

Umar Shaikh

Full Stack Engineer with 8+ years of experience delivering scalable web applications. Expert in Node.js, React, PostgreSQL, and TypeScript across the stack. Skilled in microservices architecture, performance optimization, and system reliability. Adept at leveraging AI tools for rapid development while ensuring high code quality. Proven track record of leading projects end-to-end and mentoring engineers to uphold best practices.

WORK EXPERIENCE

Senior Full Stack Engineer

January 2023 – Present

Procure

- Led the end-to-end development of web applications using Node.js, Python and React, ensuring seamless integration between frontend and backend components.
- Architected microservices with Node.js on AWS, improving scalability, optimizing resource usage, and reducing operational costs.
- Optimized PostgreSQL queries and implemented Redis caching, resulting in a 60% reduction in response times.
- Executed an automated backend deployment using Node.js, saving 10 hours per week.
- Directed deployment processes with Docker, collaborating with DevOps teams to build and optimize CI/CD pipelines
- Mentored junior engineers on API design patterns, code quality, and debugging strategies.
- Maintained >75% automated test coverage using Jest, Cypress, and load testing with k6.

Full Stack Engineer

Sep 2020– Dec 2022

Kunai

- Built client-facing and internal dashboards using React and TypeScript, with backend services in Node.js and occasional Python scripts for automation tasks.
- Architected microservices to decouple authentication, reporting, and real-time data modules for easier scaling and independent deployments.
- Integrated external APIs (Azure, ServiceNow, GCP) with authentication, error handling, and retry logic to ensure reliability.
- Modeled and tuned MongoDB and Redis to handle low-latency real-time updates.
- Conducted code reviews focused on maintainability, security, and adherence to architecture guidelines.
- Coached new hires through architecture diagrams, live coding sessions, and pairing.

Software Engineer

Aug 2016 – Dec 2019

Mission

- Managed storage & deletion of 50+ content using Node & React, interfacing seamlessly with jQuery UI.

SKILLS

Backend Technologies:

Node.js

NestJS

Express.js

RESTful API

Python

Django

Flask

FastAPI

FrontEnd Technologies:

HTML/ CSS /JavaScript

ReactJs

Next.js

Ember.js

Typescript

Jquery

Databases:

SQL Server

MySQL

PostgreSQL

MongoDB

Azure

Cloud and DevOps:

GCP

AWS

CircleCi

Testing tools:

Mocha

Chai

Project Management Tools:

Jira, Slack, Github, Trello, GitLab

EDUCATION

University of the Punjab

Bachelor

Major in Computer Science

Lahore, PK – 2017

- Translated Figma/Adobe designs and wireframes into responsive web pages, employing JavaScript frameworks for 30+ distinct pages.
- Updated legacy code bases to modern development standards, achieving improved functionality and performance.
- Improved and enhanced the functionality of existing websites and SaaS models.
- Resolved critical production issues promptly, ensuring uninterrupted service delivery and customer satisfaction.

PROJECTS

Mission

<https://app.mission.dev>

An online hiring platform where developers after some screening process can be hired by some company.

Fair

<https://shift.com>

Automotive e-commerce platform with end-to-end mobile checkout and flexible subscriptions.

MapleHr

<https://maplehr.io>

MapleHR is an employee management platform that helps potential employers manage their workforce. Offering a collaborative system upon which employee's claims and issues can be resolved in real time.

Rev-Cycle

<https://www.revcycle.com/>

RevCycle Partners streamlines insurance billing and appointment scheduling for eye care providers, fostering positive doctor-patient relationships.
