Professional Summary

- 6+ Years of professional experience in all phases of software development life cycle including **requirements analysis, Applications design, Development, Integration, Installation, Implementation, Testing of various client/server and web applications.**
- Strong as a Web Developer in developing web applications using **HTML, CSS, JavaScript, REST, REST API, JSON, Angular JS, React.js, Redux, and Ajax.**
- Extensively worked on UI Frameworks such as **React JS, Angular 2/4/6.**
- Extensively used **ES6 or ES2015** syntax and getting familiar with newer versions of **ECMA script (ESNext).**
- Extensive Knowledge in developing single-page applications (SPAs) using various JavaScript frameworks like **angular.js and bootstrap.**
- Proficient in **MVC** design pattern and Test-Driven Development (**TDD**).
- Expertise in maintaining websites, software and understanding and modifying existing code.
- Experience in all phase of SDLC like Requirement Analysis, Implementation and Maintenance, and extensive experience with **Agile** and **SCRUM**.
- Designed the table less web applications using CSS and with the help of tags as per W3C standards.
- Mastery in Python tools including NumPy, Requests, BeautifulSoup adept at environment management with **venv, pipenv, conda.**
- Expertise in analyzing the DOM Layout **DOM** and **DOM Functions**, Java Script functions, Cascading Styles across cross-browser using **Fire Bug, IE and chrome developer tools.**
- Extensive experience in using **IDEs** such as **Notepad++, VS Code, Eclipse** and **NetBeans tools.**
- Having good Knowledge on version controls such as **GitLab, SVN and GitHub.**
- Experience in creating test suites using **jasmine** and worked on tools like **Grunt.**
- Expertise in using application servers such as **Web Logic, WebSphere, and Apache Tomcat.**
- Highly motivated, reliable analytical **problem solving** and **troubleshooting** with strong attention to detail.
- Demonstrated ability to complete projects in deadline-oriented environments.
- Capable of quickly learning and delivering solutions as an individual and as part of a team.
- Possess good team-management and leadership qualities.
- Having Strong written and oral **communication skills.**
- Experience managing daily communication with an offshore development team.
- Excellent analytical and communication skills with capability to handle new technologies
- Team player, Pair programming, experience working with multiple teams and ability to work on new technologies in a relatively shorter time.
- Ability to work well under strict time limit and without direct supervision Aptitude and willingness to learn and implement unknown technologies.

Technical Skills

JavaScript Libraries	AngularJS, Angular 2/4/6, React JS, Bootstrap, UI-Bootstrap.
Web Technologies	HTML/HTML5, CSS/CSS3, XML, JavaScript, AJAX, jQuery, JSON, GraphQL API's
IDE's and Tools	Eclipse, Sublime text, Visual studio code, Firebug, Developer Tools
Debugging Tools	Firebug, Bugzilla, (internet explorer)
Operating Systems	Windows XP/Vista/7/8, Linux, Unix, MAC OS X
Continuous Integration Tools	NPM, Jenkins, Jira, Splunk
Code Version Tools	Git, SVN.

Education

Bachelor of Technology in Computer Science.

Professional Experience

Client: Independence Blue Cross
Title: Full Stack Developer

Oct 2023 – Present.

Description: OPUS application is a Cingular wireless system that enables store customer service employees to effectively active phone, assist customers with their mobile phone accounts, and perform point-of-sale (POS) activities. This application primarily used in Cingular wireless retail stores. Within the application, can perform customer service, Activations, POS, Inventory functions, Administration.

Responsibilities:

- Responsible for developing a front-end application using React.js and Redux architecture.
- Working with ECMA Script 6 features. For build of JSX and ES2015(ES6) used Babel, webpack.
- Working with React Router for developing Single Page Applications SPAs.
- Experienced in developing React components. Used React JS for making AJAX Calls. Worked on Webpack for build and webpack-dev-server a server.
- Worked on **REST API** calls and integration with UI. Used **ReactJS** to develop the component to the application team, consume **REST API's** and used **JavaScript, CSS3** and **jQuery** to display the data in front end.
- Working experience with Typescript new features block scope, type restrictions, decorators, arrow functions, classes, interfaces, modules (import and exports).
- Developed tools using Python, Pyspark, Shell scripting, XML to automate some of the menial tasks. Interfacing with supervisors, artists, systems administrators and production to ensure production deadlines are met.
- Used webpack, babel for transpilation (compilation) configuration for typescript to be converted to JavaScript.
- Worked with Express.js for development of RESTful web services and middleware configurations.
- Worked with npm commands and using package. json for managing dependencies and dev-dependencies of node js applications.
- Full-Stack Developer with over 4 years of experience in building web applications.
- Highly proficient in JavaScript, Node.js, React, and Python.
- Worked with unit testing of JavaScript applications using Jest.
- Worked with code cloud which uses git commands for version control.
- Work in Agile, Scrum methodology to ensure delivery of high-quality work.
- Play a major role in code reviews and provide code review to co-developers and receive feedback for the better quality of code.
- Experienced in web applications development using Django/Python, Flask/Python And Node.js, Angular.js, DOJO, jQuery while using HTML/CSS/JS for server-side rendered applications.
- Participating in brain storming sessions, provide inputs in Scrum, Sprint, Backlog grooming and Retro meetings.
- Troubleshoot and find solutions for the high priority production issues.
- Experience with Postman to check API calls are responding as expected.

