

Sujith Kumar Aravapalli

Java Full Stack Developer | Software Engineer
sujitharavapalli@gmail.com | +1 (913) 374-9252 | [LinkedIn](#)

SUMMARY

Full Stack Java Developer with 4+ years of experience architecting and delivering high-performance, cloud-native applications using Java, Spring Boot, React, and Angular. Adept at designing scalable microservices, RESTful APIs, and integrating complex front-end interfaces with secure back-end systems. Leveraging AWS and Azure for deployment automation, CI/CD orchestration, and performance optimization. Expertise in database design (SQL & NoSQL), containerization with Docker/Kubernetes, and Agile delivery practices. Recognized for translating business needs into maintainable software solutions that enhance system reliability, scalability, and user experience.

SKILLS

Programming & Frameworks: Java, J2EE, Spring Boot, Spring MVC, Spring Cloud, Spring Security, Hibernate, JPA, RESTful APIs, SQL, Microservices, Node.js
Front-End Development: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Angular, Redux, Bootstrap, Material UI, jQuery
Database Management: MySQL, PostgreSQL, Oracle, MongoDB, Redis, Cassandra, SQL Server, Query Optimization, Stored Procedures, Data Modeling
Cloud & DevOps: AWS (EC2, S3, RDS, Lambda), Azure (App Services, Blob Storage, DevOps Pipelines), Docker, Kubernetes, Jenkins, GitLab CI/CD, Terraform, Ansible
Architecture & Design: Object-Oriented Design, Design Patterns (MVC, Factory, Singleton, Observer), API Design, SOA, Event-Driven Architecture, TDD, BDD
Security & Performance: JWT/OAuth2, RBAC, OWASP Practices, Input Validation, Application Profiling, Performance Tuning
Tools & Collaboration: Git, Bitbucket, IntelliJ IDEA, Eclipse, VS Code, Postman, Swagger, JIRA, Confluence
Development Methodologies: Agile, Scrum, Kanban, CI/CD Automation, Code Reviews, Pair Programming
Soft Skills: Problem Solving, Debugging, System Design Thinking, Cross-Functional Collaboration, Communication, Stakeholder Management

EXPERIENCE

JPMorgan Chase & Co. | USA Dec 2024 – Present
Java Full Stack Developer

Architected 5+ microservices using Java, Spring Boot, and AWS, elevating transaction throughput by 28% and optimizing performance for enterprise-scale financial operations across multiple distributed systems.
Engineered secure REST APIs handling over 250K transactions daily, delivering zero downtime during cross-system integrations and improving real-time transaction traceability for compliance auditing teams.
Refined React.js dashboards, cutting data retrieval latency from 4s to 1.5s and improving analysis accuracy for internal auditors monitoring live transaction anomalies.
Orchestrated CI/CD automation via Jenkins, Docker, and Kubernetes, accelerating deployment frequency by 45% and fully eradicating rollback incidents across multi-environment production pipelines.
Developed AWS Lambda-based fraud detection modules generating sub-two-second alerts for unusual patterns, strengthening fraud prevention and enhancing transaction monitoring efficiency organization-wide.
Optimized SQL queries in PostgreSQL, reducing execution time by 35% and improving the accuracy of daily compliance reports for high-volume financial datasets exceeding 10M records.
Implemented granular RBAC frameworks, aligning user access protocols with stringent banking standards and maintaining zero policy violations during four consecutive audit cycles.
Led Agile sprint ceremonies for a 7-member cross-functional team, completing 100% of planned deliverables on schedule while reducing sprint rollover tasks by 22% quarter-over-quarter.

Deloitte | India Jun 2022 – May 2023
Java Full Stack Developer

Developed and deployed 12+ microservices using Java and Spring Boot, sustaining 99.9% uptime for a tax compliance platform serving over 15K enterprise clients across multiple geographies.
Enhanced backend performance by 37% through asynchronous APIs, SQL indexing, and optimized query execution, significantly improving system scalability under heavy multi-client tax data loads.
Constructed 20+ modular React.js components for payroll dashboards, improving usability scores by 45% and cutting employee support requests for manual payroll queries.
Automated document workflows using AWS Lambda and S3, processing 30K+ monthly files and reducing manual intervention time by 60%, ensuring timely submissions across all enterprise clients.
Containerized services with Docker and Kubernetes, achieving 75% faster release cycles and eliminating version mismatches across QA, staging, and production environments.
Increased test coverage to 85% using JUnit and Mockito, identifying 30+ critical defects early, thereby reducing production-level bugs by 40% per release.
Refactored 8K+ lines of legacy Java code, improving maintainability from grade C to A in SonarQube and reducing duplication by 28% through structured code modularization.

Mphasis | India Apr 2020 – May 2022
Software Engineer Associate

Delivered and launched 6 enterprise-scale web modules using Java, Spring MVC, and React.js, serving 50K+ business users and improving B2B transaction reliability across regional client systems.
Implemented automated test pipelines using JUnit and Mockito, achieving 95% code coverage and decreasing post-deployment defect rates by 40% through early detection and regression control.
Integrated AWS S3 for document storage, managing over 10K files monthly with improved governance, encryption standards, and data access latency reduction by 32%.
Streamlined regression testing within CI/CD pipelines, cutting QA verification effort by 30% and accelerating release validation across multiple client projects.
Coordinated Agile backlog grooming for 10+ concurrent deliverables, completing all planned sprints on time and reducing scope changes by 25% through improved stakeholder alignment.
Resolved 200+ production incidents, shortening mean time to resolution by 65% and boosting client satisfaction scores from 7.5 to 9.2/10 through proactive postmortem analysis.

EDUCATION

Master of Computer Science Aug 2023 – May 2025
University Of Central Missouri, Lees summit, Missouri
Bachelor of Computer Science Jul 2018 – May 2022
Sathyabama Institute of Science and Technology, Chennai
