PROFESSIONAL SUMMARY

- Java Full-Stack Developer with **over 4 years of experience** delivering secure, scalable, and high-performance applications, specializing in **Java (Spring Boot, Microservices)** and **modern front-end frameworks (Angular and ReactJS)** across banking, healthcare, and enterprise domains.
- Expertise in backend development with **Java 17/21, Spring Boot 3.x**, and **Microservices**; strong front-end proficiency in **Angular (v14/15)** and **ReactJS (JavaScript/TypeScript)**.
- Proficient in relational and NoSQL databases — **SQL (PostgreSQL, MySQL)** and **MongoDB**; built event-driven systems with **Kafka** and optimized data access with **Spring Data JPA/Hibernate**.
- Hands-on with **Cloud (AWS)**, **Docker**, and **Kubernetes (EKS)**; productionized deployments using **Argo CD**, **Jenkins**, and **GitHub Actions**.
- Experienced in testing and quality assurance with **JUnit5**, **Mockito**, **Rest Assured**, and **Testcontainers**; contributed to CI/CD automation, SonarQube gates, and secure pipelines.

CORE COMPETENCIES

Java 17/21 • Spring Boot 3 • Microservices • REST APIs • JSON/XML • React 18 • Angular 15 • Node.js • CI/CD • Jenkins • GitHub Actions • Maven • AWS • Docker • Kubernetes • PostgreSQL • MongoDB • Redis • NoSQL • Kafka • Automated Testing • JUnit5 • Mockito • Agile/Scrum

EDUCATION

Texas Tech University
Master of Science in Computer Science

Lubbock, TX
May 2025

EXPERIENCE

Java Full-Stack Developer
Citizens Bank

Jan 2025 – Sep 2025
Providence, RI

- Upgraded systems to **Java 21** and **Spring Boot 3.3**, enabling virtual threads (Loom) and WebFlux to enhance throughput by 35%.
- Developed **REST and GraphQL microservices** using **Spring Boot**, **OpenAPI 3**, and consumer-driven testing (Pact), cutting integration defects by 30%.
- Built high-throughput, multi-threaded microservices and implemented XML/JSON APIs for enterprise messaging workflows.
- Automated deployments via **GitHub Actions** and **Argo CD** on **Kubernetes EKS**, ensuring consistent CI/CD pipelines with vulnerability scanning.
- Optimized data access using **Redis** and **Caffeine caching**, reducing PostgreSQL load by 50%.
- Enhanced observability using **OpenTelemetry**, **Prometheus**, **Grafana**, and improved MTTR for production issues.

Java Full-Stack Engineer
GE HealthCare

Jan 2024 – Dec 2024
Chicago, IL

- Built secure **Spring Boot 3 REST APIs** during the Java 17 migration, integrating with PostgreSQL and MongoDB for analytics and flexible reporting.
- Implemented pagination, query tuning, and caching with **Redis**; added **MongoDB** to support flexible reporting modules.
- Developed reusable UI modules with **React 18**, **TypeScript**, and **Angular 14**, ensuring WCAG accessibility and optimized form validation.
- Introduced **Kafka** for real-time event streaming between systems, improving message delivery latency.
- Authored and maintained **OpenAPI 3** specs; used Swagger UI and client stubs to standardize APIs.
- Implemented **JUnit5**, **Mockito**, **Rest Assured**, and **Testcontainers** for integration testing, raising coverage above 90%.
- Contributed to CI/CD with **Jenkins**, Docker hardening, and HIPAA-compliant deployments to AWS EKS.

Software Engineer

Jul 2020 – Aug 2023

Tata Consultancy Services (TCS)

Hyderabad, India

- Developed CRUD-based **REST APIs** using **Spring Boot** with SQL optimization, pagination, and caching.
- Integrated **MongoDB** with MySQL for hybrid data storage in enterprise apps.
- Built UI components in **ReactJS (TypeScript, Redux Toolkit)** and improved application responsiveness and performance.
- Leveraged **Kafka** for asynchronous event-driven workflows, improving scalability.
- Wrote automated tests with **JUnit5, Mockito, Rest Assured**, and integrated pipelines with **SonarQube** and **JWT-based authentication**.
- Assisted in containerization with **Docker** and deployments on **AWS** (EC2, RDS, CloudWatch monitoring).

TECHNICAL SKILLS

Languages: Java, JavaScript/TypeScript, SQL, Python (Scripting)

Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Spring WebFlux, Spring Security, ReactJS, Angular, GraphQL, Microservices

Databases: PostgreSQL, MySQL, MongoDB, Redis

Messaging: Kafka, RabbitMQ

DevOps: Git, GitHub Actions, Jenkins, Docker, Kubernetes (EKS), Helm, Argo CD, AWS, Terraform

Testing: JUnit5, Mockito, Rest Assured, Testcontainers, Postman

Practices: Agile/Scrum, TDD, CI/CD Automation, Secure Software Development
