fast. Consistent team player with excellent communication skills.
- Good understanding of Business workflow, Business logic and Business methods for further implementation of user requirement in a distributed application environment.

TECHNICAL SKILLS:

Languages	Java/J2EE
J2EE Technologies	Spring, Struts, Hibernate, Junit, Log4J, Spring Boot, REST Web Services, SOAP, Spring Boot, Micro Services, JMS, JAX-RS, JAX-WS, REST API
Web Technologies	HTML, XML, SOAP, REST, JSON
Design Patterns	Singleton, Session façade, Front Controller, MVC, DAO, MVVM
IDE's & Tools	Eclipse, IntelliJ, TOAD, Postman, SOAP-UI, Maven 2, ANT, Jenkins, Jira, Bit bucket, CICD,
Application/Web Servers	Liberty, JBoss and tomcat
Version Controls	SVN, Bitbucket, Git
Cloud Technologies	AWS (EC2, S3, IAM, Lambda), Azure (VM), IBM Cloud (Docker, IKS, OpenShift, COS, IAM)
Web Services	SOAP, Restful, UDDI, WSDL, JAX-WS, JAX-B, Micro Services
Databases	MySQL, PL/SQL, Oracle 11g

PROFESSIONAL EXPERIENCE:

Client: IBM, Bangalore.

Nov 2023 - Dec 2024

Role: Sr.Product Developer

Responsibilities:

- Facilitate the seamless development of enterprise applications by effectively managing different feature teams spread across different regions.
- Co-ordinate with high-level management to provide constant feedback on the progress of the project and bring them up to speed on any issues.
- Developed Java applications using Eclipse IDE and IntelliJ, leveraging its robust features for code editing, debugging, and version control.
- Work with stakeholders to make sure everyone is getting the required help when needed so that the deliverables are completed on time.
- Participate in system design meetings and provide input to the team on how to design the systems so that potential issues can be avoided at a future date.
- Review the final design plan before it is implemented and provide suggestions/comments.
- Experience in handling, configuration and administration of databases like **Postgres SQL**
- Implemented a solution to connect **IBM COS Bucket** using **apikey** and **InstanceId**
- Implemented a solution support **GeoJSON** API Request.

- Developed a solution to fix the involved Geometry specified in the request using libraries (**JTS**)
- Utilized **IBM Virtual machines** to deploy **Docker** containers.
- Running the Jenkins pipeline to create Docker Image and patching them in the Kubernetes environments (**IKS**).
- Designed and developed **Micro Services** business components using **Spring Boot**.
- Strong administration skills in **UNIX, Linux, and Windows**.
- Maintained **Interface** compatibility and **concurrency** in the project using **Java** new features like **Lambda** expressions, **default**, **static methods**, and **Concurrency API**.
- Experienced in APL tools like **POSTMAN** and **Swagger**.
- Used **Micro service** architecture with **Spring Boot** based services interacting through a combination of REST.
- Developed the application with various **Spring Framework** modules like **Spring IOC, Spring AOP, Spring Boot**.
- Implemented a cache framework using **Redis Cache** which optimized the time taken to provision the POD to run ML service.
- Involved in Design discussion to implement **Watsonx ML** platform in **AWS Fed Ramp** infrastructure.
- Demonstrate exposure with Continuous Integration and Continuous Deployment to **DevOps CI/CD** tool Methodologies.

Environment: Java, J2EE, Agile Methodology, Rest API, Spring boot, GIT, JUnit, Maven, Micro Services, wiki, Jenkins, Eclipse and IntelliJ, Docker, QGIS, IKS, OpenShift, DevOps (CICD).

Client: Anthem Health, IN

Company: Carelon Global Solutions

Jan 2023- Nov 2023

Role: Technical Lead

Responsibilities:

- Participated in code reviews and refactoring in Eclipse IDE and RAD to maintain clean, efficient, and maintainable Java codebases.
- Participating in the tech leads discussions and providing the solutions for technical problems raised by Scrum, AM and support teams
- Contributed to the enhancement and optimization of Java codebases in Eclipse IDE and RAD, ensuring code quality and performance.
- Actively participating the Sprint discussion and providing the directions for sprint planning. Review the Design Documents.
- Experience in developing Reports using SSIS Packages.
- Involved in **web services** design and development. Responsible for creating and consuming web services using REST and XML.
- Implemented **JavaEE** components using **Spring MVC, Spring IOC, Spring** transactions and Spring security modules.
- Implemented transaction management using **Spring AOP** and used **Spring** Aspects for implementing logging functionalities.
- Authenticating Users and providing security to **RESTful web services** using OAUTH 2.0.
- Integrated the ORM Object Relational Mapping tool **hibernate** to the **spring** using **Spring ORM** in our app and used Spring transaction API for **database-related** transactions.

