

Vamshi Krishna Reddy

Java Developer

(616)-900-2116 | pvkr105@gmail.com | [linkedin.com/in/pvkr105](https://www.linkedin.com/in/pvkr105)

PROFESSIONAL EXPERIENCE

Software Engineer

Ford Motor Company – Dearborn, MI

June 2023 - Present

- Developed and maintained the Ford Pro Upfit Integration System using Angular (TypeScript/RxJS), Java/Spring Boot, and REST APIs to streamline partner integrations and fleet management workflows, boosting user efficiency by 70%, reducing installation complexity, and eliminating redundant control panels for drivers.
- Designed and maintained scalable SQL/NoSQL data models (Oracle) with Redis caching, optimizing query performance by 35% and supporting seamless integration of aftermarket equipment data into Ford's systems.
- Optimized CI/CD pipelines with Jenkins for AWS and Azure deployments using OpenShift containers, cutting build times by 40% and boosting system stability by 30% while maintaining detailed documentation and tracking efforts.
- Led quality assurance with Jest/Mockito tests and code reviews, achieving a 20% reduction in production defects.

Graduate Assistant

Grand Valley State University – Allendale, MI

Sep 2021 - Apr 2023

- Maintained and optimized the CMS for campus parking services, reducing system downtime by 20% through streamlined updates, backend API integration and enhanced content delivery processes.
- Designed automated workflows for parking violation data collection and analysis, improving data accuracy by 30% and enabling data-driven decisions for resource allocation.
- Collaborated with cross-functional teams to troubleshoot API's, resolve tier-1 support tickets, and document processes, optimizing UI/UX performance and reducing recurring technical issues by 50%.

Associate Software Engineer

Acro Computing – Hyderabad, India

May 2019 - Jul 2021

- Developed scalable microservices using Java Spring Boot and GraphQL, reducing data latency by 40% while ensuring reliable integration with external investment facilitators enabling real-time dashboard analytics (React/JavaScript).
- Seamlessly integrated AWS Quicksight into the investment dashboard to deliver advanced data visualization and statistical insights on customer investments and improve user decision-making efficiency by 50%.
- Enhanced GraphQL queries for investment data retrieval and storage, reducing query response time by 30% and ensuring 99.5% uptime for mission-critical financial dashboards.
- Optimized AWS-hosted services and CI/CD pipelines, achieving a 50% reduction in deployment times and a 20% improvement in overall system reliability, while maintaining comprehensive documentation.

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, TypeScript, Python, HTML, CSS, SQL, SAML
- **Web Technologies:** Angular, React, RESTful API, Redux, RxJS, UNIX, JWT, Spring Boot, Hibernate, Web Services
- **CI/CD Tools:** Jenkins, Docker, Kubernetes
- **Cloud/DevOps:** AWS, Azure, OpenShift, Terraform
- **Databases:** MongoDB, GraphQL, Oracle DB, PostgreSQL
- **Testing:** Jest, Mockito, Jasmine, Selenium, Cucumber
- **Methodologies:** Agile/Scrum, Object-Oriented Programming (OOP), Distributed Systems
- **Build Tools/Platforms:** NPM, Git, JIRA, RabbitMQ, Tomcat
- **Soft Skills:** Collaborative, Innovative, Problem-solving, Data-driven, Communication, Stakeholder Alignment

EDUCATION

Master of Science in Applied Computer Science

Grand Valley State University – Allendale, MI

Bachelor of Technology in Computer Science and Engineering

St. Martin's Engineering College – Hyderabad, India

CERTIFICATION

AWS Certified Developer – Associate

Amazon Web Services (AWS)
