SUMMARY

Skilled and detail-oriented Java Full Stack Developer with over **8** years of experience in building scalable, secure, and high-performance applications in the healthcare and e-commerce domains. Expert in Java, Spring Boot, Angular/React, and AWS, with a strong foundation in DevOps and CI/CD practices. Proven record of success in cross-functional Agile teams using TDD/BDD and clean architecture principles to deliver robust software solutions that drive business value.

SKILLS

Languages — Java, JavaScript, TypeScript, SQL, HTML5, CSS, Shell(Bash)

Frontend — Angular, React, Next.js, NgRx, RxJS, Redux, Mobx, Bootstrap, Tailwind CSS

Backend — SpringBoot, Spring MVC, Spring Security, Spring Data JPA, Spring Cloud, Hibernate, Maven, Gradle, REST, SOAP, GraphQL, Node, RabbitMQ, Kafka

Databases — PostgreSQL, MySQL, Oracle, SQL Server, MongoDB, Redis

Cloud & DevOps — AWS (EC2, S3, RDS, Lambda, CloudWatch), GCP, Azure, Heroku, Docker, Kubernetes, Jenkins, GitHub Actions, GitLab CI/CD, Terraform, Nginx/Apache, Git, GitHub, GitLab, Bitbucket

Testing — Junit, TestNG, Mockito, PowerMock, Postman, Swagger, SoapUI, Selenium, Cypress, Jest, Mocha

Highlights — Agile(Scrum, Kanban), TDD & BDD practices, Clean architecture & SOLID principles, Cross-team collaboration, Time-efficient delivery, Problem-solving mindset, Strong written & verbal communication

PROFESSIONAL EXPERIENCE

Brightleaf Solutions
Senior Software Engineer

Brookline, Massachusetts
01/2022 – 12/2024

- Modernized a legacy EHR system into a modular microservices platform using **Spring Boot**, **Spring Cloud**, and **React**, significantly improving maintainability and cutting API response time by 40%.
- Implemented **Spring Data JPA** and **Hibernate** to interact with the **PostgreSQL database** efficiently, reducing the need for boilerplate code and simplifying database management.
- Established CI/CD pipelines using **Jenkins**, **Docker**, and **AWS CodePipeline**, resulting in seamless daily deployments.
- Migrated **SOAP**-based external integrations to **RESTful services**, streamlining partner connectivity and reducing average onboarding time by 60%.
- Enhanced frontend architecture by integrating **RxJS** and **Tailwind CSS**, leading to a 30% decrease in reported UI bugs and improved user satisfaction in usability tests.
- Maintained cloud infrastructure using **Terraform** across AWS (EC2, RDS, S3), ensuring fault tolerance and enabling auto-scaling during peak usage.
- Implemented centralized monitoring and alerting via **CloudWatch** with actionable insights, reducing average incident resolution time by 2 hours.
- **Mentored** 3 junior developers and led peer code reviews, cultivating a team-wide commitment to clean architecture and test-driven development.

Qualtrics
Full Stack Developer

Provo, Utah
08/2019 – 12/2021

- Led the redesign of a multi-tenant fintech platform into containerized **Spring Boot microservices**, reducing hosting costs by 35%.
- Integrated **React** frontend with **Spring Boot** backend, making **API calls** from React components to fetch and display real-time data to the user.
- Developed secure APIs using **Spring Security** with JWT authentication, enabling scalable authorization workflows across multiple client organizations.
- Engineered interactive transaction dashboards with **Angular**, **NgRx**, and **Tailwind CSS**, allowing real-time visualization of account balances, fraud alerts, and financial analytics.
- Integrated **RabbitMQ** and **Kafka** into the architecture to enable real-time for fraud detection, billing updates.
- Authored **Gradle** plugins to support modular tenant-based builds and customized deployment strategies, decreasing build failures and configuration drift across environments.
- Built robust **GitLab CI/CD** workflows including staging, testing, and blue-green deployments with rollback support, improving release velocity and confidence in production rollouts.

Veeva Systems
Software Engineer

Pleasanton, California
07/2018 – 07/2019

- Designed and built an internal CRM dashboard with **Spring MVC** and **Thymeleaf**, integrated with Shopify APIs to automate order tracking, inventory control, and customer management.
- Replaced legacy **JSP** components with modern **React + Redux** architecture, reducing page load times by 50% and improving maintainability for the frontend team.
- Introduced **GraphQL APIs** to enhance data querying flexibility and reduce over-fetching on dynamic product and order pages, improving UX and developer efficiency.
- Containerized the full-stack application with **Docker** and standardized local development environments, accelerating onboarding and debugging processes.
- Automated inventory sync jobs using **Spring Scheduler** and webhooks, achieving real-time updates and 99% inventory accuracy across multiple Shopify stores.
- Integrated **Cypress** test suites into GitHub Actions CI/CD pipeline, reducing regression incidents by 40% and increasing deployment confidence.

EDUCATION

Bachelor of Science in Computer Science
University of Texas at Austin

Austin, TX
09/2014-05/2018
