

TERRANCE GARNER

Senior Software Engineer

📍 CIBOLO, TX, 78108 📞 +1 (434) 298-6350 @ terrance.codedev@gmail.com

Professional Summary

Senior Full Stack Engineer with 10+ years of experience designing, developing, and deploying cloud-native, serverless web applications. Expert in **JavaScript (ES6), Node.js, and React.js**, with extensive experience building scalable solutions on **AWS (Lambda, DynamoDB, S3, SNS, SQS)**. Skilled in CI/CD automation, infrastructure-as-code, and distributed systems design. Adept at building data-driven systems for automation, monitoring, and efficiency improvements across education and enterprise platforms. Passionate about creating maintainable, secure, and high-performance applications that align with business and mission goals.

Core Skills

Languages & Frameworks: JavaScript (ES6+), Node.js, React.js, AngularJS, Python, Java

AWS Cloud Services: Lambda, DynamoDB, S3, SNS, SQS, KMS, CloudFormation, Route 53, ALB/ELB, VPC, Fargate, CDK

Databases: DynamoDB (NoSQL), PostgreSQL, MySQL, MongoDB

DevOps & CI/CD: Jenkins, AWS CodePipeline, GitHub Actions, Terraform, CloudFormation, Docker

Architecture & Design: Serverless applications, Microservices, Event-driven design, RESTful APIs

Other Tools: Git, Jira, Postman, CloudWatch, Sentry, Agile/Scrum methodologies

Professional Experience

Scopic - Senior Software Engineer

Jan 2022 - Jul 2025 | Marlborough, MA | 🔗 <https://www.scopicsoftward.com/>

- Designed and deployed **AWS Lambda-based microservices** for data processing, automation, and reporting workflows.
- Developed **full-stack applications** using **Node.js** and **React.js** to support education analytics and automation.
- Implemented **AWS DynamoDB and S3** integrations for scalable storage and retrieval of student performance datasets.
- Built and maintained **CI/CD pipelines** using Jenkins and AWS CodePipeline for automated build, test, and deployment.
- Used **SNS and SQS** for asynchronous communication between distributed services.

- Applied strong **JavaScript ES6** and TypeScript principles to ensure clean, maintainable, and reusable code.
- Managed AWS infrastructure components — IAM, Route 53, VPC, ALB, and CloudFormation — to ensure system security and reliability.
- Collaborated with cross-functional Agile teams, leading architecture discussions and sprint planning sessions.

Itransition - Software Engineer

Sep 2018 - Dec 2021 | McLean, VA | <https://www.itransition.com/>

- Built and maintained **full-stack JavaScript applications** using React and Node.js across AWS infrastructure.
- Developed **REST and GraphQL APIs** connecting cloud data pipelines with visualization dashboards.
- Automated deployments with **AWS CodePipeline** and implemented monitoring through CloudWatch and Sentry.
- Improved code quality through TDD and code reviews, maintaining 90% test coverage.
- Enhanced data performance through DynamoDB indexing and optimized query patterns.

Trango Tech - Fullstack Engineer

Jun 2013 - Jul 2018 | Houston, TX | <https://www.trangotech.com/>

- Developed **AngularJS and Node.js web applications** with backend services running on AWS EC2 and S3.
- Built **Lambda functions** to automate file ingestion, data validation, and reporting workflows.
- Designed CI/CD pipelines in Jenkins for automated testing and deployment to cloud environments.
- Integrated KMS encryption, IAM roles, and secure data flow pipelines for compliance and data protection.

Education

The University of Texas at Austin | Bachelor of Computer Science | 2009 - 2013
