

Summary

Results-driven Full Stack Developer with 4+ years of experience building and optimizing scalable web applications. Achieved tangible outcomes such as a 75% improvement in task success rates, \$3M revenue growth, and a 70% reduction in manual processes. Proficient in modern technologies, delivering innovative solutions that enhance performance, security, and user experience across diverse industries.

Technical Skills

- Frontend Development: Angular, React, TypeScript, JavaScript, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap
- Backend Development: Node.js, Express.js, RESTful APIs, Java, MEAN Stack
- Databases: SQL Server, MySQL, MongoDB
- Cloud & DevOps: AWS (AppSync, Lambda), Docker, Kubernetes, Jenkins
- Testing: Jasmine, Karma, Jest
- Other Tools: GitHub, Postman, Jira

Professional Experience

Full Stack Developer | IBM — New York, United States *Aug 2023 – Present*

- Streamlined supply chain management: Delivered a planner SPA using Angular 11, TypeScript, and RxJS, boosting task success rates by 75% and reducing monitoring time by 40%.
- Designed and deployed a centralized dashboard portal integrating multiple systems with React, Next.js, and Tailwind CSS, leading to a 10% increase in user engagement and faster access to critical data.
- Enhanced global reach: Implemented multilingual support using React i18n, resulting in a 35% increase in international web traffic.
- Automated administrative processes with a cross-browser-compatible Admin Portal, reducing manual support effort by 70% and cutting bug resolution time by 50%.
- Revamped legacy systems with React, AWS AppSync, and GraphQL, improving data retrieval efficiency by 10% and enabling seamless scalability.
- Maintained high code quality with 80% test coverage, utilizing Karma, Jasmine, and Playwright for unit and integration testing.

Software Engineer | Blue Dear Enterprise— India *Mar 2019 – Jun 2022*

- Boosted financial performance: Developed a multi-tier integrated tax system for a county’s revenue department, driving a 15% increase in property tax revenue and streamlining tax collection processes.
- Engineered client websites and internal applications with JavaScript, HTML, and CSS, generating over \$3M in revenue.
- Enhanced authentication security by creating a PingFederate-integrated responsive container application, reducing authentication failure rates by 35%.
- Optimized mainframe interactions by extracting membership data via REST API, achieving a 30% reduction in system calls.
- Migrated enterprise applications from Azure to AWS using Docker and Kubernetes, improving scalability and reducing infrastructure costs.
- Delivered a budgeting web application for a hospitality client with Angular and TypeScript, accelerating financial planning by 25%.
- Built and deployed a scalable Node.js-based Web API hosted on multiple load-balanced instances, ensuring 99.9% uptime.

Key Projects

Planner SPA for Supply Chain Management

- Impact: Enhanced supply chain task tracking and KPIs for product managers, achieving a 75% improvement in task success rates and 40% faster decision-making.
- Technologies: Angular 11, TypeScript, RxJS, HTML5, CSS3, MVC Framework.

Centralized Dashboard Portal

- Impact: Unified access to multiple dashboards, leading to a 10% increase in productivity and a reduction in time-to-insights by 30%.
- Technologies: React, Next.js, Tailwind CSS, TypeScript.

Integrated Tax System

- Impact: Improved revenue collection efficiency by 15% for a county government through a robust tax processing solution.
- Technologies: Java, SQL Server, JavaScript.

Authentication & Authorization System

- Impact: Reduced security risks and slashed authentication failure rates by 35%, ensuring compliance with security standards.
- Technologies: PingFederate, Angular 11, REST API.

Education

Master of Science in Information Technology *Aug 2022 – Dec2023*  
University of Cincinnati — Cincinnati, Ohio **GPA: 3.9/4.0**

Key Achievements

Increased team efficiency by introducing automation pipelines, reducing manual intervention by 70%.  
Recognized as a key contributor at IBM for improving user engagement by designing scalable SPAs.  
Received “Excellence in Engineering” award at Optum for implementing secure and scalable web applications.
