

SHAH FIRTHOUS KHAN

Malvern, PA,19355 | (484) 329-0501 | shah_firthous@yahoo.com
<https://www.linkedin.com/in/shahfkhan/>

Professional Summary

- Accomplished Technology Leader with 15+ years of experience in designing and implementing innovative solutions across diverse industries, including Telco(2.5Yrs), banking & financial(6Yrs), life sciences(3Yrs), retail (2Yrs), and software/IT Services.
- Proven expertise in Solution Architecture, Data Engineering, .NET development, RPA, Generative AI, digital transformation and operational excellence.
- Dynamic problem solver, skilled in developing cutting-edge web, backend, cloud, and microservices solutions tailored to meet specific business needs.
- Certified RPA Solution Architect (UiPath) with 4+ years of specialized expertise in Robotic Process Automation (RPA), leading enterprise-scale automation initiatives across banking, insurance, and cross-functional operations.
- Delivered 90+ automation processes using UiPath, Power Automate, and AI integration, achieving 70% reduction in processing time and 7,000+ annual man-hour savings.
- Proficient in implementing Agile methodologies and DevOps practices, leading cross-functional teams to enhance collaboration and adaptability. Established CI/CD pipelines that significantly improve delivery timelines and product quality.
- Extensive experience in developing and deploying Web Services, Web API, and Rest based Services using C#. Strong analytical and conceptual skills in database design, development and writing T-SQL for implementing stored procedures, functions, triggers in MS SQL Server.
- Experienced in integrating with Oracle Siebel, ServiceNow, SAP, MS Dynamics, Salesforce and other systems.
- Strong ability to translate complex requirements into technical specifications, fostering seamless collaboration between development teams and stakeholders.
- Exceptional project management skills, successfully led teams to deliver high-quality solutions on schedule and within budget.
- Skilled in providing pre-sales technical support, estimations, designing applications, and delivering Proof of Concept (PoC) solutions that exceed client expectations.
- Holds certifications in Azure AZ-900, UiPath RPA Architect, and ITIL 4 Foundation, underscoring a commitment to industry best practices.
- Excellent communicator with a track record of building strong relationships with customers, vendors, and cross-functional teams, effectively conveying technical concepts to diverse audiences.

Technical Skills:

- Languages & Frameworks: C#, Python (PySpark, Flask), TypeScript, .Net (Core 2+,3+Framework 2+,4+), ASP.Net Core, MVC, Entity Framework, RESTful API, Spring Boot, Angular, React, VB.Net
- RPA Tools: UiPath (Certified Architect), Power Automate, OCR, SAP Automation, Salesforce Integration, API-Driven Automation
- Data: SQL Server, Databricks, Oracle, MySQL, Neo4j (Graph DB), Mongo DB, LINQ, T-Sql

- AI/ML: GenAI with Azure OpenAI, Azure AI Search, RAG, Lang Chain, Hugging Face, PyTorch
- Cloud: Azure (AZ-900), AWS
- DevOps: Git, JIRA, Confluence, Bitbucket, Docker, Azure DevSecOps, Kubernetes, Jenkins
- RPA: UiPath (certified), Power Automate
- OS: Windows, Linux (Ubuntu, RHEL)
- Methodologies & Other: Agile/Scrum, OOP, SOLID Principles, Design Patterns, AI/ML, API Design

Tools Used: VS2022, VS Code, Elastic, Kibana, SSMS, SSRS, PowerShell, POSTMAN, MS Project, MS Visio, draw.io, SQL developer, PuTTY, IntelliJ, Docker Hub, M365, AJAX, SOAP UI, LangChain, Power Platform, SonarQube, TSF, Azure Log Analytics, OpenAPI(Swagger), FastAPI

Experience

Solution Architect

Jan 2025 – Present

Sortins Technologies Inc, PA, USA

- Lead the ideation, architecture and planned for *Retail Analytics & Recommendation Engine* using React, .NET Core, Databricks with multi-cloud agility, and AI-Driven automation (Hugging Face NLP and Neo4j).
- Created a scalable AI system utilizing OpenAI's text-embedding-3-small, Chroma, and GPT-4 to retrieve and generate context-aware responses from PDF documents in data lake. Used Apache Spark for data processing and cleaning, and orchestrating with LangChain. This approach eliminated the need for Azure AI Search and Document Intelligence services, resulting in a more cost-effective solution.

Manager - Solution Architect - Data & AI

Nov 2020 – Jan 2025

LPS(Lenovo), Malaysia

Solution Architect

- Led Data & AI practices team
- Developed customizable RAG chat applications using Azure AI Search, OpenAI, and LangChain in Python, leveraging LLMs to improve client data retrieval efficiency. Deployed solutions for state provident fund, resume screening processes, and project estimation.
- Developed data platform for project governance and reporting, utilizing Azure services (ADLS, Databricks, Synapse, Data Factory) and Power BI, integrating data from Dynamics 365, SAP, Salesforce, and finance data.
- Architected and developed Power Platform applications using PowerApps, Power Automate, Dataverse, SharePoint List, AI enabled Copilot studio and Power BI for improving operational processes. Developed for internal IT ticket management.
- Developed multiple business automation processes using Power Automate
- Designed and deployed a Spring Boot microservices rule engine product for MRT train engineering work planning, leveraging Neo4j, Cypher to model complex relationships and dependencies. Led the implementation of Agile and CI/CD practices using JIRA, Confluence, Bitbucket, Azure DevOps, Azure Monitor, and Application Insights.
- Designed and developed a Claim Management System using React and .NET Core, implemented a streamlined workflow for efficient claim submission and management.

