PROFESSIONAL OVERVIEW

Driven software engineer with 3 years of hands-on experience in the software development lifecycle. Skilled in crafting high-performing applications using Java, Spring, and RESTful APIs. Strong collaborator in Agile teams, committed to delivering innovative solutions that meet diverse business needs.

WORK EXPERIENCE

Application Developer

Thoughtworks | 2021- 2024

- Implemented REST APIs using Spring Boot, which increased system usability and user engagement by 20%.
- Employed Hibernate ORM to enhance database interactions, decreasing query times by 40% and boosting application performance.
- Collaborated closely with cross-functional teams to re-engineer a legacy system using Java and Spring Boot, improving system efficiency by 40%.
- Reduced code defects by 30% through code reviews and paired programming.
- Contributed to the creation of management system which reduced bug fixed times by 20%. Test driven development covered all scenarios and helped reduce bugs.
- Worked with Agile methodologies to manage projects efficiently and contribute to sprint planning and backlog refinement.
- Working Knowledge of segment tool for data tracking.

Application Developer Intern.

Thoughtworks | 2020- 2021

- Developed backend functionality for a customer-facing online ticket booking portal that increased user engagement by 20% through enhanced features and usability.
- Experienced in deployment of java application and components as services through SOAP, Restful and WSDL.
- Dedicated to following clean code practices. Met project deadlines consistently. Received a commendation for dedication and focus.

STRENGTHS

- 🧠 Problem-Solving Skills
- 👥 Teamwork and Collaboration
- 🔍 Detail-oriented
- 🚀 Enthusiasm

SKILLS

- Java, Spring Boot, JavaScript, Nodejs, c, c++, HTML, CSS, python
- Junit
- MySQL, PostgreSQL, MongoDB
- Eclipse, IntelliJ, Spring Tool Suits, Postman
- Maven Gradle

PROFESSIONAL DEVELOPMENT

- NodeJS API Development on Udemy, 2021
- AWS fundamental on Coursera, 2020

PROJECTS

- **Master's Thesis on Redactable Blockchain and Chameleon Hash Function**
Characterization: research on Hash function, characterizes and find optimal solution for hash generation and collision finding time under **Dr. Manik Lal Das**.
- **DAEvents:** Software to create and view events and get notified for the preferred events easily and efficiently. Also classify events based on preference, categories, and location, under **Dr. Asim Banerjee**.

EDUCATION

DA-IICT **Gujrat, India** **2018-2020**

MTech in Information and Communication Technology

Main coursework: Blockchain and Cryptocurrencies, Distributed System, Data Structure, wireless System design, Operating system

GEC Bhavnagar **Gujrat, India** **2013-2017**

BE in Information Technology

Main coursework: Data Structure, Algorithms, Database Management System, Computer Network, Software Engineering
