

Sures Khatri

Data Analyst

Email: khatrisures5@gmail.com | **Phone:** 469-515-0135 | **Location:** Euless, TX 76039

Applicant Information

Citizenship Status: U.S. Citizen

Veteran's Status: No

Security Clearance: Public Trust (Active)

Professional Summary

- Over 8+ years of experience in data engineering, analytics, and business intelligence, delivering data-driven solutions. Proficient with tools such as AWS Redis, GCP BigQuery, AWS Quicksight, GCP Looker, Power BI, SQL Server, SSIS, and SSRS.
 - Skilled in AWS services, including AWS S3, AWS Lambda, and AWS Glue, with expertise in designing and managing scalable ETL pipelines, data lakes, and distributed computing environments to handle large volumes of data.
 - Extensive experience in AWS Redis, optimizing distributed caching for improved system performance through low-latency and high-throughput data storage solutions.
 - Proficient in building interactive dashboards and real-time reports using AWS Quicksight and Power BI, enabling business stakeholders to make informed decisions through actionable data visualizations.
 - Strong expertise in SQL Server and T-SQL, including database design, optimization, and advanced query development. Skilled in performance tuning, indexing strategies, and database partitioning for enhanced data retrieval.
 - Advanced expertise in SSIS, developing complex ETL workflows, automating data integration from diverse sources (e.g., Excel, CSV, databases, APIs), and ensuring data quality through data validation, cleansing, and aggregation transformations.
 - Solid experience in SQL Server Reporting Services (SSRS), creating custom reports and automated reporting solutions for operational and financial reporting.
 - Knowledgeable in NoSQL databases such as MongoDB and Cassandra, with experience in data storage for unstructured and semi-structured data.
 - Expertise in Git and CI/CD pipelines for version control, code deployment, and automation using tools like Jenkins, ensuring efficient and reliable data workflows.
-

Skills Summary

- **Cloud Platforms:** AWS (S3, Lambda, Glue, Redshift, ElastiCache), GCP (BigQuery, Dataflow)

- **Databases:** SQL Server (2016/2019), MySQL, PostgreSQL, MongoDB, Cassandra, Azure SQL, Oracle
 - **ETL Tools:** SSIS, AWS Glue, GCP Dataflow
 - **BI Reporting:** Power BI, AWS Quicksight, Looker, SSRS
 - **Programming/Scripting:** T-SQL, PL-SQL, C#, Python
 - **Performance Optimization:** Query tuning, indexing, data caching
 - **Version Control & CI/CD:** Git, Jenkins, AWS CodePipeline
 - **Data Warehousing:** AWS Redshift, GCP BigQuery
 - **SQL Server Tools:** SSMS, SQL Profiler, Query Analyzer, DTA, Enterprise Manager, Activity Monitor, Index Tuning Wizard, SQL Trace tools, SQL Agent, Execution Plan
-

Education

Bachelor of Education

Tribhuvan University, 2010

Professional Experience

Database Developer

United States Department of Agriculture — Washington, D.C.

April 2023 – Present | Contractor | 40 Hours/Week

- Design and develop complex databases using AWS RDS (SQL Server 2016/2019) to support various applications and business needs in a cloud environment.
- Create interactive dashboards using AWS Quicksight with data sourced from CSV files.
- Design efficient data models and database schemas, leveraging AWS services such as AWS Glue for data integration and AWS Redshift for scalable data warehousing solutions.
- Develop advanced queries, stored procedures, views, functions, and triggers using T-SQL in AWS RDS for SQL Server.
- Monitor and optimize database performance using AWS CloudWatch and AWS Trusted Advisor for best practices and minimal downtime.
- Conduct query optimization and index tuning, utilizing AWS ElastiCache (Redis) for in-memory caching to improve database performance.
- Collaborate with cross-functional teams to meet business goals, integrating data across AWS services such as S3 and Lambda.
- Automate routine database tasks such as backups, indexing, and monitoring, utilizing AWS Backup and AWS RDS maintenance tools.
- Work with DevOps teams to implement CI/CD pipelines using AWS CodePipeline, AWS CodeBuild, and Amazon RDS for automated deployments.

