

Sharon Ben Hayon

Senior Project Manager | Enterprise Software Delivery | Cross-Functional & Global Programs

Westford, MA | (781)-248-1123 | sharonbhe@gmail.com | www.linkedin.com/in/sharon-ben-hayon

PROFESSIONAL PROFILE

Senior Project Manager with 15+ years leading complex, multi-vendor software initiatives across SaaS, fintech, and enterprise platforms. Experienced in **end-to-end project lifecycle management**, **Agile and Waterfall delivery**, and **cross-functional coordination** across global teams. Skilled in **stakeholder communication**, **budget and risk control**, and **governance frameworks** to ensure projects meet scope, schedule, and quality objectives. Recognized for improving delivery predictability, strengthening client relationships, and driving measurable business results through disciplined execution and continuous improvement.

CORE COMPETENCIES

Project & Program Management | Agile, Waterfall & Hybrid Delivery | Scope, Schedule & Budget Control | Risk & Issue Management | Stakeholder & Vendor Coordination | Cross-Functional Team Leadership | Process Improvement & Change Management | Client & Executive Communication | Resource Planning & Allocation | Quality Assurance & SDLC Governance | MS Project, Jira, Asana, Trello, Confluence | PMP / Agile Frameworks

KEY ACHIEVEMENTS

- **Delivered** a \$50M **enterprise SaaS program** on time and within budget, coordinating engineering, QA, product, and vendor teams across 4 countries.
- **Managed concurrent global projects** (US, India, Ireland, Poland), increasing **delivery velocity by 30%** through workflow optimization and Agile practices.
- **Implemented project governance dashboards** in **Jira** and **Power BI**, reducing reporting time by 40% and improving visibility for senior stakeholders.
- **Reduced production defects by 50%** through improved QA processes and structured risk mitigation.
- **Improved client satisfaction** from 76% to 94% by establishing transparent communication loops and expectation management.
- **Directed vendor coordination and resource allocation**, achieving consistent delivery within defined cost and quality targets.
- **Led post-project evaluations** and continuous improvement efforts, embedding lessons learned into future delivery cycles.

WORK EXPERIENCE

Charles River Development (A State Street Company), Burlington, MA 08/2008 – 05/2025
Global FinTech firm serving 300+ clients managing \$60T in assets; revenue growth from \$120M to \$600M during tenure.

Director of Engineering for Portfolio Management and Analytics Department 01/2023 – 05/2025

- **Led 60+ engineers across 10 agile teams** in the US, India, Ireland and Poland, delivering all projects on schedule.
- **Hosted bi-weekly executive client meetings** to review metrics, discuss roadmaps, and resolve technical issues.
- **Quickly resolved high-impact production issues** during crisis, delivered solutions within hours, strengthening customer trust.
- **Partnered with product leadership** to align technical roadmaps with business priorities and customer needs.
- **Managed contractors**, defined project scopes, and ensured budget compliance.
- **Designed Dynatrace dashboards** to track client performance issues (e.g., freezes, errors, latency), enabling faster data-driven troubleshooting.
- **Built JIRA workflows and real-time dashboards for engineering support**, improving incident tracking and **reducing resolution time by over 50%**.

Director of Engineering for Wealth Department (interim)

04/2022 - 12/2022

- **Led 35 engineers across 6 scrum teams** across the US, Poland and India.
- Delivered 10 major projects on time while supporting four key clients through technical escalations.
- Partnered with DBAs and architects to improve application design and performance.
- Worked closely with QA leadership to define testing standards, cutting defects by 20% and reducing regression testing time by 30%.
- Contributed to departmental hiring plans in partnership with recruiting and senior leadership.

Senior Engineering Manager for Trading and EMS teams

01/2019 – 12/2022

- **Led 15 engineers and QA across two scrum teams**, managing two engineering managers and overseeing **the full SDLC, process improvements, and roadmap alignment** with product goals.
- Drove DevOps and automation initiatives, streamlining patch delivery and support workflows, and building JIRA and Power BI dashboards to track productivity and release quality.
- Championed team growth through structured coaching, performance feedback, and recruiting across engineering, QA, BA, and product management.
- Contributed to enterprise data standards through participation in the Data Model Committee, improving consistency and data governance.

Technical Manager for Equity Trading Team

08/2009 – 01/2019

- **Led a team of 8 developers and QA for the Equity Trading module, serving as Scrum Master to drive continuous improvement and on-time delivery.**
- **Resolved critical client issues** through performance tuning and timely fixes, and **developed internal tools** to automate patch delivery and streamline support workflows.

Senior Software Engineer

08/2008 – 08/2009

ADDITIONAL WORK EXPERIENCE

Earlier roles include Principal Software Engineer (CardScan), Database Developer (Skyline), and Software Developer (Arelnet, Amdocs).

TECHNOLOGIES & SKILLS

Languages & Frameworks: .NET, C#, Java, JavaScript (React/Angular)

Cloud & Infrastructure: Azure, AWS, Kubernetes, Docker, Terraform, Redis, Kafka, Microservices

Observability & Monitoring: Dynatrace, Grafana, OpenTelemetry, ELK Stack

Data & Databases: SQL Server, Oracle, Snowflake

CI/CD & DevOps: GitHub, Jenkins, TeamCity, CI/CD pipelines, GitHub Actions

Project Tools: JIRA, Confluence, Power BI, Power Automate, Salesforce

AI & Emerging Tech: GitHub Copilot, Cursor, Zencoder, prompt engineering, LLM integration

EDUCATION

Bachelor of Computer Science and Mathematics

Ben-Gurion University, Israel

CERTIFICATION & PROFESSIONAL DEVELOPMENT

Atlassian Agile Project Management, AWS Certified Cloud Practitioner, Agile Foundations (LinkedIn Learning), Mastering the Art of Prompting, Understanding Agentic AI
