- **Industries:** Pharma, Insurance, Energy & Utilities, Retail

Professional Experience:

Johnson & Johnson (Consulting engagement)

Project Manager / Scrum Master

New Brunswick, NJ

Sept 2016 – present

Implemented a SaaS-based **Learning Management System** to facilitate learning, track participant progress, generate reports, and monitor performance. Additionally, set goals, defined expectations, identified high-performing talent, and developed a framework for deploying competencies at J&J.

- Guided stakeholders in understanding and implementing Scrum and empirical product development.
- Advocated for continuous improvement and experimentation, driving change to enhance the productivity of Scrum teams.
- Empowered teams to self-organize and develop cross-functional capabilities

Wal-Mart (Consulting engagement)
Technical Project Manager

Bentonville, AR
Aug 2015 – Aug 2016

Led the Walmart **Enterprise Master Item** project, establishing a foundational, omni-channel method for item setup and management. Introduced a singular, trusted, and flexible product catalog, providing consistent, rich product attributes to all data consumers across merchandise channels. Implemented an open-source tech-stack solution to reduce item setup complexities and accelerate speed to market for stores and e-commerce.

- Empowered teams to self-organize and grow cross-functionality
- Implemented continuous improvement initiatives, boosting Scrum team productivity.
- Coordinated and managed code releases and shared services with downstream applications/teams.
- Delivered portfolio metrics to the Portfolio Program Management team.

Johnson & Johnson (Consulting engagement)
Technical Project Manager

Titusville, NJ
July 2011 – Aug 2015

Johnson & Johnson's **Digital Marketing** suite comprises multiple websites to raise brand awareness among consumers and healthcare professionals. The team collaborated with Creative Agencies and Product Owners to devise strategies for driving online traffic to brand websites. The content was managed using Drupal, a **Content Management System**.

- Partner with Creative Agencies and Product Owners and devise strategies to drive online traffic to the brand websites
- Responsible for the development and maintenance of websites for the key brands
- Developing and managing digital marketing campaigns

Pfizer (Consulting engagement)
Tech Lead

Groton, CT
Sept 2009 – June 2011

Led the development of Pfizer's GLP-regulated **Animal Welfare Management System**, a suite of software modules supporting global workflows for a paperless vivarium. Facilitated development work requests across five time zones, designed a Java module for audit trails, and ensured compliance with GLP regulations to maintain system/data integrity and reliability.

Florida Power and Lights (Consulting engagement)
Tech Lead

Juno Beach, FL
Mar 2008 – Jul 2009

Developed PEARL, a streamlined application for **customer care representatives** to log calls about power outages. The new application addressed the limitations of the old Smalltalk-based system, eliminating the need for coding and application releases for business rules and scripting changes.

MetLife (Consulting engagement)
Developer

Greenville, SC
Apr 2002 – Jan 2008

Developed and maintained websites for **Long-Term Care** (LTC) Insurance customers, providing information on LTC products, plans, and enrollment options. Developed an application for the American Association of Retired Persons (AARP), facilitating online enrollments, kit requests, rate calculations, cost-of-care comparisons, and content management. Designed a 508-compliant brochure-ware website for the Federal Employee's Group Life Insurance (FEGLI) re-enrollment, enabling federal employees to view life product offerings.
