

Udit Naik

Software Engineer | 562-257-6935 | uditnaik727@gmail.com | CA

SUMMARY:

Software Engineer with 5+ years of progressive experience architecting and optimizing enterprise-grade applications across e-commerce, finance, and SaaS ecosystems. Adept at leveraging Java, Python, JavaScript, and cloud-native platforms (AWS, Azure, GCP) to design scalable, high-availability systems. Proven expertise in building microservices and event-driven architectures, enhancing data pipelines with ETL/ELT frameworks, and optimizing SQL/NoSQL databases for high-volume transactions. Skilled in Agile/DevOps delivery, CI/CD automation, and cloud security best practices, achieving measurable gains in system performance, compliance, and resilience. Recognized for leading cross-functional teams and delivering business-critical solutions that accelerate digital transformation and operational efficiency.

SKILLS:

Methodologies & Practices: Agile (Scrum/Kanban), SDLC, Waterfall, CI/CD, TDD, BDD, DevOps, Secure SDLC

Languages & Scripting: Java (Core, J2EE), Python, JavaScript (ES6+), SQL, PL/SQL, C

Frameworks & Libraries: Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, React.js, Node.js, Express.js, JSF

Cloud & Infrastructure: AWS (EC2, S3, Lambda, Glue), Azure, Google Cloud Platform, Docker, Kubernetes, Terraform

Databases & Data Engineering: MySQL, PostgreSQL, Oracle, Snowflake, Teradata, NoSQL, ETL/ELT Pipelines, Query Optimization

Tools & Platforms: Jenkins, Maven, Gradle, Git/GitHub, ServiceNow, Splunk, Selenium, Postman, JUnit, TestNG

Web & Integration: RESTful APIs, Microservices, JSON/XML, HTML5, CSS3, Bootstrap, jQuery, Ajax

Analytics & Monitoring: Log Analysis, Data Visualization, Performance Profiling, Application Monitoring (Splunk, CloudWatch)

EDUCATION:

Master of Science in Computer Science

California State University, Long Beach, USA

Dec 2023

Bachelor of Engineering in Computer Engineering

Gujarat Technological University, India

June 2019

EXPERIENCE:

Allstate, CA | Software Engineer | Jan 2024 - Current

- Directed end-to-end re-engineering of a multi-tier SaaS commerce ecosystem, orchestrating 15+ developers in modernizing monolithic modules into microservices with Spring Boot and React.js, improving system scalability by 30% and cutting downtime by 20%.
- Enforced enterprise-grade security protocols with Spring Security and advanced authentication mechanisms, achieving SOX & PCI-DSS compliance uplift by 15%.
- Architected multi-database strategy (MySQL, PostgreSQL) with optimized query execution plans, cutting response latency by 20% under peak traffic loads.
- Automated data pipelines with AWS Glue & Data Pipeline, enabling real-time analytics that improved business decision-making velocity by 25%.
- Championed code quality initiatives through peer reviews and JUnit/TDD practices, reducing defect density by 18% across releases.
- Streamlined GitOps branching strategies, resolving merge conflicts proactively and expediting CI/CD delivery by 30%.

Infosys Limited, Mangalore, KA | Senior Systems Engineer | Oct 2021 – Jan 2022

- Spearheaded ETL migration of enterprise-scale financial datasets from Oracle to Teradata, deploying advanced partitioning and indexing to accelerate batch throughput by 40%.
- Automated monitoring of Autosys batch processes, reducing recurring failures by 15% and strengthening SLA adherence.
- Authored complex SQL/PL-SQL reporting queries in Teradata and Snowflake, delivering insights that influenced multi-million-dollar strategic decisions.
- Enhanced query optimization frameworks, reducing execution time by up to 20% in production workloads.

Infosys Limited, Mangalore, KA | Systems Engineer | Oct 2019 – Sep 2021

- Developed RESTful API ecosystem with Spring Boot, enabling enterprise integrations that improved service responsiveness by 20%.
- Automated resolution workflows in ServiceNow, decreasing incident backlog by 25% and improving MTTR.
- Enhanced Oracle PL/SQL packages and triggers, enabling real-time dashboards with a 24% uplift in processing speed.
- Designed Splunk-based log correlation dashboards, reducing troubleshooting time by 15% and improving audit readiness.

Neon IT Systems, India | Software Engineer | Aug 2018 – Oct 2019

- Delivered a mission-critical e-commerce application using the Waterfall methodology, ensuring 99.9% uptime across Azure and GCP environments.
- Built automation frameworks with Python (Selenium, Postman APIs), reducing manual QA workload by 35% and strengthening release reliability.
- Engineered Spring Boot-based microservices with Hibernate ORM, mitigating security risks via periodic audits and boosting system throughput by 25%.
- Administered version control (Git/GitHub) & deployment pipelines across WebSphere and Apache Tomcat, cutting deployment defects by 20%.
