

Full-Stack .NET + React/Angular Developer | Cloud & Microservices | Remote-Ready

28+ years of experience delivering scalable web and cloud solutions using .NET, ReactJS, Angular, and Azure/AWS. Skilled in full-stack development, performance tuning, and modern DevOps. Experienced in remote collaboration, Agile delivery, and cross-functional leadership. LinkedIn: [linkedin.com/in/selvan-seeman-69b19319a](https://www.linkedin.com/in/selvan-seeman-69b19319a)

Technical Skills

- **Frontend:** Angular, ReactJS/Native, VueJS, ASP.NET, ASP, jQuery, HTML5, CSS3, TypeScript
- **Backend:** .NET Core, C#, VB.NET, NodeJS, Golang, Java, Python, PHP
- **APIs:** REST, GraphQL, WCF, Microservices
- **Databases:** SQL Server, MySQL, PostgreSQL, Oracle, MongoDB, DynamoDB, CosmosDB
- **Cloud & DevOps:** Azure, AWS, GCP, Docker, Kubernetes, CI/CD, Terraform
- **Other Tools:** Crystal Reports, Sitecore, SharePoint, MS CRM 365, Kafka, MSMQ, RabbitMQ

Recent Experience Highlights

1. **Bank of America (2024–2025)** – Built Angular UI TypeScript and .NET Core APIs for Events & Server Management (RODS project).
2. **Breakthru Beverages (2023–2024)** – Integrated third-party data with Azure & SharePoint via SSO; React.js & .NET Core GraphQL apps.
3. **Microsoft Corporation / Cruise LLC (2022–2023)** – Developed ReactJS admin dashboards, with Golang APIs, NodeJs, Typescript and GCP for real-time vehicle tracking.
4. **Envative Software (2022)** – Built .NET Core, Vue.js QuickPass access control and Calvary locker management systems.
5. **Maritz (2021–2022)** – Created React.js Typescript MS Teams RewardsApp integrating Azure Graph API and NodeJs, Java backends.
6. **Tesla Motors (2021)** – Upgraded Angular frontend typescript, .NET Core backend, Azure Microservices and optimized SQL queries for sales incentive systems.
7. **City National Bank (2021)** – Migrated small business wire applications to Azure, .NET Core migration; built mobile features with Swift, Kotlin.

(Earlier roles include Dentsply Sirona, BMW, Mettricon, AusNet, Education Services Australia, AGL Energy, Mobile Tracking Data, Check Inn Systems etc., plus extensive early career at Microsoft, Rambus, Applied Imaging, Pacific Bell, Healtheon/WebMD, Cincom Systems and others.)

Education & Certifications

- **M.Sc. Computer Science – St. Joseph's College, India**
- **B.Sc. Computer Science – St. Xavier's College, India**
- **Microsoft Certified Application Developer & Professional (.NET, Web, Services)**

Experience Summary:

1. Bank Of America, Houston, Texas

Jul 2024 - Jun 2025

Responsibilities: Project RODS (Full Stack Developer / Lead)

- Worked on BofA RODS project managing Events, Servers, Sods and other activities. As a Full Stack Developer I was responsible for developing user interface component based screens using Angular Framework for the RODS project. And also I have created .NET Core Web API methods that bring data from the SQL database. Used Ionic AppFlow for mobile version builds. Implemented SSO to collect data from multiple services. Also were responsible for developing several stored procedures that combine business logic. **Environment: Angular 19/18, .NET Core 8, Rest API, C#, Azure, SQL Server, DB2, Ionic AppFlow, TypeScript, OIDC, OAuth, Postman, CI/CD, SQL Stored Procedures and UI & API deployment.**

2. Breakthru Beverages, Pittsburgh, Pennsylvania

Sep 2023 - Jun 2024

Responsibilities: Project Gallo Integration (Full Stack Developer / Lead)

- Worked on Gallo Integration application in bringing data from third party sites using SSO OIDC OAuth to the internal database along with uploading files to the sharepoint portal using Azure Cloud MS Graph APIs using console import scheduler application batch processing. Have developed multiple User Interface (UI) screens and report modules using Crystal Reports in the Supplier Approval Application using ReactJS libraries. Also created several SQL stored procedures that contain business logic were used by Supplier and Integration Applications. Have used .NET Web API GraphQL server for data exchange from DB.
- Used **ReactJS, .NET Core, GraphQL, Rest API, MicroServices, C#, MSGraphAPIs, EKS** Kubernetes, OIDC, OAuth, **AWS, SQL Server, Crystal Reports**, Postman, CI/CD, SQL Stored Procedures.

