**Senior Data Engineer | Cloud Data Platforms | AWS, Spark, Kafka, Airflow, Snowflake |
Real-Time Streaming | ETL Pipeline Optimization | Big Data Solutions**

PROFESSIONAL SUMMARY

Accomplished Senior Data Engineer with 10+ years of expertise designing and implementing enterprise-scale cloud data platforms, ETL pipelines, and real-time streaming solutions across AWS, GCP, and Azure environments. Proven track record delivering cost-effective data engineering solutions using Apache Spark, Kafka, Airflow, and Snowflake, achieving \$150,000+ in annual cost savings and 60% performance improvements. Expert in Python, SQL, and big data technologies with demonstrated success leading cross-functional teams and driving data platform modernization initiatives. Specialized in optimizing data warehousing solutions and building scalable streaming architectures that support data-driven decision making for enterprise organizations.

CORE SKILLS / TECHNICAL COMPETENCIES

Programming Languages: Python, SQL, Java, Scala, NoSQL, PostgreSQL, MySQL, Git

Big Data Technologies: Apache Spark, Apache Kafka, Apache Flink, Hadoop, Storm, Kinesis, Streaming Data Processing

Cloud Platforms: AWS (Glue, Redshift, S3, EMR, Lambda, EC2), Google Cloud Platform (BigQuery, Dataflow), Microsoft Azure (Data Factory, Synapse Analytics)

ETL & Data Pipeline Tools: Apache Airflow, Apache NiFi, Talend, Informatica PowerCenter, AWS Glue, Data Pipeline Orchestration

Data Warehousing: Snowflake, Amazon Redshift, Google BigQuery, Azure Synapse, Databricks, Teradata

DevOps & Infrastructure: Docker, Kubernetes, Jenkins, Terraform, CI/CD Pipelines, Infrastructure as Code

Business Intelligence Tools: Tableau, Power BI, Looker, Apache Superset, Grafana, Qlik Sense

PROFESSIONAL EXPERIENCE

SENIOR DATA ENGINEER

2020 – Present

Haithem Tech

- Architected enterprise-scale AWS data pipelines using Glue and PySpark, processing 10TB+ daily data volumes with 99.9% uptime reliability
- Spearheaded migration of 100+ legacy batch jobs to serverless ETL architecture, generating \$150,000 annual cost reduction and improving scalability
- Orchestrated 150+ complex Airflow workflows for automated data pipeline management, reducing manual intervention by 80% and improving operational efficiency
- Optimized Amazon Redshift performance through advanced query tuning and indexing strategies, improving query latency by 40% for critical business reports
- Led cross-functional team of 5 data engineers in platform modernization initiatives, delivering 3 major projects ahead of schedule and under budget
- Integrated machine learning pipelines with MLflow and SageMaker for automated model deployment and real-time inference capabilities

DATA ENGINEER

2015 – 2020

Sisense Inc.

- Developed robust Apache Spark and Kafka streaming pipelines processing 5TB+ daily transaction data with real-time analytics capabilities
- Automated data ingestion processes using Python and Apache Airflow, reducing manual data processing by 70% and improving data freshness
- Consolidated 5 disparate Redshift data warehouses into unified architecture, improving overall query performance by 35% and reducing maintenance overhead
- Delivered comprehensive Tableau dashboards and executive KPI reporting solutions supporting data-driven decision making for C-level executives
- Containerized data processing workflows using Docker and Kubernetes, improving deployment efficiency by 50% and enhancing system reliability
- Implemented data quality monitoring and alerting systems, reducing data inconsistencies by 60% and improving downstream analytics accuracy

JUNIOR DATA ENGINEER / ANALYST

2012 – 2015

Enigma Technologies

- Developed SQL and Python ETL scripts for data extraction, transformation, and loading across multiple enterprise systems, processing 1TB+ monthly data volumes
- Built multidimensional OLAP cubes using Microsoft SQL Server Analysis Services for advanced business intelligence and reporting capabilities
- Supported cloud migration initiatives from on-premises infrastructure to AWS, reducing operational costs by 25% and improving system scalability
- Created automated ETL workflows using SSIS and custom Python scripts, improving data processing efficiency by 40% and reducing manual errors
- Performed comprehensive data profiling and quality assessment for data warehouse modernization projects, identifying and resolving 200+ data quality issues

KEY ACHIEVEMENTS

- **Cost Optimization Excellence:** Generated \$150,000+ annual savings through strategic AWS serverless ETL migration and infrastructure optimization initiatives
- **Performance Leadership:** Achieved 60% reduction in data processing job runtimes through cloud-native architecture implementation and performance tuning
- **Query Optimization Impact:** Improved critical business query performance by 40% through advanced Redshift tuning, indexing strategies, and optimization techniques
- **Executive Business Impact:** Successfully delivered real-time dashboards and analytics solutions supporting data-driven decision making for 500+ enterprise users
- **Platform Scalability:** Led data platform modernization serving 50+ internal teams and processing 15TB+ daily data volumes with 99.9% uptime

EDUCATION

Bachelor of Science in Computer Science

University of Vermont | Burlington, VT

CERTIFICATIONS

- AWS Certified Data Analytics – Specialty
- AWS Certified Solutions Architect – Associate
