PROFILE

- Managed the **SDLC** from analysis through deployment and support, ensuring seamless performance and application security with **Spring Security**.
- Expertise in **Agile/Scrum**, conceptualizing solutions for **Finance, Banking, Healthcare, and Insurance**
- Excelled in **Java OOP**, engineering web/n-tier apps using JEE technologies like **Spring, Hibernate, REST**
- Leveraged **Java 8 features**, crafted efficient **SQL**, and wielded **AWS** for scalable cloud-based solutions
- Ensured code quality with **SonarQube**; streamlined builds with **Jenkins** for CI and deployments using **Maven**, **ANT**, and **Log4J** for logging.

PROFESSIONAL EXPERIENCE

Tata Consultancy Services

01/2024 – present | Jackson, Mississippi

Full Stack Developer

- Optimized the performance of the claimant list functionality, reducing the **load time by 40%** by debugging and resolving the defect prompted by the absence of an **offset parameter**.
- Overhauled the User Interface by harnessing **Angular, Java**, and **TypeScript** and designing with **HTML** and **SASS**. Debugged and fixed more than 100 alignment and event handling bugs.
- Crafted back-end solutions with **Java 8** using **Spring Boot** and **Hibernate** for **JPA** on **PostgreSQL**, boosting web application performance and speed by 15% through systematic code optimizations and reviews.
- **Automated a centralized Excel control file** integrated with batch processes to log correspondences generated and merged by correspondence code, improving traceability and **eliminating manual tracking efforts**.
- **Collaborated with cross-functional teams** (frontend, DevOps, QA) to refactor legacy modules into scalable microservices, leading to a **25% improvement in response times** and easier onboarding of new features.

Sanquest Inc.

08/2023 – 01/2024 | Irving, Texas

Software Intern

- Implemented robust **RESTful web services** to retrieve data from the client side and secured the application using **Spring Security & OAuth2**.
- Boosted the **JUnit** code coverage by 40% through targeted unit testing efforts.

Cognizant Technology Solutions

02/2018 – 08/2021 | Chennai, India

Full Stack Developer

- Engineered a secure and reliable site-to-site VPN connection between the on-premises data center and **AWS cloud** environment by building and configuring a **Virtual Private Cloud (VPC)** on AWS.
- Accelerated system performance by 70% through implementing **optimized algorithms**, restructuring existing code for **database querying**, and refining functional KPIs.
- Delivered a 60% performance boost in an existing **Angular** application through strategic code optimizations including the implementation of **Lazy Loading Modules, Tree Shaking**, and **advanced caching techniques**.
- Directed and **mentored** 13 junior developers through comprehensive code reviews, cultivating an environment of relentless improvement in code quality and development practices.
- Authored **Python** scripts for data analysis and fuzzy matching, enhancing data integrity, while crafting a feature to transform image formats into URLs and seamlessly upload to **Amazon S3**.

EDUCATION

Master of Science, , Computer Science

08/2021 – 05/2023 | Richardson, Texas

The University of Texas at Dallas

Bachelor of Technology, Electronics and Communications

06/2013 – 05/2017 | Chennai, India

SRM University

SKILLS

Languages — Java, Python, C, JavaScript, Typescript, HTML5, CSS3

Frameworks/ Librabries — Spring, Spring Boot, Angular, React, Django, Hibernate

Database Management — SQL (MySQL, PostgreSQL, Oracle), NoSQL (MongoDB, Cassandra, Astra DB), ORM frameworks (Hibernate, Entity Framework)

Version Control Systems — Git (GitHub, GitLab, Bitbucket), SVN

Development Tools — Integrated Development Environments (VS Code, IntelliJ IDEA, PyCharm, Eclipse), Build tools (Maven, ANT, npm), Containerization (Docker, Kubernetes)

Testing and Quality Assurance — Unit Testing (JUnit, PyTest), Integration Testing, Test-Driven Development (TDD), Code Quality Tools (SonarQube)

DevOps and CI/CD — CI/CD (Jenkins, Kafka), Cloud Platform (AWS)

PROJECTS

Secured Real-time Tweets Sentiment Analysis 10/2022 – 12/2022

- Built a secure ETL pipeline processing 20,000+ tweets in 5 hours, analyzing sentiment with **Twitter API**, **TextBlob**, and **Spark**, and publishing results to **Kafka**.
- Applied **spaCy NER** (Named Entity Recognition) to detect sensitive entities, hashed and encrypted tweets with **SHA-256** and **AES-256**, and stored in **AWS S3**.
- Extracted insights from data plots using **Elasticsearch** and Kibana for detailed sentiment visualization.

Tech Stack: Kafka, Kibana, PySpark, Elastic search, AWS

E-commerce Pharmacy Website

10/2021 – 12/2021

Web Development Course Project

- Developed a responsive e-healthcare web app for medicine ordering, integrating **OAuth** with **JWT** for user authentication and authorization.
- Implemented **role-based** interfaces for users and admins, enabling inventory and category management, plus order status notifications.
- Delivered a **Progressive Web App** (PWA) for cross-platform support, offline navigation, and app notifications, boosting SEO by 25%.

Tech Stack: Java, Spring Boot, MySQL, Angular framework, Bootstrap

CERTIFICATES

AWS Certified Solution Architect- Associate by Amazon Web Services.

Certified Kubernetes Application Developer

Salesforce Admin Certified.

IBM Data Science Specialization by Coursera

Team awarded with Best Custom Development & Integration Project-2020 within CIM practice.

Recognized by client leadership for smooth handling and delivering the assigned task during 2019 peak season workloads.
