SKILLS

Frontend: JavaScript | TypeScript | React.js (Hooks, Context API) | Blazor | Razor Pages | HTML/CSS | Bootstrap

Backend: C# | .NET (ASP.NET, Entity Framework) | Java | SQL | Node.js | LINQ | API development (REST)

Other: Azure DevOps Server | MSSQL | Git | CI/CD (Azure Pipelines) | SSRS | Postman | Jira

EXPERIENCE

Ropes & Gray LLP, Manhattan, New York

March 2022 - Present

Software Engineer | *Enterprise Applications*

- Led the UI/UX redesign of internal applications, reducing form completion times by 30% and improving user engagement.
- Designed and implemented a real-time office tracking system using C#, SQL, and Symmetry API, increasing employee office retention by 35% by monitoring office presence via badge swipes.
- Spearheaded the development of a centralized budgeting application in .NET, replacing a cumbersome SharePoint system; slashed budget reconciliation errors by 15% and improved reporting turnaround time by 2 days.
- Automated code line counting with a custom-built Node.js script, reducing third-party vendor costs for security assessments.
- Revamped legacy Microsoft Access database into .NET web application with SQL Server, slashing new user onboarding time by 60% and boosting operational efficiency by 35% with enhanced data accessibility.
- Built a Node.js-based automation tool to streamline the generation of controllers, services, and views, reducing manual coding effort by 40% and increasing developer productivity.

Sabre Industries, Alvarado, TX

January 2021 - February 2022

Software Engineer | *ERP Systems*

- Maintained and customized Epicor ERP solutions, SSRS reports, and C# applications, reducing manual data entry time by approximately 75% through automation.
- Developed and optimized internal .NET applications used by 50+ engineers and sales staff to design and price communication towers, ensuring compliance with strict engineering standards.
- Engineered a streamlined workflow for tower design pricing calculations using .NET applications; this boosted accuracy by 25% and cut processing time by 40%, enabling faster project turnaround.
- Transformed outdated codebases into modular, testable components, fixing the three biggest causes of system crashes and minimizing downtime by 99%, enhancing system reliability for tower design processes.
- Designed and maintained 15+ revenue and job tracking reports using MSSQL and SSRS, improving financial visibility for department leads.
- Resolved 10+ support tickets per week, troubleshooting and fixing bugs in critical business applications to maintain system stability.

Ethiopian Airlines, Addis Ababa, Ethiopia

May 2019 - August 2019

Application Developer Intern

- Spearheaded development of a new cross-platform Ethiopian Airlines Catering App (Android, iOS, Windows) to enhance the in-flight dining experience, improving usability for passengers and staff.
- Conceptualized and deployed cross-platform solutions using Xamarin and C#, enhancing application performance and decreasing user-reported bugs by 40% within three months.
- Enhanced the Ethiopian Airlines Crew App, implementing a new feature that increased click-through rate by 35% and conversion rate by 11% while improving the UI for returning crew members.

EDUCATION

Bachelor of Science in Computer Science, Manchester University, IN – August 2016 to December 2017

Bachelor of Science in Software Engineering, Minnesota State University Moorhead, MN – August 2018 to May 2020