Environment:HTML5, CSS3, JavaScript, TypeScript, React Js, jQuery, AJAX, XML, JSON, REST web services, Jest, GraphQL, Jenkins, Splunk, Axios, react bootstrap, VS Code.

Client- Department of community affairs, New Jersey
September 2021- October 2023
Title -Frontend Developer

- Develop high performance customer facing application using **React JS, Redux-saga, React Hooks, React router. JavaScript, HTML5, CSS3, Bootstrap4.**
- Built **Custom Components** for UX-Library consisting of Accordion, Filters, Dropdown, Carousel, Button, Checkbox, Input, Icons.
- Developed custom API layer to handle all **CRUD** transactions, **JWT** token management and implemented interceptors to embed custom headers.
- Exclusively used **React-hooks** to perform the application life-cycle processes.

- Used middleware, **Redux saga** with ImmutableJS in application to retrieve and store data from Backend and to also perform RESTFUL services.
- Experienced in web applications development using Django/Python, .NET/C#, Flask/Python, and Node.js, Angular.js, ember.js, jQuery, Ajax while using HTML/CSS/JS for server-side rendered application.
- Used **redux to store** data globally and for easy retrieval of data to any component in the app.
- Tested REST end points using **POSTMAN**.
- Worked with **React Flux architecture** and **Redux architecture** using complex Object-Oriented concepts in improving the performance of the websites.
- Worked the **AXIOS**, promise based HTTP client for the browser and node.js for hitting REST endpoints and fetching data into the app.
- Used **React Refs**, controlled and Un controlled react components for different use cases.
- Maximized use of Events and promises in ES6 and React for application control flow.
- Used babel and webpack for compiling and bundling the project.
- Develop global functionalities for **exception handling** and **error handling**.
- Implemented CSS **Box Model**, and styled web pages using **CSS Preprocessor SASS** and effectively used mixins, functions, custom grid systems, grid area concepts and **flexbox** for a fluid -responsive application.
- Worked on **Cross-Browser compatibility** and tested the application on browsers such as Internet Explorer, Firefox, Chrome, Safari, Opera.
- Used **JIRA** to keep track of bugs to reduce downtime, increase productivity and improve communication and **BitBucket** as version control.
- Taking an active role in structuring single page application to make them easy to maintain and ensure they are highly modularized.

Client -Zitin Technologies, Hyderabad, India

July 2018 - August 2021

Title - web Developer

Responsibilities:

- Designed wireframes, mock-ups, and prototyping using **MS Visio**.
- Experienced in designing logos, images, icons, graphics, and user interfaces using **Adobe Dream Weaver & Photoshop**.
- Responsible for the implementation of the presentation layer (GUI) for the application using **HTML, CSS, and JavaScript**.
- Collaborated with the **UX** team to determine branding & style guidelines for the application.
- Created custom, general use modules and components which extend the elements and modules of core AngularJS.
- Migrated application from **jQuery UI to AngularJS single page application (SPA)**.
- Delivered a complete front-end application
- Ensured high performance on **mobile** and **desktop**
- Coordinated the workflow between the graphic designer, the developer.
- Cooperated with the back-end developer in the process of building the **RESTful API**
- Followed best **AngularJS** practices and commonly used modules based on extensive work experience
- Created self-contained, reusable, and testable modules and components
- Used **CSS** and **JS methods** for providing performant visual effects.
- Responsible for the platform, **database, API, caching layer, proxies**, and other web services used in the system
- Validated user actions on the client-side and providing responsive feedback
- Wrote non-blocking code, and resorting to advanced techniques such as multi-threading, when needed
- Created custom, general use modules and components which extend the elements and modules of **core AngularJS**
- Experienced with building the infrastructure for serving the **front-end app** and assets
- Architecting and automating the build process for production, using task runners or scripts
- Documented the code inline using **JSDoc** or other conventions
- Developed web applications and RESTful web services and APIs using Python Flask, Django, Pyramid and PHP.
- Created **e2e test** suites for all components and running them with **Protractor**.
- Created configurations, build, and test scripts for Continuous Integration environments.
- Optimized application for maximum speed and scalability
- Assured that all user input is validated before submitting to the back end.

- Handled client-side validations, slide shows, show controls, dropdown menus, and tab navigation using **jQuery**.
- Experience in developing Responsive Web Design applications using **CSS3 Media Queries** and **Bootstrap**.
- Tested browser compatibility and addressing browser compatibility issues hence worked with different browsers like **Safari, Google Chrome, Mozilla Firefox, and Internet Explorer**.
- Used chrome inspector tools and Firebug for debugging and troubleshooting the existing code.
- Experienced in working with different Text Editor like Sublime text.
- Experienced in Waterfall Software Development Life Cycle (SDLC) includes Analysis, Design, Development, Testing, and Deployment.

Environment:HTML4, CSS, JavaScript, jQuery, Angular JS, RESTful API, Bootstrap, Firebug, Adobe Dreamweaver, Adobe Photoshop, MS Visio, Sublime text, and Waterfall Methodology.
