

Urekha Kulala

Full Stack Developer

Florida, USA | +1 813-666-7507 | urekhak9652@gmail.com | [LinkedIn](#)

SUMMARY:

- Java Full Stack Developer with 5 years of experience delivering enterprise-grade solutions in financial services and insurance domains.
- Proficient in designing and deploying Spring Boot microservices, RESTful APIs, and event-driven architectures with Apache Kafka.
- Hands-on expertise in building scalable front-end applications using React.js and Angular, enhancing user experience and reducing support costs.
- Strong background in SQL/NoSQL databases (Oracle, MySQL, PostgreSQL, Redis, MongoDB) ensuring high availability and reliability.
- Skilled in securing applications with Spring Security, OAuth2, and JWT, while maintaining compliance with enterprise standards.
- Experienced in cloud migration and DevOps practices with AWS, Jenkins, Docker, and Kubernetes for CI/CD automation and zero-downtime releases.
- Proven ability to improve efficiency and reduce costs, including enabling \$2B in appraisal savings and expanding mortgage eligibility to 18,000+ borrowers at Freddie Mac.

SKILLS:

Programming Languages: Java 11, JavaScript, TypeScript, SQL, HTML, CSS

Frameworks & Libraries: Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, RESTful APIs, Microservices Architecture, Apache Kafka, React.js, Angular, Bootstrap

Databases: MySQL, PostgreSQL, Oracle, Redis, MongoDB, H2

Cloud Platforms: AWS (EC2, S3, RDS, CloudWatch, Lambda, API Gateway)

DevOps & CI/CD Tools: Git, GitHub, Jenkins, Docker, Kubernetes, Maven, Gradle

Testing & Security: JUnit, Mockito, TestNG, Selenium, SonarLint, OAuth 2.0, JWT, Test-Driven Development (TDD), Behavior-Driven Development (BDD)

Monitoring & Logging: ELK Stack (Elasticsearch, Logstash, Kibana), Prometheus, Grafana, Log4j

Tools & Collaboration: IntelliJ IDEA, Eclipse, Visual Studio Code, Postman, Swagger/OpenAPI, Jira, Confluence

EXPERIENCE:

Freddie Mac, USA

Jan 2025 – Present

Java Full Stack Developer

- Developed and deployed Spring Boot microservices for Freddie Mac’s Servicing Transfer Manager, automating VPC loan eligibility and reducing manual steps, improving process efficiency by 35%.
- Built and integrated RESTful APIs with SQL databases, leveraging Spring Data JPA and Hibernate, enabling seamless STOS–VPC transfers and improving loan servicing accuracy.
- Enhanced the web interface using React and Angular, implementing the VPC Eligibility tab and interactive dashboards for simplified user workflows.
- Leveraged Spring Security, OAuth2, and JWT to protect APIs and uphold enterprise security requirements.
- Implemented best practices in code quality and maintainability by enforcing design patterns, peer code reviews, and CI/CD quality gates, ensuring long-term system scalability and reliability.
- Implemented Apache Kafka for real-time messaging and event-driven communication between microservices, improving system responsiveness and scalability.
- Integrated Swagger/OpenAPI for API documentation and applied JUnit and Mockito for automated testing to maintain high code quality.
- Enabled monitoring and observability using ELK Stack, AWS CloudWatch, Prometheus, and Grafana for proactive issue resolution.
- Delivered features like ACE waivers and underwriting updates that helped save \$2B in appraisal costs and expanded mortgage eligibility to 18,000+ borrowers.

Accenture Solutions Pvt. Ltd, India

May 2019 – Jul 2023

Java Full Stack Developer

- Designed and developed Spring Boot microservices for an insurance platform, modernizing policy administration and claims workflows, reducing manual effort by 40%.
- Built REST APIs for underwriting, premium calculation, and claims, integrating with Oracle and MySQL databases using Spring Data JPA and Hibernate for reliable and scalable operations.
- Implemented Apache Kafka for real-time event streaming in policy issuance and claims notification services, ensuring low-latency communication between distributed components.
- Developed responsive front-end applications using React.js for policyholder self-service portals, enhancing user experience and reducing call center dependency.
- Migrated applications to AWS Cloud (EC2, S3, RDS) and implemented CI/CD pipelines using Jenkins, Docker, and Kubernetes for faster deployments and zero-downtime releases.
- Secured services using Spring Security with OAuth2 and JWT-based authentication, ensuring regulatory compliance and system integrity.
- Optimized application performance by conducting code profiling, SQL query tuning, and caching strategy improvements, reducing API response times by up to 25%.
- Collaborated with cross-functional stakeholders including business analysts, QA, and product owners to refine requirements and deliver scalable, customer-centric solutions in Agile/Scrum sprints.
- Implemented caching techniques with Redis and Caffeine to optimize system performance.
- Enabled monitoring and observability using ELK Stack, AWS CloudWatch, Prometheus, and Grafana, improving incident response times by 30%.
- Collaborated in an Agile/Scrum environment, managing sprint tasks in Jira, Confluence, and ServiceNow to ensure on-time delivery.
- Managed code and version control using Git and GitHub.

EDUCATION:

Masters in Computer Science

May 2025

University of Texas at Arlington, TX, USA

CERTIFICATIONS:

UiPath Certified RPA Associate | Salesforce Certified AI Associate
