📍 San Jose, CA 📞 669-204-8473

EDUCATION

San Jose State University, San Jose, CA, USA

Master of Science in Software Engineering

August 2020-May 2022

GPA: 3.6/4

Biju Patnaik University of Technology, India

Bachelor of Technology in Computer Science and Engineering

August 2013-May 2017

GPA: 8.18/10

TECHNICAL SKILLS

Languages: Java, JavaScript, Python

Database: DynamoDB, MySQL, MongoDB, Redis

Frontend: React.js, Redux, HTML, CSS, Bootstrap, Typescript

Backend: REST API, Node.js, Express.js, Kafka, GraphQL, Spring Boot

Cloud & DevOps: AWS (S3, Lambda, CloudWatch, ECS, Evidently), Docker, Kubernetes

Development Tools & Practices: Git, CI/CD, OOP, Design Patterns, Data Structures & Algorithms, Agile

PROFESSIONAL EXPERIENCE

Amazon

June 2022-Present

Software Development Engineer

- Engineered core features for the Case Management Platform, an internal tool handling millions of employee cases annually, improving workflow efficiency.
- Optimized frontend components using TypeScript and Stencil, reducing case resolution time by 20% by streamlining agent workflows.
- Refactored the email handling system to dynamically select the appropriate email server, improving system scalability & reliability while maintaining backend consistency.
- Led migration of the send-email functionality from Salesforce to an in-house solution, utilizing A/B testing with AWS Evidently, ensuring zero downtime and smooth transition.
- Accelerated domain onboarding by optimizing workflows, reducing setup time by 50%, enabling faster enterprise-wide adoption.

Robert Bosch Engineering and Business Solutions Pvt. Ltd, Bangalore, India

June 2017-May 2020

Software Engineer

- Developed enterprise web applications for warehouse management, sales, and distribution using SAP UI5, enhancing business process automation.
- Refactored legacy codebase, improving system response time by 25% through better data handling and optimized queries.
- Built RESTful APIs with OData to facilitate seamless data exchange, ensuring scalability & security compliance.
- Modularized the codebase into reusable components, reducing development time by 30%.

PROJECT EXPERIENCE

Splitwise Prototype:

- Technologies:** MongoDB, MySQL, Node.js, Express.js, React, Redux, Kafka, AWS ECR, AWS S3
- Designed a scalable expense-sharing application using MERN stack & Kafka for event-driven architecture.
- Implemented JWT authentication & Redux, improving state management & security.
- Reduced response time by 15% using SQL connection pooling and optimized API endpoints.
- Conducted load testing for 1,000+ users using JMeter and deployed a containerized version on AWS ECR.

Reddit Clone:

- **Technologies:** MongoDB, Redis, React, Redux, Express.js, Kafka, AWS (EC2, S3), SocketIO, Kubernetes
- Developed a high-performance discussion platform supporting real-time messaging & role-based access.
- Improved system performance by 10% by integrating Redis caching & AWS S3 for image hosting.
- Enabled horizontal scalability by deploying MongoDB sharding & Kubernetes-based load balancing.

Vaccination Management System

- **Technologies:** Java, Spring, AOP, Firebase Authentication, MySQL, React.js, AWS EC2
- Built a vaccination scheduling system handling real-time clinic availability & user bookings.
- Leveraged Spring Boot (AOP, JPA, Transactions) & Firebase authentication for seamless backend operations.