3. Microsoft Corp / GM, Cruise LLC , San Francisco, California

Aug 2022 - Aug 2023

Responsibilities: Project Super Cruise (Full Stack Developer / Lead)

- Cruise an innovator in autonomy, paired with Microsoft for Hands-free fully self-driving vehicles.
- Worked on a Super Cruise project and have developed admin side user interfaces using React HTML5 CSS3 custom themes. Also have used Golang and NodeJS server for backend API development for the admin pages to track dynamic VM instances of moving real time live vehicles, vm instances performance/availability, dashboard graphs charts, alerts and other managment.
- Used ReactJS 18, Golang, NodeJs, TypeScript, HTML5 CSS3, AzureCloud,VM,Terraform

4. Envative Software Solutions, NewYork, NY

Apr 22 - Aug 2022

Responsibilities: QuickPass, Calvary Projects (Full Stack Developer / Lead)

- Worked on QuickPass Access Control System to generate visitor access code with QRCode for automatic scan generic app for anyone within QuickPass Web and Mobile based applications using Vue.js and .NET Core. Also worked on user maintenance and report modules in the access control system. The second project was developed for Calvary locker management system screens developed to be able to store and retrieve magazines, picklists and other goods in compartments allowing easier interactive user locker access.
- Used **.NET Core Rest API, MicroServices, C#, Vue.js**, Kubernetes, Docker, Material Design, SQL Server, **AWS, DynamoDB**, Crystal Reports, CI/CD, SQL Stored Procedures.

5. Maritz, Saint Louis, MO - Recognition App MSTEams Integration Dec 2021 - Apr 2022

Responsibilities: (Full Stack Developer / Lead Architect)

- Responsible for design and development of MS Teams RewardsApp series of screens on the

recognition flow approvals by points, amount, private, public messages and options to award any members within the organization using MS Teams App. Have done integration with azure, graph api, java awards rest API's and NodeJS backend server.

- Have used ReactJS, NodeJS, TypeScript, Azure, CosmosDB, HighCharts wrapper, MS Teams Toolkit, Docker, Java Spring, Git, Atlassian Jira

6. City National Bank, Los Angeles, CA (Full Stack Developer) Jul 2021 - Dec 2021

Responsibilities: Small Business Wires and Cloud Migration Projects

- Responsible for implementing Small business wire transfer related business functionalities for the CNO Web and Mobile. And also, azure cloud .net core migration from legacy .net projects.
- Used **.NET Core, C#, Angular 12**, Java, iOS and Swift for CNO Mobile, Android, Ionic Framework, ADS, Xcode, Kotlin, Ionic AppFlow, Rest API, **MicroServices, Docker, Azure DevOps, Azure, MongoDB, Kafka, CI/CD** Pipelines, SQL Server, SQL stored procedures and Atlassian Jira

7. Tesla Motors, Fremont, CA May 2021 - Jul 2021

Responsibilities: Sales Incentives Project (Full Stack Developer)

- As a full stack developer were responsible for developing SaaS based cloud MS azure micro services and other web apis to be consumed by the inside tesla sales incentives application. Also involved in developing angular front end user interface development converting legacy 1.x angular application to latest angular version. Involved in performance tuning in high traffic SQL queries to respond quickly.
- Used **Angular 11**, Highcharts, Typescript, .Microservices, Kubierto, **NET Core C# Rest API**, Atlassian Jira, Azure, Jenkins CI/CD, SQL Server.

8. Dentsply Sirona, New York, NY Jan 2021 - May 2021

Responsibilities: Filters Interface Development (Full Stack Developer)

- Responsible for implementing Select, Supreme33 and Omega AE Filters to process the dental images by applying specific filter related business functionalities.
- Used Angular 10, TypeScript, Cordova, Highcharts, **NET Core, C#, Rest API, Azure DevOps**, Jenkins CI/CD Pipelines, Crystal Reports, SQL Server and Atlassian Jira.

