

Vitalii Berchikov

Software QA Automation Engineer | 747-254-2880 | Los Angeles, CA

vitaliibercvikov@gmail.com | [linkedin.com/in/vitalii-berchikov/](https://www.linkedin.com/in/vitalii-berchikov/)

Summary

QA Automation Engineer with 5+ years of experience in UI and API test automation using JavaScript, Playwright, Cypress, and Postman. Proven track record of reducing regression testing time by up to 40% through robust automated test suites. Skilled in identifying and resolving defects early in the development cycle, improving product quality and reducing user-reported issues. Experienced in Agile environments, collaborating cross-functionally to optimize test documentation and streamline QA processes. Proficient in tools like Jira, Zephyr, and TestRail for defect tracking and test management.

Technical Skills

- JavaScript, Node.js, Mocha, Playwright, Cypress, Selenium.
- REST API, Postman, Swagger, JSON.
- VS Code, Chrome DevTools, GitHub Actions, Figma
- Jira, Zephyr, TestLink, TestRail, Bugzilla, Confluence.
- Agile (Scrum, Kanban), Test Case Design, E2E Testing, Functional Testing, Regression, Black Box Testing.

Relevant Experience

DigitalVertex Enterprises | QA Automation Engineer | August 2022 - present | USA - Remote

- Design, develop, and maintain automated test suites using Playwright and JavaScript for UI and functional testing, reducing regression test cycles by 40% and improving the accuracy of test results.
- Automated regression testing for API by creating organized test collections in Postman, cutting regression test time.
- Optimized test cases by identifying and eliminating duplicates, achieving an 11% reduction in testing efforts.
- Perform API validation tests, checking HTTP statuses, headers, and response bodies to enhance backend quality.
- Develop and execute comprehensive test plans and scenarios, including functional and regression testing for UI components.
- Utilize Jira to document, prioritize, and track software defects, ensuring timely resolution and improved product reliability.
- Collaborate closely with development teams to identify and address defects early in the product life cycle, reducing critical issue resolution times.

Zume Pizza | Software QA Engineer | January 2020 - August 2022 | USA - Remote

- Identified, documented, and facilitated resolution of over 750+ bugs, reducing user-reported issues by 13%.
- Automated regression test suites using Cypress, reducing manual testing effort by 14 hours per release through automation.
- Collaborated with QA and development teams to enhance test documentation, streamline procedures, and improve overall team efficiency.
- Conducted API testing with Postman and Swagger, optimizing the performance of RESTful APIs.
- Collaborated closely with development teams to identify and address defects early in the product life cycle, reducing critical issue resolution times.

Education Master's Degree in Mechanical Engineering - TvSTU (2007-2013)
