SUMMARY

Software Developer with over 5 years of extensive experience designing and deploying scalable applications using Java, Python, Spring Boot, and modern JavaScript frameworks. Adept at building RESTful APIs, automating workflows, and managing databases like MySQL, SQL Server, etc. Skilled in cloud deployment and CI/CD automation using Jenkins and Docker.

SKILLS

Programming Languages: Java, Python, R, SQL, PL/SQL, C, C++, C#, PHP

Frameworks: Spring (MVC, Boot, Security), Microservices, Hibernate, JPA, JSF, React, Redux, Vue.js, Node.js, Angular, Next.js, Express.js, GraphQL, Django

J2EE Technologies: Servlets, JSP, JSTL, JavaBeans, JDBC

Web Technologies: HTML, CSS, JavaScript, TypeScript, Webpack, Bootstrap, jQuery, Ajax, JSON, XML, Styled Components, Flask

API Integration: Facebook API, Instagram API, Twilio API, RESTful APIs

Cloud Technologies: AWS (VPC, EC2, S3, CloudFront, ELB, Redshift), Azure, GCP

Application Server: Apache Tomcat, IBM Web Sphere

Databases: MySQL, SQL Server, PostgreSQL, Oracle, SQLite, MongoDB, Firebase, DynamoDB, Memcached

Methodologies / IDEs: SDLC, Agile, Waterfall, NetBeans, IntelliJ IDEA, Visual Studio Code, Eclipse

Version Control / Other / Debugging Tools: Git, GitHub, GitLab, MS Excel, Maven, Gradle, Jira, Jenkins, Junit, JMeter, Chrome DevTools, Postman, Docker, CI/CD (Vercel), PyTorch

EXPERIENCE

FieldWorker (Social Work Case Management Platform), Remote | Software Developer **Feb 2023 - Present**

- Built and optimized React UI components for social work platform serving 3000+ case workers Remote
- Reduced EDI file processing time by 40% by developing custom parsers for 15MB+ .dat files containing up to 14,000 customer records from enterprise clients
- Improved initial page load times by implementing lazy loading and list virtualization to handle large datasets in React applications
- Collaborated with UI designers to implement real-time form validation, dynamic error messaging, and fluid modal animations using React and Tailwind CSS
- Enhanced FieldWorker Android application with push notifications, file upload capabilities, audio recording, and signature pad functionality using React Native
- Developed RESTful API endpoints using Node.js to ensure seamless client-server communication for case management workflows
- Mentored 2 software development interns across 2 terms, providing code reviews, technical guidance, and project planning support

FieldWorker (Social Work Case Management Platform), Remote | Software Developer Intern **Jun 2022 - Jan 2023**

- Eliminated external API dependency by internally generating EDI format .dat files from JSON objects, reducing third-party data exposure
- Reduced search page load times by 60% by implementing pagination and filters in React while optimizing PostgreSQL database queries
- Built JavaScript data ingestion system for CSV processing that validates data integrity, flags errors, and processes clean records for 3000+ users
- Increased API reliability by refactoring PostgreSQL queries and implementing comprehensive exception handling

Hexaware Technologies, India | Software Developer **Jan 2020 - Aug 2021**

- Developed responsive web applications using React.js and TypeScript, implementing reusable component libraries and ensuring cross-browser compatibility for enterprise client projects.
- Built RESTful APIs with Node.js and Express.js to support front-end features, handling authentication, data validation, and business logic for multi-tier applications.
- Contributed to the development of microservices architecture using Python and Django, working within a team to decompose monolithic applications into smaller, independently deployable services.
- Wrote and optimized SQL queries in PostgreSQL for reporting features and data-intensive operations, implementing indexing strategies to improve query performance.
- Participated in containerization efforts using Docker and assisted with AWS deployments (EC2, S3) to support application hosting and scalability requirements.
- Implemented automated testing for backend services using PyTest, writing unit and integration tests to catch bugs early in the development cycle.
- Used Git for version control and collaborated with team members through code reviews, following agile development practices and sprint-based delivery cycles.

EDUCATION

Master of Science in Computer Science | Stevens Institute of Technology, Hoboken, NJ

Aug 2021 - Dec 2022

Bachelor of Engineering in Computer Engineering | L.D. College of Engineering, Gujarat, India

Aug 2017 - May 2021