9. Ridley Corporation - Transport Booking Application Jun 2020 - Dec 2020

Responsibilities: (Full Stack Developer / Lead)

- Have developed transport booking mobile and admin applications using Xamarin Forms, .NET C# with all business functionalities. Used Xamarin, .NET Core, C#, Rest API, WPF, Azure DevOps and SQL Server
- Department of Education and Training DET — ARC Application
- As part of the ARC software team have implemented events publishing related and other business functionalities with Mobile/Web Accessibility features. Used Angular 10, TypeScript, Cordova, .NET Core, C#, Rest API, Azure Function App, Crystal Reports, AppInsights, Azure DevOps, Pipelines, SQL Server, Atlassian Jira.

10. Talent AGL Energy - Chatbot Application Oct 2018 - May 2019

Responsibilities: (Full Stack Developer / Lead)

- As part of the chatbot software team have implemented token handlings, analytics, logging and many other business functionalities. Used NodeJS, TypeScript, .NET Core, C#, Azure Function App, ReactJS, Highcharts, React Native, AppInsights, NewRelic Logging, Azure DevOps, Pipelines, Atlassian Jira, Cassandra, Cosmos DB NoSql, Chat Bot Application, Node JS, TypeScript, .NET Core Azure Functions, ReactJS, React Native, C#, Azure DevOps, OAuth, NewRelic, App Insights, Github, Atlassian Jira API Integration. SQL Server

11. Education Services of Australia - Government Oct 2018 - Sep 2018

Phonics Online Teacher Student Assessment Education Software

Responsibilities: (Full Stack Developer / Lead)

- As part of the phonics new software team have developed user interfaces and API methods. Used .NET, C#, Angular 9, WebAPI, redux, .NET Core, Docker Kubernetes, Windows Service.**NetCore, Atlassian Jira**
- Phonics, Angular, Ionic Framework, .NET, C#, Rest API, MVC, WebAPI, OAuth, Github, Atlassian Jira API Integration. SQL Server, Redux, Government, Docker Kubernetes, Elastic Search.

12. AusNet Services - New Residential Connection and Cost Calculator Feb 2018 - Sep 2018

Responsibilities: (Full Stack Developer / Lead)

- As part of the Sitecore team developed new web pages to capture customer details that will be sent to the Salesforce using Rest API for further processing. Also Cost Calculator pages for new residential connections. Used Azure DevOps for CI/CD pipeline,
- Have used Site Core, .NET, C#, ReactJS, MVC, WebAPI, GoogleAPIs, Azure, Atlassian Jira
- SiteCore 8, 9, .NET, C#, ReactJS, MVC, WebAPI, GoogleAPIs, Cloud Azure DevOps, Atlassian Jira API Integration

13. Metricon Homes - Metricon Retail System, MS CRM 365 Jun 2017 - Jan 2018

Responsibilities: (Full Stack Developer / Lead)

- Responsible for the design and development of multiple applications including the Metricon Retail System, Sales Quotation System, Retail Systems Management and MS Dynamics CRM Project Connect, CRM Forms customization, configuration, Plugins, JavaScript, Web API backend developments using .NET C#. Also, other projects have used WPF, Silverlight MVVM, WinForms, Visual Studio, ASP.NET, WebAPI, .NET Core 3.0/2.0/1.0, Angular 6, AngularJS, WCF, HTML5, Telerik, SQL Server, Xamarin mobile app development. Troubleshooting, bug fixes, stored procedures, deployment, releases, documentation and releases.
- ReactJS, Angular 8.0, AngularJS, Web API, .NET, Web API, WCF, Silverlight, WinForms, SQL Server, .NET Core, Telerik, HTML5, CSS3, C#, Cloud Azure DevOps, Azure Application Insights.

14. BMW Australia - Drive Away Pricing Calculator Dec 2016 - May 2017

Responsibilities: (Full Stack Developer / Lead)

- Responsible for the design and development of dynamic pricing web application module for BMW web site involving web user interface design and backend development using Angular 6, .NET C# Web API Visual Studio, ASP.NET, HTML5, SQL Server. Developed dealers website using JAVA, NetBeans, Rich Faces. I have also been involved in
- Troubleshooting, bug fixes, stored procedures, deployment, releases, documentation and releases. For source control used Azure Dev OPs, CI/CD used Jenkins deploy on AWS and Microservices. Waterfall, daily stand-up
- Angular 6.0, Web API, C#, Java, Rich Faces, Git, SQL Server, CI/CD Jenkins AWS Cloud meetings, 5 people in the team, share status/problem solving sessions.

