PROFESSIONAL SUMMARY

Experienced and innovative Full-Stack Developer with over 4 years of expertise in **designing scalable applications, developing RESTful APIs, and building responsive user interfaces**. Proficient in **Java, Python, Node.js, React.js, and Angular**, with a strong foundation in **DevOps tools** like **Terraform, Docker, and Kubernetes**. Adept at leveraging modern **cloud platforms** like **AWS and Azure** to deliver high-performing and secure applications. While deeply rooted in full-stack development, incorporates **AI-driven innovation** to enhance functionality and improve user experiences. Passionate about fostering collaboration, mentoring teams, and driving efficiency in Agile environments.

TECHNICAL SKILLS

- **Languages:** C#, Python, Java, TypeScript, JavaScript, SQL, HTML5, CSS
- **Backend Technologies:** ASP.NET ⚡ Core, Django, REST APIs, GraphQL, Spring Boot
- **Frontend Frameworks:** Angular, React.js, Node.js, jQuery
- **Cloud Platforms:** Azure, AWS (Lambda, EC2, S3)
- **AI/ML Tools:** TensorFlow, PyTorch, Hugging Face Transformers, Scikit-learn, SpaCy
- **DevOps & Automation:** Docker, Kubernetes, Terraform, Jenkins, Prometheus, Grafana
- **Databases:** Microsoft SQL Server, PostgreSQL, MySQL, MongoDB
- **Certifications & Tools:** AWS Certified Solutions Architect, TensorFlow Developer | Git, GitHub, Azure DevOps, JIRA, Postman
- **Methodologies:** Agile, Scrum
- **Additional Expertise:** Incorporating **AI agents** and integrating modern **AI APIs** into full-stack applications.

PROFESSIONAL EXPERIENCE

Software Engineer II, JPMorganChase

Aug 2023 – present

- Designed and deployed **cloud-native microservices** using **C#** and **.NET Core**, improving scalability and performance for critical financial applications.
- Automated infrastructure provisioning on **Azure** using **Terraform**, reducing manual tasks by **70%** and ensuring compliance with DevOps best practices.
- Built and optimized **RESTful APIs**, improving data exchange efficiency between distributed systems and cutting backend latency by **25%**.
- Collaborated with UX designers to develop **Angular-based frontends**, enhancing user engagement and reducing page load times by **30%**.
- Spearheaded **CI/CD pipeline integration** using **Jenkins**, accelerating release cycles and reducing deployment errors by **50%**.
- Led the development of AI-driven models using **TensorFlow** for real-time transaction anomaly detection, increasing fraud detection accuracy by **35%**.
- Actively contributed to Agile sprint planning and fostered collaboration between development, QA, and product teams.

Software Engineer I, Cognizant

Aug 2020 – Jul 2022

- Developed and maintained **.NET Core Web APIs** for HR technology applications, enabling secure payment workflows with **OAuth 2.0** and **JWT**.
- Migrated on-premise systems to **AWS**, reducing database migration times by **70%** and enhancing system scalability during high traffic periods.
- Automated resume parsing with **Hugging Face Transformers**, improving candidate processing speeds by **40%** and saving operational costs.
- Designed responsive UI components with **React.js** and **HTML/CSS**, eliminating frontend bottlenecks and improving performance.
- Enhanced system observability by integrating **Prometheus** and **Grafana**, reducing issue resolution times by **35%** and enabling proactive monitoring.
- Mentored junior developers in the adoption of Agile practices and modern tools, boosting team productivity and collaboration.

Software Engineer Intern, Cognizant

Feb 2020 – Jul 2020

- Designed and implemented **RESTful APIs** using **C#** and **ASP.NET ⚡ Core**, supporting over **10,000 global users** with secure, reliable access.
- Optimized full-stack web applications with **React.js** and **Node.js**, reducing page load times by **30%** through asynchronous programming.
- Automated database maintenance tasks with **Python**, saving **20%** of engineering time on manual processes.
- Built lightweight real-time messaging services with **Django Channels** and **Redis**, reducing latency and improving user notification systems.
- Facilitated cross-functional team collaboration using **Git workflows**, ensuring seamless version control and code reviews.

PROJECTS

Cloud-Based Auto-Scaling System

- Built an auto-scaling solution using **AWS** and **Terraform**, dynamically allocating resources during peak usage, reducing downtime by **25%**, and optimizing infrastructure costs.
- Designed an admin dashboard in **React.js** to monitor server health and usage in real-time, integrated with a **Node.js backend** for seamless data communication via **MongoDB**.

Customer Service Chatbot

- Developed an **AI-powered chatbot** using the **OpenAI API**, delivering real-time responses and reducing customer query resolution times by **50%**.
- Designed a secure **Angular-based interface**, ensuring compatibility across devices, while integrating **OAuth 2.0** for user authentication and data protection.

EDUCATION

Masters in Information Technology, *University of Central Missouri*

Lee's Summit, United States

Relevant Courses: Cloud Technologies, AI and Machine Learning, Distributed Systems, Virtualization Technologies

B.Tech in Information Technology, *Osmania University*

Hyderabad, India

Relevant Courses: Data Structures, Design and Analysis of Algorithms, Operating Systems, OOP using Java
