Professional Overview

IBM, HOUSTON, TX

2021 to Present

Project Manager Consultant – Rockwell Automation, AT&T, Neudesic, ExxonMobil

Project Manager and Consultant on multiple projects with business applications ranging from global networks transformation to Oil and Gas asset divestitures while working at IBM.

- Worked with Rockwell Automation PMO in managing company worldwide network upgrade and transformation project. Network transformation project involved managing worldwide installations at over 150 Rockwell Automation sites with business functions including corporate, manufacturing, design, sales, and distribution.
- Performed duties as Scrum Master for AT&T Business Center application within program which involved multiple application teams to complete outwardly facing system improvements with a projected 10% revenue increase for AT&T. Scheduled and lead all scrum ceremonies for team with 12 - 16 resources utilizing Azure DevOps platform. Participated in program level SAFe events for the coordination and managing of releasing planning as well as for the identification of application team dependencies.
- Project Manager for the IBM asset acquisition (Neudesic) IT applications certification. These certifications include security, privacy, and data integrity for IT applications which will remain in use until the estimated 18-month Neudesic acquisition process is completed.
- Assumed role as project managing data lead working with ExxonMobil for 3 divestitures or asset sales. Responsible for managing the segregation of data as defined by ExxonMobil and buyer(s) agreed upon requirements data from 4 SAP modules (Finance, Order to Cash, Procure to Pay and Plant Maintenance).

MI-GSO | PCUBED, HOUSTON, TX

2019 to 2021

Senior Project Manager Consultant – Phillips 66 (Oil & Gas)

Managed 3 projects for Phillips 66 Industrial Control Systems (ICS) group to address IT and Operational Technology (OT) network health, inventory, and vulnerability management. These projects included the installation of 2 complementary cyber solutions to improve the network cybersecurity and asset management for P66 globally at 1 central command, 13 refineries, 8 midstream, and 2 SCADA (Supervisory Control and Data Acquisition) locations. These projects were budgeted at over \$3M and facilitated a local and centralized view of network asset health as well as threat detection at 24 sites.

- Instrumental in continuous improvement on all facets of 3 projects with responsibilities including resourcing, forecasting, and executive presentations, as well as the standard project management duties.

AMERICAN INTERNATIONAL GROUP (AIG), HOUSTON, TX

2014 to 2019

Senior Project Manager – Retirement Services

Directed 3 projects for a \$25M program; program consisted of 20 projects focusing on enabling AIG upward mobility into larger markets and optimizing internally hosted external website and mobile applications for improved retirement services experience accessed by 3K+ clients and 3M enrolled participants. Utilized AGILE and Scrum methodologies during development phase. Coordinated integrations and process improvements while managing multiple project teams, gathered resources from internal and external vendors, and orchestrated scrum ceremonies. Performed meetings, created project artifacts, developed and presented executive presentations, and delivered project status for duration, scope, and financials.

Professional Overview (Continued)

- Recipient of company-wide Galaxy Award for exercising exemplary performance and completion of three highly visible projects within major program.
- Obtained recognition from senior leadership and colleagues for CSM certification and success of initial projects incorporating AGILE methodology into existing PMO processes.

SOGETI, HOUSTON, TX
