PROFESSIONAL SUMMARY

Versatile Full Stack Java Developer with 2 years of hands-on experience building and optimizing scalable web applications and microservices using Java, Spring Boot, React.js, and AWS. Adept at designing RESTful APIs, integrating modern frontend frameworks, and driving continuous integration with Docker and Jenkins. Skilled in database optimization, secure authentication, and Agile team collaboration. Proven ability to deliver high-quality solutions, automate deployments, and contribute to successful digital transformation projects in both enterprise and startup environments.

TECHNICAL SKILLS

Programming Languages & Frameworks: Java, JavaScript, TypeScript, Go, SQL, Spring Boot, Spring MVC, FastAPI, Node.js

Frontend Development: React.js, Next.js, Angular, Redux, HTML5, CSS3, Tailwind CSS, Bootstrap, JSP, Responsive Design, Web Accessibility (WCAG), Figma,

Backend & API Development: RESTful APIs, GraphQL, Microservices Architecture, JWT Authentication, OAuth 2.0, API Gateway, Role-Based Access Control (RBAC), Webhooks, Server-Side Rendering, Express.js

Cloud, DevOps & Infrastructure: AWS (EC2, S3, Lambda, RDS, API Gateway, Cognito, ECS, EKS), Microsoft Azure, Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, Nginx, Vercel, Netlify, CI/CD Pipelines

Databases, Caching & Messaging: PostgreSQL, MySQL, MongoDB, DynamoDB, Redis, Cassandra, Apache Kafka, RabbitMQ, Redis Streams, Elasticsearch, Caching Strategies, Sharding, Partitioning

Tools, Testing & System Design: Git, Maven, Jira, Agile/Scrum, JUnit, Mockito, Selenium, Jest, Cypress, Mocha, Postman, ELK Stack, Prometheus, Grafana, Load Balancing, Circuit Breakers, Code Reviews

PROFESSIONAL EXPERIENCE

Full Stack Java Developer, HCLTech

Jan 2021 – Dec 2022 | Remote, India

- Engineered a resilient transaction management system using Java, Spring Boot, and Spring MVC, designing RESTful APIs for real-time account servicing, funds transfer, and transaction operations across multiple client platforms.
- Established robust, role-based authentication leveraging Spring Security and JWT, upholding compliance with PCI DSS standards and regulatory requirements within high-volume transactional environments.
- Automated CI/CD processes with Jenkins and Docker, integrating rigorous testing frameworks (Postman, JUnit, Mockito) to achieve 95% code coverage and reduce deployment timelines by 40%.
- Deployed scalable microservices on AWS using Lambda, API Gateway, and CloudWatch, supporting seamless scalability, API protection, and proactive, real-time monitoring for business-critical workflows.
- Improved response times by 30% through Redis caching strategies and reduced database load, while modernizing user interfaces with React.js, Redux, and Bootstrap to enhance performance and data visualization.
- Actively monitored and optimized system performance utilizing Splunk and AWS CloudWatch, rapidly addressing issues to ensure maximum uptime and operational excellence in demanding production environments.
- Collaborated closely with cross-functional teams, including frontend, QA, and DevOps, to deliver seamless integrations, resolve incidents promptly, and ensure alignment of technical solutions with business objectives.
- Conducted thorough code reviews and enforced best practices for security, quality, and maintainability, driving a reduction in critical bugs and fostering a culture of continuous technical improvement.
- Mentored junior developers on Spring Boot, REST API development, and Agile methodologies, enhancing team productivity and accelerating the onboarding process for new engineers.

PROJECTS

Identifying Cyber Threats Using Machine Learning

Developed a real-time machine learning solution that analyzes network traffic and system logs to detect cyber threats (malware, phishing, DDoS), providing users with actionable alerts and continuously updating models to adapt to evolving attack patterns.

Attendance Monitoring System for Parents – Website

Created a secure web and mobile platform that tracks student attendance in real-time using RFID/biometrics/QR codes, sending instant notifications and providing parents with clear, graphical insights into their child's attendance patterns.

EDUCATION

Master of Science, University of Cincinnati

Aug 2024 - Apr 2026 | Ohio, USA

Computer Science

Bachelor of Technology, Sri indu college of Engineering and Technology

Aug 2020 – Apr 2024 | Hyderabad, India

Computer Science
