PROFESSIONAL SUMMARY

Results-driven Senior Software QA Analyst with 8+ years of experience in manual and automated testing across web, mobile, API, ETL, and Windows standalone applications. Skilled in functional, regression, integration, performance, and security testing across diverse domains, including banking, finance, ed-tech, and e-commerce. Expertise in designing test plans, developing test cases, and implementing automation frameworks using Selenium WebDriver, RestAssured, Cypress, TestNG, and JUnit. Proficient in CI/CD integration, defect tracking, and Agile methodologies, ensuring software quality, scalability, and reliability in fast-paced development environments.

SKILLS

- **Testing & Automation:** Manual Testing, Functional Testing, Regression Testing, End-to-End Testing, Automation Testing (Selenium WebDriver, TestNG, JUnit), Performance Testing (JMeter, LoadRunner).
- **Test Management & Documentation:** Test Planning, Test Case Design, Test Execution, Defect Reporting & Tracking, Test Strategy Development, Risk Assessment, Test Metrics, Test Coverage Analysis
- **API & ETL Testing:** REST/SOAP API Testing (Postman, Swagger, JSON), API Automation (RestAssured, Karate), Database Validation (SQL, MySQL), ETL Testing for data integrity and quality assurance.
- **Cloud & Mobile Testing:** Cloud Testing (Azure, AWS), Mobile Testing (Appium, Android Studio).
- **Frameworks & Tools:** Data-Driven Framework, Behavior-Driven Development (BDD, Cucumber), Keyword-Driven Framework, Hybrid Automation Framework.
- **Programming & Scripting:** Java, Python, SQL, MySQL, T24 (Temenos Transact), HTML, XML, CSS, JavaScript.
- **CI/CD & DevOps:** CI/CD Integration (Jenkins, Azure Pipelines), Docker, Kubernetes, Maven, GitHub, Build Automation.
- **Project Management & Collaboration:** JIRA, Confluence, Zephyr scale, Bugzilla, TestRail, Qmetry, Test Complete.
- **Performance & Accessibility Testing:** Load Testing, Performance Tuning, Accessibility Compliance Testing.
- **Agile & SDLC Expertise:** Agile (Scrum, Kanban), Test-Driven Development (TDD), Behavior-Driven Development (BDD), SDLC, STLC.
- **Domain Expertise:** Educational Technology, Digital Classrooms, e-Commerce, Core Banking (Temenos T24), Payments (SWIFT, SEPA, ACH, Bulk Payments, Trade Finance, Wire Transfers), Financial Compliance.
- **Soft Skills:** Analytical Thinking, Problem Solving, Critical Thinking, Cross-functional Collaboration, Leadership, Strong Communication, Customer-Centric Approach, Quality Focus.

EDUCATION

- Masters in software engineering | Villanova University | 2023 – 2024
- Bachelors in computer science | V.K.R, V.N.B & A.G.K College of Engineering | 2011 – 2015

RELEVANT EXPERIENCE

Digital Aid Seattle – Remote, USA

February 2025 to Present

❖ QA Test Engineer

- Designed, developed, and executed comprehensive test plans, test cases, and test scripts for both functional and non-functional testing, ensuring thorough coverage and early identification of critical issues within the development lifecycle.

- Conducted both manual and automated testing of web and mobile applications, contributing to the delivery of high-quality software.
- Collaborated closely with cross-functional teams to understand project requirements and provide actionable feedback on product functionality.
- Identified, documented, and tracked defects using issue tracking tools such as JIRA and Airtable, ensuring clear communication of issues and progress.
- Actively participated in daily stand-up meetings and sprint planning to ensure alignment of testing efforts with development timelines.
- Performed regression testing to validate that existing functionality remains intact after code changes.
- Contributed to the development and maintenance of test automation frameworks using Selenium and Cypress to streamline testing processes.
- Supported the continuous improvement of testing methodologies, processes, and practices to enhance overall software quality.
- Conducted API testing using the BDD framework with tools like Cucumber and RestAssured, ensuring proper validation of API endpoints and seamless integration between system components.
- Developed and executed feature files, step definitions, and scenarios in Gherkin syntax to enhance test clarity and maintainability in API automation testing.
- Supported the continuous improvement of testing methodologies, processes, and practices to enhance overall software quality.
- Assisted in project planning by defining key testing milestones, deliverables, and timelines, ensuring effective resource allocation.
- Coordinated with project managers to ensure that testing efforts were aligned with overall project schedules.
- Participated in risk assessments and contributed to mitigation strategies to address potential project challenges.
- Contributed to the creation and maintenance of project documentation, including testing methodologies, processes, and best practices.
- Facilitated communication between stakeholders to ensure alignment and clarity regarding project objectives and testing outcomes.

Villanova University – Villanova, PA

March 2024 to December 2024

❖ **Independent Project – QA Automation & API Testing Framework Development**

- Designed and developed a comprehensive QA automation and API testing framework from scratch, ensuring robust test coverage for web applications.
- Built and executed automated test scripts using Selenium WebDriver, RestAssured, and TestNG to validate application functionality and data integrity.
- Independently conducted manual and automated API testing using Postman, Swagger, and RestAssured, verifying endpoint responses, performance, and security.
- Implemented best practices in API design and testing, including input validation, error handling, authentication, and idempotency, enhancing system reliability.
- Integrated the testing framework into a CI/CD pipeline using GitHub Actions, automating test execution and ensuring continuous testing with every code change.
- Designed and executed database validation and ETL testing using SQL and MySQL, ensuring accurate data processing across application layers.
- Led the development of functional, regression, and performance test cases, identifying critical defects and improving overall system stability.
- Configured and optimized test environments, ensuring seamless integration between automated testing and the deployment pipeline.
- Documented test strategies, execution results, and defect reports using JIRA, maintaining clear and structured testing documentation.