- Configured JPA to use Hibernate as **ORM tool**.
- Extensively used **Spring IOC** configured Application Context files and performed database object mapping using Hibernate annotations.
- Implemented **Spring Validators**, persistence layer, and **service layer** components using Spring/Hibernate **API** and **Spring/Hibernate** annotations. Extensively used Hibernate QL.
- Created persistence layer using Hibernate for sending and retrieving data from the database.
- Developed test cases for each component in different panels using **Junit**, reported and deployed using **Jenkins**.
- Worked with Jenkins Continuous Integration and Continuous Deployment (**CI/CD**).
- Resolved the performance issue by analyzing memory dumps using the **MAT** (Memory Analyzer Tool) and implementing an optimized solution.
- Designed and developed the **framework** to consume web services hosted in Amazon EC2 instances.
- Building cloud **Micro services** and implemented back-end using Spring Boot. And Authored application using Spring Cloud services.
- Involved in using **Angular** components, services and routings.
- Developed front-end code with **Angular** to retrieved the data and display to the user.
- Used **Apache Kafka** in cluster as messaging system between APIs and **micro services** and worked on **Splunk** reports and logging using Log4j.
- Used **Docker** Container to address every application across the hybrid cloud and **Docker** for better collaboration and innovation.
- Designed, configured, and deployed **Amazon Web Services (AWS)** for a multitude of applications utilizing the **AWS** stack (Including EC2, S3), focusing on high-availability, fault tolerance, and **autoscaling**.

Environment: Java, Spring Boot, Spring MVC, Kafka, Angular, Hibernate4.x, Jenkins, Log4j, Liberty, Elastic search, EBS, Elastic Load Balancer, Docker, Apache tomcat, Mockito, Junit, Kubernetes.

Client: Metro Bank and BNPP

Company: CGI India, Bangalore.

Dec 2016 - Dec 2022

Role: Associate Consultant

Responsibilities:

- Developed application on **Spring framework** by utilizing its features like **Spring Boot**, **Spring Dependency injection**, **Spring Beans**, **Spring Security**, **Spring JPA**, and **Spring Batch**.
- Used **Spring Core** for configuring and using the **spring beans** in the application.
- Developed **RESTful services** based on **Spring REST** using **Jersey framework**.
- Developed several **RESTful API web services** that produce both **XML** and **JSON** to perform tasks, leveraged by both web and mobile applications.
- Involved in architecture, build and maintenance of highly available secure multi-zone **Azure** cloud infrastructure.
- Troubleshooting user connectivity and access to remote resources via **RDP** and **VPN** configuration.

- Used **Spring framework** with **Hibernate** to map to **Oracle database** and mapped using Hibernate Annotations.
- Implemented **JDBC** which is used for connecting to the **database Oracle**.
- Coordinating with onshore and offshore members implementing the changes
- Discussing with client and planning the releases, scope.
-

Environment: SOA, REST, SAX, XSLT, XML Hibernate, Spring, Talend, Docker, Code Spring Batch, Spring AOP, Oracle DB, Azure.

Client: Foresters

Company: CGI India, Bangalore

Jul 2013- Nov 2016

Role: Java TechLead

Responsibilities:

- Designed & developed a new Services to accept Underwriting request to ACORD formats
- Thoroughly performed unit testing and integration testing.
- Involved in daily meetings to keep track of the project status.
- Developed various transformation logics using **XSLT, XML** to transform request to ACORD.
- Used web-based **QC** repository manager with issue tracking features.
- Understand the client requirements, prepared estimations and Creating the TSD (Technical Design) design documents
- Travelled to Canada for requirement gathering and implementation.
- Developed transformation logic using **OXYGEN** and XMLSpy tools.
- Implemented **Jboss MQ** to invoke Vantage CICS services.
- Debugged performance of the application and enhanced the performance of the underwriting service.

Environment: Java, J2EE, ESB, XML, XSLT, SOAP, SOA, Oxygen xml, JDBC, Web Service, JMS, Jboss MQ, ALTOVA XMLspy, JBoss, CVS.

Other Experiences:

S No	Project Title	Technology	Duration	Company
1	OrderMax	Java/J2EE, Struts, Groovy, Web Services, Sterling CPQ, Hibernate, Oracle, JQuery and Web Logic.	Nov'10 to Jun'13	IBM India Pvt. Ltd
2	SQE-GHUCS	Java/J2EE, Spring IOC, Struts, IBATIS, Web Services, Oracle, XML and Tomcat.	Mar'10 to Nov'10	Tech Mahindra Ltd
3	ADOPT	Java/J2EE, Spring Framework, Hibernate, Web Services, Oracle, and Tomcat.	Jan'09 to Feb'10	Accenture Services Pvt. Ltd
4	SDP	Java/J2EE	Apr'07 to Dec'08	Accenture Services Pvt. Ltd

EDUCATION

MCA (Master of Computer Applications), Andhra University, 2006