15. Mobile Tracking Data - Fleet Management System May 2016 - Nov 2016

Responsibilities: (Full Stack Developer / Lead)

- Responsible for the design and development of multiple applications including the new fleet management system user interface design and backend developments using .NET C# MVC, WPF

MVVM Visual Studio, ASP.NET, WCF, HTML5, Telerik, AngularJS, .NET Core 2.0/1.0, Web API, SQL Server and bootstrap themes. I have also been involved in troubleshooting, bug fixes, stored procedures, deployment, releases, documentation and releases. For source control used SVN, Waterfall and agile on different projects. 2 weeks Sprints, daily stand-up scrum meetings, 12 people in the scrum team, share status/problem solving sessions

- C#, MVC, SQL Server, Xamarin, .NET Core, SVN

16. Consulting Professional Engineers Pty Ltd

Aug 2012 - April 2016

Responsibilities: (Full Stack Developer / Lead)

- CoM Graffiti Removal SharePoint Mobile friendly, CwS CoM Parking Meter Web Services Development, Kiosk Lockers, Kiosk Motel, Front / Back Office booking system, AFS – Annual Financial Statement Finance Web, UMD Firmware Development, KeySafe Manager

Suriya Systems Inc, USA

Feb 2009 – March 2012

Responsibilities: Sr. Software Developer / Tech Lead / Architect

- Collaborated with client to architect, design, and develop solutions involving .NET, C#, ASP.NET C++, SharePoint2010, Web Services, Database SQL Server, Oracle, MySQL, JQuery, HTML, CSS, JavaScript, AJAX, SVN, Angular JS.

Sedna InfoTech Pvt Ltd, Chennai, TN

Sep 2011 – July 2012

Responsibilities: Sr. Software Engineer

- Sedna Space is a Web based IDE product to develop any Web based Application on the Cloud.
- Used C# .NET ASP.NET, SharePoint, SQL Server technologies for the Architecture/Development of the product
- Architecture and Developed Interpret Engine, Metadata Visual UI Editor, Source Code Download Engine
- Used AdminIQ JQuery User Interface template for Rich UI look and feel for the web site development.

Client: - Apptivo Technologies Pvt. Ltd, Chennai, TN

April 2011 – Aug 2011

Responsibilities: Sr. Software Engineer

- Apptivo is a web based free SAAS tool (various modules for HR, crm, sales, etc.) for small business companies.
- Responsible for designing ideas to concept and implementation of twitter style message communication within all users of the firm over the web.
- Used Java, J2EE, JQuery, JSP, Servlet, JSF, Rich Faces, Cassandra and Postgres databases, Sencha Touch API's

Client: -Accuracy Inc, Sunnyvale, CA, USA

Feb 2009 – Feb 2010, Oct 2010 - Mar 2011

Responsibilities: - Multiplan

- Multiplan is a software tool produced by Accuracy to help doctors to treat cancer disease. Multiplan allows the doctors to create patient plans from the dicom images to identify the cancer and treat them.
- Responsible for designing ideas to concept and implementation on various modules in Multiplan.
- Used V C++, MFC, STL, Win32 and .Net crystal report, perforce.

Client: - Microsoft Corporation, Mountain View, CA

Sep 2009 – Sep 2010

Responsibilities: - Project: - Hiweb Redesign

- Responsible for design and development of Hiweb portal consisting of web application development, evaluating live site performance & availability using Silverlight 4.0, [ASP.NET](#), XAML, LINQ, WCF, and Entity Data Model and C #.

- Involved in project management, estimation, resource planning, task assignment and delivery
- Created various web tools for automation and scripts to load data from external data warehouse servers in Microsoft data centers across the world onto SQL server databases in Windows Server 2008, SSRS Reports, SSIS, and SharePoint. Portal doc and IIS 7 Administration.
- Used C#/ASP.NET, Silverlight 4.0 for the hiweb web application/services development, SQL Server, and Excel.