- Managed the entire project lifecycle, from initial planning to execution, following Agile principles to iteratively refine and enhance the testing framework.

Temenos – Hyderabad, India

April 2020 to May 2023

❖ **Associate Lead Product Engineer**

- Developed and executed 200+ automated test scripts for complex web applications using Selenium WebDriver, TestNG, and JUnit, improving regression testing efficiency by 35%.
- Designed and maintained comprehensive test plans and test cases based on functional and technical requirements.
- Led API testing (SOAP and REST), validating XML/JSON responses using Postman and custom scripts, improving data validation accuracy.
- Created and executed automated API test scripts for RESTful web services, ensuring seamless integration across microservices.
- Conducted thorough database testing and data validation, ensuring data integrity across various applications using Temenos T24 core banking in-house database tool.
- Leveraged Temenos T24 functionalities to enhance the testing process, ensuring compliance with financial regulations and best practices in the banking domain.
- Demonstrated strong project management skills by leading cross-functional teams in the execution of testing strategies, ensuring timely delivery of high-quality software solutions.
- Implemented performance testing strategies using JMeter, identifying and resolving bottlenecks, improving system scalability by 20%.
- Developed test code in Java language using Eclipse and TestNG framework
- Conducted thorough defect tracking and root cause analysis using JIRA, ensuring 95% resolution within SLA.
- Integrated automated tests into CI/CD pipelines (Jenkins, Azure DevOps), reducing deployment times by 40%.
- Reviewed product requirements and technical design documents to create detailed and comprehensive test strategies and execution plans.

Achievements

- Recognized with GEM Award for delivering innovative banking solutions that increased client retention by 25%.
- Received Spot Award for exceptional test coverage and timely project deliveries.

Erudex Pvt Ltd – Hyderabad, India

May 2015 to April 2020

❖ **Software Test Engineer**

- Designed and executed comprehensive test plans and test cases for web and mobile applications, ensuring 100% functional coverage.
- Led defect identification, tracking, and resolution using JIRA, reducing defect leakage to less than 5% in production.
- Developed 150+ automated test scripts using Selenium WebDriver, improving test execution speed and accuracy by 35%.
- Involved in Configured Maven for JAVA automation projects and developed Maven Project Using Page Object Model (POM).
- Conducted API testing using Swagger and Postman, ensuring seamless integration across student management systems.
- Performed database testing and data validation with MySQL and SQL Server, ensuring data integrity across educational platforms.

- Conducted ETL testing for student data management systems, validating data transformation and load processes to ensure accurate data representation.
- Executed load and performance testing using AWS and JMeter, simulating 2,000+ concurrent users for system reliability optimization.
- Ensured accessibility compliance according to WCAG guidelines, improving usability for students with diverse needs.

Achievements

- Spearheaded the successful implementation of digital classroom solutions in over 300 schools, improving interactive learning environments and earning a Team Innovation Award.
- Recognized with the Best Employee Award for developing high-performance, scalable exam management modules that streamlined online examination processes for education clients.

CERTIFICATIONS

- **ISTQB – Certified Tester Foundation Level (CTFL)**

PROJECTS

❖ End-to-End Automation Framework

- Built a scalable automation framework using Selenium, TestNG, and custom reusable libraries.
- Integrated test execution with Jenkins, enabling automated nightly builds and real-time reporting.
- Enhanced test reporting with Allure, providing detailed insights for stakeholders.

❖ API Testing Framework Development

- Designed and implemented RESTful APIs using Express.js, managing CRUD operations for products, orders, and users in an e-commerce application.
- Utilized JSON files for data persistence, showcasing expertise in file-based storage and data management.
- Developed and executed comprehensive unit tests with RestAssured and TestNG, ensuring API functionality and data integrity.
- Conducted manual API testing using Postman, verifying endpoints and synchronizing test cases with application behavior.
- Applied best practices in API design, including input validation, error handling, and idempotency, ensuring reliable operations.
- Integrated the testing framework into a CI/CD pipeline using GitHub Actions, automating testing upon every code change.

❖ ETL and Data Lake Integration for Employee Payroll Management System

- Developed and tested ETL processes to extract, transform, and load employee payroll data into a centralized data lake for storage and analysis, streamlining data accessibility for reporting.
- Designed data pipelines to automate the extraction of payroll data from various sources, enhancing data refresh rates and minimizing manual intervention.
- Performed data validation and quality checks to ensure payroll records were accurate and properly synchronized within the data lake environment, resulting in 100% compliance with data quality standards.
- Conducted end-to-end data testing, including database testing, integration testing, and verification of data integrity across multiple platforms, ensuring consistency and reliability of payroll information.
- Utilized advanced SQL queries to validate large datasets, ensuring the integrity of payroll calculations and reports, while optimizing query performance for improved efficiency.
- Collaborated with stakeholders to gather requirements and design effective data models, ensuring alignment with business needs and enhancing reporting capabilities.
