Profile

Strategic and results-oriented Project Manager with over 12 years of experience successfully leading cross-functional teams in the delivery of complex software applications, IT infrastructure upgrades, and enterprise digital transformation initiatives. Adept in Agile, Scrum, Waterfall, and hybrid methodologies, with a strong track record of managing multimillion-dollar programs from concept through execution and closure. Demonstrated ability to align business objectives with technology roadmaps, streamline processes, and drive measurable improvements in team velocity, customer satisfaction, and ROI. Known for exceptional stakeholder communication, risk management, and resource planning skills across global, distributed teams. Passionate about building collaborative team cultures and delivering value in fast-paced, client-driven environments. Based in Pittsburgh, PA and open to leadership roles in both on-site and hybrid settings.

Professional Experience

NobleTech Systems

10/2024 – Present

Senior Project Manager

Pittsburgh, PA

- Leading digital transformation programs for healthcare and fintech clients with cross-functional teams across 3 time zones.
- Introduced Agile OKR-based tracking and risk dashboards, improving executive reporting accuracy.
- Delivered 3 product releases ahead of schedule by implementing sprint forecasting and backlog grooming best practices.
- Reduced budget overruns through proactive vendor coordination and resource reallocation.
- Facilitating scaled agile ceremonies and capacity planning for a blended onshore/offshore delivery model.

Truefit

02/2022 – 09/2024

Senior Project Manager

Pittsburgh, PA

- Manage software development sprints for client web and mobile products across healthcare and retail domains.
- Work with product managers and engineers to define scopes, manage backlog, and ensure on-time delivery.
- Oversaw delivery of a HIPAA-compliant patient tracking tool for a regional clinic network.
- Facilitated daily standups, sprint planning, demos, and retrospectives across 3 distributed teams.
- Standardized reporting templates and dashboards for executive project visibility using Confluence and Smartsheet.

IBM

Technical Program Manager

12/2019 – 02/2021

Pittsburgh, PA

- Managed high-priority pandemic-related digital projects for public health and logistics clients.
- Oversaw multi-region deployment of a health screening platform used by 3M+ users during peak rollout.
- Led Agile delivery for distributed teams using Jira, Confluence, and MS Teams under tight security compliance.
- Streamlined communication between engineering, legal, and client operations to ensure timely delivery.
- Created executive scorecards and health dashboards that aligned technical progress with business KPIs.

Rivers Agile

Technical Project Manager

01/2016 – 11/2019

Pittsburgh, PA

- Managed 10+ Agile engagements for clients ranging from early-stage startups to large industrial software vendors.
- Led kickoff, planning, sprint execution, and demo cycles while handling team resourcing and communication.
- Collaborated with QA to build release pipelines using GitHub Actions and Azure DevOps.
- Maintained client relationships post-deployment, ensuring timely change requests and product enhancements.

Confluent Translations

Project Manager

05/2013 – 12/2015

Pittsburgh, PA

- Oversaw custom software deployment for internal language services management tools.
- Coordinated with external developers, built project plans, and tracked sprint progress.
- Promoted after 10 months due to strong process management and team coordination.
- Built documentation and training guides for internal teams post-launch.

Certificates

- Certified Scrum Master (CSM) – Scrum Alliance, 2019
- Project Management Professional (PMP®) – PMI, 2017
- ITIL® Foundation Certificate – AXELOS, 2016
