Objective

Experienced Oracle Database Administrator (DBA) Consultant with 14+ years of expertise in enterprise-grade database administration, performance tuning, high availability solutions, and cloud-based architecture.

- Adept at delivering mission-critical solutions for large-scale enterprise systems while ensuring security, performance, and reliability.
- Specialized in Oracle RAC, Data Guard, GoldenGate, PostgreSQL, and database performance optimization.
- Proven experience in leading DBA teams, conducting training sessions, and monitoring performance to enhance organizational growth.
- Strong ability to collaborate with cross-functional teams and lead knowledge transfer (KT) sessions to optimize operations.

Core Competencies

- Database Administration: Oracle 10g, 11g, 12c, 19c, RAC, RACONE, Data Guard, ASM, PostgreSQL
- Performance Optimization: AWR, ADDM, ASH, TKPROF, SQL Tuning, Query Optimization
- High Availability & Disaster Recovery: Oracle RAC, GoldenGate, Streams, RMAN Backup & Recovery
- Experience in PostgreSQL database administration, including installation, configuration, and performance tuning
- Cross-Platform Migrations: Solaris (Big Endian) to RHEL (Little Endian) using non-RMAN methods
- Hands-on experience in migration from Oracle to PostgreSQL, ensuring seamless data transfer, schema conversion, and application compatibility
- Strong knowledge of high availability solutions Oracle Streams, Oracle Goldengate, and knowledge of Patroni for PostgreSQL.
- Expertise in Shell Scripting, Automation.
- Security & Compliance: User Access Control, Auditing, Encryption, Data Masking. Expertise in security management, including role-based access control, SSL/TLS encryption, and auditing.
- Strong knowledge of partitioning techniques to manage large datasets efficiently. Integration of PostgreSQL with ETL tools like Informatica
- Administering PostgreSQL databases to do performance tuning and index maintenance of databases on a regular basis
- Database Migration & Upgrades: Logical/Physical Standby Setup, Cloud Migration
- Leadership & Team Management: Mentoring DBA teams, conducting training, knowledge sharing (KT) sessions
- Cross-functional Collaboration: Working with development, infrastructure, and security teams for optimized database management

Technical Skills

Databases & Technologies

Oracle 10g, 11g, 12c, 19c, RAC, RACONE, GoldenGate 11, 12, 19, Data Guard, Streams, LogMiner, PostgreSQL, RMAN, OEM Grid Control, Flex ASM, Datapump Import/Export, SQL Loader, Oracle goldengate logdump

Operating Systems

Linux: RHEL 7.x, 8.x, 9.x | AIX: 5.1–7.2 | Windows: 10, 11

Cloud & Infrastructure

Knowledge in: GCP, EC2, RDS, S3, VPC, IAM, CloudWatch, Auto Scaling, ELB | Virtualization & Storage: VMware, SAN/NAS

Tools & Utilities

PL/SQL, SQL*Loader, UNIX Shell Scripting, AWR, ADDM, ASH, TKPROF, STATSPACK, DBMS_SCHEDULER, ASMCMD, GGSCI, logdump, SQL Developer, TOAD, WinSCP, Putty, Grid Control.

Professional Experience

Lead Oracle DBA Consultant

CVS Caremark, Woonsocket, RI | June 2022 – Present

- Directed team operations and served as the acting lead in the absence of the manager
- Coordinated with cross-functional teams to execute infrastructure upgrades and database enhancements
- Managed Standalone, 5-node, 2-node & 3-node Oracle RAC & RACONE databases on AIX & RHEL (Oracle 10g, 11g, 12c, 19c)
- Upgraded Oracle 11g to 19c, applying patch sets and interim patches
- Upgraded and maintained GoldenGate for real-time replication across multiple databases (Integrated & Classic)
- Developed automated monitoring scripts for uptime/downtime status and database health checks
- Conducted SQL performance tuning for long-running and resource-consuming queries
- Performed data refresh from Production to Performance Testing using RMAN, modifying large datasets for testing

Senior Oracle DBA Consultant

United Airlines, Chicago, IL | May 2021 – June 2022

- Upgraded databases from Oracle 18c to 19c with minimal downtime
- Migrated large production databases across different platform endianness (Solaris to RHEL) using non-RMAN methods
- Performed seamless migrations with limited downtime for high-volume enterprise systems
- Applied one-off patches & PSU version updates to ensure compliance and stability

Swamy Bondada

Phone: 270-792-5174 | Email: swamyserv@gmail.com

- Hands-on experience in migration from Oracle to PostgreSQL, ensuring seamless data transfer, schema conversion, and application compatibility
- Strong knowledge of partitioning techniques to manage large datasets efficiently.
- Integration of PostgreSQL with ETL tools like Informatica
- Administering PostgreSQL databases to do performance tuning and index maintenance of databases on a regular basis
- Designed and implemented disaster recovery solutions using RMAN and physical standby databases

Senior Oracle DBA Consultant

CVS Caremark, Woonsocket, RI | Feb 2011 – May 2021

- Managed Standalone, 5-node, 2-node & 3-node Oracle RAC & RACONE databases on AIX & RHEL (Oracle 10g, 11g, 12c)
- Upgraded Oracle 10g to 11g, applying patch sets and interim patches
- Implemented Oracle Data Guard for disaster recovery and GoldenGate for real-time replication
- Designed and implemented capacity planning, space management, database security audits, and backup/recovery strategies
- Conducted SQL performance tuning using TKPROF, Explain Plan, AWR, ADDM
- Provided ETL and query performance optimization support for development teams

Education

MS in Electronics and Information Systems / Software Engineering

New York Institute of Technology, NY & Stratford University, VA | GPA: 3.64/4.0 | Jan '08 - Apr '09

B. Tech in Electronics and Communication Engineering

SRM University, India | GPA: 8.0/10.0 | Jul '03 - May '07

Certifications & Training

- Oracle RAC and GoldenGate Advanced Administration Training