Client: - Microsoft Corporation, Mountain View, CA, USA

MSTV - Responsibilities:

- As part of the MSTV application team, have developed automation tools for the debug lab using ASP.NET, C#.
- Involved in project management, estimation, resource planning, task assignment and delivery
- Designed and developed Debug Lab Tracker/Reports automation tools, and other internal tools using C#, ASP.NET.

Rambus Inc, Sunnyvale, CA - Sr. Software Engineer

Feb 2005 – October 2008

LabStation is a software tool produced by Rambus to help customers verify Rambus' products. At the most basic level, LabStation allows the user to access chip and board registers.

Applied Imaging Corporation, San Jose, CA, USA

Feb 2001 – January 2005

Responsibilities: ARIOL (Medical Equipment) Sr. Software Engineer

- As a Software Engineer, was responsible for developing and implementing the ARIOL Software for the Medical Research Equipment to analyze human tissue using Image Processing techniques. VC++ MFC, .NET, C# were used for the Front-end screens (GUI).
- Also developed a report application that is to call web service to generate XML from SQL Server database and apply selected XSL, SVG to produce high quality reports on the browser.

ii. Tissue Micro Array Viewer (TMA Viewer)

- This project was designed and implemented for the image processing of Tissue Microarray cells. As a developer, was responsible for developing a DBStudy.dll (MFC dll) and TMA Viewer (MFC executable), Scanner (MFC executable) application embedded with medical equipment.

Algan Group Inc, Boston, MA

1997 – 2001

Sales Force Automation (Networking systems product model simulation)

Client: Intangi Inc, Sunnyvale, CA - Sr. Software Engineer

- As a Software Engineer, was responsible for developing and implementing the Sales force automation to resolve the complex networking architectures.
- Used VC++, C#, .NET were used for programming the configuration of network equipment.
- Have Used Object Oriented Programming OOPS to describe networking object components and relationship between equipment.

Client: Uniscape Inc, Sunnyvale, CA, USA

Responsibilities: - Localization Manager

- As a Software Engineer, was responsible for developing and implementing the Localization Manager MFC Front end screens (GUI), writing code to validate and send user data to the server using SOAP calls.

Client: Healthon/WebMD Corp, Santa Clara, USA

MHR Redesign and Immunization Planner

- The MHR Redesign project was aimed to add additional functionality and change the look and feel of all existing "Health Record Pages." The Immunization Planner project was aimed at creating a tool to track and plan Immunization schedules. Developed over 40 ASP files.

Client: Sandhill Systems Inc, San Jose, CA

ENTRE - E Commerce B2B

- This project was aimed to create a Web Interface for OnLine Order Processing.

Client: PacificBell, SanRamon,CA,USA

Responsibilities - Exchange PLUS - Software Engineer

As a Software Engineer, was responsible for developing and implementing the Authorized Payment Location (APLA) system. The purpose of the APLA in part was the conversion from 16 -bit to 32-bit programs. It included location, linked communities and staff TNs.

Client: Application Partners Inc, San Ramon, CA, USA

Responsibilities: - General Insurance System (GIS)

- Application Partners develops enterprise-wide insurance software solutions and delivers services, which meet customer needs. It covers Claims and Insurance Policies.

Client: Cincom Systems Inc, Cincinnati, OH

Responsibilities: - Business Control System (BCS)

- Cincom develops enterprise-wide business software for areas such as Materials Management, Manufacturing, Supply Chain Management and Purchasing.

Tritan Soft Solution, Trichy, India October 1993 - March 1997

MRC Equipment Client: Murray & Robert Construction, Johannesburg, SA

Responsibilities - Software Engineer :

- As a Software Engineer, developed and implemented multiple user-friendly (24) GUI screens to access and maintain data from the user.
- I was involved in coding, testing, and piloting the application. I created multiple reports using Crystal Report. I used DBGrid, Sheridan controls.

Client: Consolidated Communication Directories, Illinois- Offshore(via Syntel Software)

Responsibilities - Integration Project - Software Engineer

- As a software engineer, was involved in the development of Production, Accounts receivable and Contract processing.
- Created and enhanced forms and reports using Designer and Developer 2000
- Sales Control, Access Control System
- Clearing and Deposit System – Bank of Baroda
- Visual Basic VB, VBA, Crystal Report, MS Access
