## EDUCATION

### Northeastern University

Master of Science, Information Systems

Boston, MA

September 2022 – December 2024

## PROFESSIONAL EXPERIENCE

### PNC Financial Services

Software Engineer

New York, NY

February 2025 – Present

- Constructed robust React.js components with Redux state management, delivering seamless functionality across 8+ banking modules that serve 2M+ daily active users and drive core business operations
- Accelerated payment processing by implementing WebSocket-based real-time notifications integrated with RESTful APIs, cutting transaction confirmation delays by 20% and significantly improving customer satisfaction scores
- Fortified application accessibility through code-splitting, lazy loading, and WCAG 2.1 AA compliance, boosting performance by 35% while ensuring full assistive technology compatibility
- Drove a 30% increase in mobile user engagement by executing cross-team collaboration with design and AI specialists to deliver high-impact predictive financial widgets, maximizing value during critical peak-hour operations

### Intuit

Software Engineer Intern

San Francisco, CA

January 2024 – June 2024

- Established secure third-party integrations with banks and payment processors using Spring Security, OAuth 2.0, and JWT, eliminating manual re-authentication while increasing API throughput by 25% for seamless transactions
- Crafted intelligent React.js forms with conditional rendering and real-time validation for complex tax workflows, slashing submission errors by 20% while streamlining multi-scenario filing experiences
- Optimized high-volume Kafka consumer groups through custom deserializers and strategic partitioning, achieving 15% faster tax return processing during peak season while maintaining zero data loss across 3x traffic spikes
- Championed accessibility compliance by conducting comprehensive front-end audits and ensuring 100% adherence to IRS regulatory benchmarks for user input and authentication flows, protecting the company from compliance risks

### Cognizant

Java Full Stack Developer

Mumbai, India

April 2019 – August 2022

- Outlined a real-time healthcare alerting system with Kafka and Java Streams, triggering notifications when vitals crossed thresholds, reducing critical response time by 40%
- Assembled scalable Spring Boot backend services to process and visualize IoT vitals data, enabling medical teams to monitor patterns across 1000+ connected devices for enhanced patient oversight
- Refined database operations through composite indexing and query restructuring, boosting dashboard response speeds by 20% and improving clinical workflow efficiency
- Deployed secure API layers utilizing JWT authorization and OAuth 2.0 protocols, maintaining strict HIPAA compliance while safeguarding sensitive patient records
- Engaged across Agile development cycles with QA and DevOps teams, supporting JUnit test integration and CI/CD pipeline execution via Jenkins for AWS ECS deployments

## PROJECT

### Music Streaming Application

- Engineered a responsive React.js frontend styled with Tailwind CSS to ensure seamless playback
- Constructed services using Node.js and Express.js to manage playlist creation, audio streaming, and authentication
- Configured MongoDB for secure JWT-authenticated user sessions and playlist persistence across sessions

## SKILLS

**Backend:** Java, Spring Boot, Spring MVC, Spring Core, Hibernate, REST APIs, Node.js, Oracle PL/SQL

**Frontend:** Angular, React.js, Redux, HTML5, CSS3, Bootstrap, SASS, Tailwind CSS

**Databases:** MySQL, PostgreSQL, Oracle SQL, MongoDB

**Tools & Frameworks:** Git, Maven, Gradle, Jenkins, JIRA, Postman, Swagger, IntelliJ IDEA

**Testing:** JUnit, Mockito, Jest, React Testing Library, Selenium

**Cloud & DevOps:** AWS (EC2, S3, RDS), Docker, Kubernetes

**AI Coding Tools:** GitHub Copilot, Cursor, Tabnine, Sourcegraph Cody, Qodo (Codium)