- Create and maintain technical documentation for cloud-based database systems, ensuring alignment with SQL Server and AWS best practices.

Environment: AWS RDS (SQL Server 2016/2019), AWS Glue, AWS Redshift, AWS ElastiCache (Redis), AWS Lambda, AWS Cloud9, Visual Studio 2019/2022, T-SQL, MS Excel, Jira, Azure DevOps.

MS SQL/SSIS/SSRS Developer

TD Bank — Dallas, TX

July 2020 – March 2023 | Full-Time | 40 Hours/Week

- Participated in all phases of the System Development Life Cycle (SDLC) of projects, ensuring seamless integration of data engineering and business intelligence tools.
- Designed and developed data integrity solutions using GCP BigQuery SQL scripts and Google Dataflow to validate and clean data.
- Developed ETL pipelines using Google Cloud Functions and Cloud Composer, automating processes based on business needs.
- Wrote and optimized BigQuery SQL queries and developed stored procedures for efficient data processing.
- Created Power BI reports and Looker dashboards to provide valuable insights into business performance.
- Designed and tested ETL packages (unit, integration, and regression) using SSIS and Dataflow, enabling seamless data integration.
- Developed reports using Power BI, Looker, and SSRS, implementing dynamic filters and drill-down features.
- Worked on the full lifecycle of ETL software development, including analysis, design, development, documentation, and unit testing for projects using SQL Server Integration Services (SSIS) and GCP Dataflow.
- Created interactive Power BI reports and dynamic dashboards in Looker based on client requirements, providing valuable insights into business performance.
- Deployed Power BI and Looker reports to cloud environments, troubleshooting errors and ensuring smooth report execution.

Environment: GCP BigQuery, Power BI, Looker, Google Cloud Dataflow, SQL Server 2016, SSIS, SSRS, T-SQL, MDX, MS Excel, Visual Studio 2017.

SQL/ETL Developer

Inova Health — Falls Church, VA

October 2018 – June 2020 | Contractor | 40 Hours/Week

- Worked on data migration strategy from MS SQL Server 2012 to MS SQL Server 2014, ensuring seamless data transfer and integrity.

- Designed and developed ETL processes in SSIS and wrote stored procedures in SQL to automate data load and transformation.
- Participated in dimensional modeling and the development of data warehouse reports.
- Developed custom reports using SSRS, including parameterized, drill-down, and cascading reports.
- Monitored performance and optimized SQL queries using SQL Profiler and Index Tuning Wizard.
- Deployed SSRS reports across various environments and scheduled report subscriptions for regular updates.

Environment: MS SQL Server 2012/2014, SSRS, SSIS, Visual Studio 2008, T-SQL, MS Excel, MS Access.

Jr. SQL Developer

Winco Foods — Boise, ID

January 2017 – September 2018 | Contractor | 40 Hours/Week

- Assisted in database schema design and the creation of tables, indexes, and relationships for application development.
- Developed and maintained SQL queries, stored procedures, and functions for data retrieval and manipulation.
- Supported data migration efforts by writing and executing scripts to transfer data between legacy systems and new databases.
- Worked with senior developers to resolve database issues, including performance and data integrity challenges.
- Created reports and data visualizations using SQL and reporting tools to provide insights for decision-making.

Environment: SQL Server 2012, MS SQL Integration Services, SSRS, T-SQL, MDX, MS Excel.

Key Accomplishments

- **ETL Pipeline Optimization:** Developed ETL processes using AWS Glue and SQL Server, reducing data processing time by 25%.
- **Database Performance:** Enhanced database query performance using AWS ElastiCache and SQL indexing, improving response time by 20%.
- **Automated Report Deployment:** Implemented CI/CD pipelines in AWS and Azure DevOps, reducing manual intervention in deployments by 30%.
- **Business Intelligence Solutions:** Delivered real-time reporting using Power BI, AWS Quicksight, and Looker, streamlining business decision-making.
