

SIDDHARTHA ALAPATI

siddharthaalapatis@gmail.com | +1 (940) 629-9734 | Denton, TX | LinkedIn

Summary

Software Engineer with 3 years of experience in Java, specializing in client-centric applications using Spring Boot, Hibernate and Node.js for backend development, and React.js with Redux for front-end solutions. Proficient in HTML, CSS, and JavaScript, with hands-on experience in AWS and both Windows and Linux environments. Strong analytical skills and a solid foundation in data structures, adaptable to diverse work cultures and focused on delivering innovative solutions.

Technical Skills

Back-end Technologies: Java, Spring Boot, Spring Cloud, Microservices, WebFlux, Hibernate, J2EE, JDBC, Spring Security, JDK, Micronaut, Node.js, Express.js, Python, ASP.NET, Flask, MVC Framework, SOAP, RESTful APIs, Maven, Bash Script, GraphQL, gRPC, WebSockets, API Gateway, OpenAPI, Event-Driven

Front-end Technologies: React.js, Angular 17, TypeScript, Redux Toolkit, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Material-UI, AJAX

Database Technologies: MySQL, MongoDB, PostgreSQL, SQL Server, Oracle, Firebase, Cassandra

Tools and Technologies: Git, Docker, Kubernetes, Jenkins, Apache Tomcat, Nginx, Swagger, Postman, JUnit, Mockito, Log4j, JIRA, Gradle, OAuth, SonarQube, Selenium, Cypress, Postman

Cloud and DevOps: AWS (Lambda, ECS, EKS, API Gateway, S3, RDS, DynamoDB, Cloudformation), Microsoft Azure (AKS, Functions), Docker, Kubernetes, Helm, Terraform, ArgoCD, Jenkins, Prometheus, Grafana

PROFESSIONAL EXPERIENCE

Software Engineer, Dell Technologies

01/2025 - Present | USA

- Developed an AI-driven chatbot platform using Java, Spring Boot, and Microservices to automate customer support via Natural Language Processing (NLP), enhancing response time and reducing human intervention.
- Designed and integrated scalable RESTful APIs secured with Spring Security, OAuth2, and JWT, ensuring seamless communication between services and robust access control across the architecture.
- Built responsive, cross-platform front-end interfaces using HTML5, CSS3, JavaScript (ES6), and AJAX, delivering intuitive user experience and real-time interaction with backend services.
- Implemented PostgreSQL with Hibernate ORM for secure, ACID-compliant data persistence and optimized query performance, managing high volumes of structured conversational data.
- Deployed the platform on AWS using EC2, S3, and RDS, achieving 99.9% uptime and high availability while automating CI/CD pipelines with Jenkins, Docker, Kubernetes, and Maven to accelerate delivery cycles by 30%.

Software Engineer, Tech Mahindra

03/2021 – 07/2023 | Hyderabad, India

- Designed and developed a scalable Order Orchestration System using Java, J2EE (EJB, Servlets, JSP), Spring Boot, and Hibernate, ensuring high availability, robust transaction handling, and efficient business logic execution.
- Architected microservices-based solutions using Spring Cloud (Eureka, Config Server, API Gateway) to enable service discovery, load balancing, and centralized configuration, enhancing modularity and system resilience.
- Built and optimized RESTful APIs using Spring Boot and Spring MVC, facilitating seamless integration with frontend (JavaScript-based) applications and external systems while reducing response latency by 35%.
- Implemented robust data persistence using Hibernate and JPA with MySQL/PostgreSQL, streamlining ORM, reducing query execution time, and improving data consistency.
- Developed CI/CD pipelines using Jenkins, Maven, and Shell scripts to automate builds, testing, and deployment workflows, reducing deployment time by 40% and supporting Agile delivery.
- Leveraged AWS services including EC2, S3, RDS, Lambda, and API Gateway to build a cost-effective, cloud-native architecture with 92% uptime and serverless event-driven workflows.
- Ensured high code quality through unit and integration testing with JUnit and Mockito, achieving 95% test coverage and minimizing production defects; validated API endpoints and workflows using Postman.

Education

Master of Science, University of North Texas
Computer Science

08/2023 – 05/2025 | Denton, USA

Bachelor of Technology, JNTUH
Information Technology

06/2018 – 06/2022 | Hyderabad, India

Academic Projects

Student Portal Web Application, Java, HTML, CSS, MySQL

- Developed a basic web application for student registration and grade tracking.
- Designed frontend using HTML/CSS and implemented backend logic in Java.
- Handled database operations like insert, update, and search using SQL.