- Modernised applications through containerization with Kubernetes, reducing deployment time and improving scalability. Established CI/CD pipelines, resulting in faster release cycles.
- Mentored service desk non-developers in creating automation solutions.
- Architected cloud solutions with Well-Architected Framework for RFPs, supporting the pre-sales team's win rate and secure new contracts. Provided accurate estimations, FPA and project planning.

RPA Architect

- Established and led an Automation CoE, managing an 8-member cross-country RPA team. Developed and managed 90+ I/RPA processes using UiPath across multiple platforms (Web, DB, SAP, Salesforce, Siebel CRM, Macro, API, Unix, Email, OCR), achieving 70% reduction in processing time and saving 7,000+ man-hours annually, for *Singapore Telco* client.
- Automated and stabilised business processes across HR, Finance, Customer service, IT departments, reducing manual processing time by 40% and improved cross-functional collaboration.
- Received 'Excellence Leadership' award for implementing a holistic management approach. Increased team productivity through strategic goal setting, optimal resource allocation, and effective workload management. Achieved 100% of project objectives.

Solution Architect- RPA

Jan 2020 - Nov 2020

Cognizant, Malaysia

- Automated 20 business processes using *UiPath* for *bank and insurance* clients.
- Identified and prioritized 30+ automatable business processes through comprehensive analysis. Conducted thorough requirement gathering sessions and created detailed Process Design Documents (PDD), Solution Design Documents (SDD), and Runbooks, reducing development time by 25%.
- Implemented robust project management practices including accurate effort estimation, risk assessment, and progress tracking. Delivered 100% of projects on time and within budget.

Technical Lead

Jun 2018 - Jan 2020

HCLTech, Malaysia

- Architected and built scalable base system framework using .Net core and Angular for *Life science* client.
- Led and mentored 4 engineers to deliver high quality codes and projects.
- Implemented CI/CD pipelines in Bamboo, JIRA - helping teams to deploy in Dev, Test and Staging environments.

Senior Consultant

Apr 2017 - Apr 2018

Tandem Advisory (Contract), Client- Averis, Malaysia

- Designed and developed event management web application implementing Domain Driven Design (DDD) and service-oriented architecture, resulting in improved scalability and maintainability.
- Developed a recruitment web workflow application using ASP.NET MVC5 and jQuery, integrating with SAP web services. Created a dual-language job application web portal using MVC framework for Malaysia and Indonesia markets.

- Integrated projects with service layer using REST client, enabling data sharing between Recruiter portal and mobile app data improving data consistency.

Technical Lead

Aug 2016 - Mar 2017

TekSystems (Contract), Client - Hewlett Packard Enterprise (Contract), Malaysia

- SME for an internal audit system using Oracle and HP cloud server.
- Collaborate with various internal and external team of change management and support activities.

Senior .Net Developer

Dec 2015 - Jul 2016

Petronas ICT (Contract), Malaysia

- Developed Upstream Master Data management application and warehouse barcode system using C#, MVC5 jQuery, EF, SQL Server and .Net CF.
- Guided team members on proposed changes in the development process and standards as per enterprise architecture and design principles.

Software Development Engineer

Jan 2015 - Nov 2015

Infovista (fka Ascom Network Testing), Malaysia

- Developed components for Fleet Manager product by TDD approach with Agile methodology using C#, jQuery, Kendo UI, Bootstrap, WCF, MVVM pattern.
- Designed and developed SMS provider manager application that integrated the core .Net application.

Technical Lead

Jun 2012 - Dec 2014

Tech Mahindra, Malaysia

- Involved in entire SDLC, contributed 60% of time in firsthand coding and code review. Onsite project co-ordinator.
- Led technical team and monitoring team performance through timely feedbacks, thereby, ensuring overall team productivity and quality. Providing effort estimation, creating WBS.
- Developed full suit retail web solution using C#, ASP.Net, jQuery, JSON, MSSQL, TFS
- Developed applications for Banking and Retail clients

Senior Analyst Programmer

Jun 2008 - Jun 2012

Standard Chartered Bank Scope International, Malaysia

- Developed loan computational components for Credit card and Loan Front End Lending (FEL) systems using C#, VBA, SQL Server, VB6
- Supported (FEL) business base of five countries (China, Thailand, Indonesia, Philippines, and Brunei)

Application Developer

Oct 2007 - May 2008

CMS I-Systems Bhd., Malaysia

- Developed *insurance* application using C#, ASP.Net, SQL Server, Ajax, Active Reports

Programmer

Feb 2005 - Sep 2007

AP Safetec, Malaysia/Norway

- Designed and developed vessel movement GIS application using VB.Net, ESRI ArcGIS
- Enhanced a GIS application to plot the vessel movement using MapInfo MapBasic.

Education:

- Bachelor of Engineering (Mechanical Engineering).

Certifications:

Microsoft Certified: Azure Fundamentals AZ-900

(<https://www.credly.com/badges/0974e448-e4ad-4d5d-8d63-f3359c3f108c>)

ITIL® Foundation, Candidate No: 9980031619100156 from AXELOS

UiPath certified RPA Solution Architect
