Texas, USA 

Experienced Data Engineer with expertise in designing, developing, and maintaining scalable data pipelines, backed by 14 years of IT experience. Holds a Master's in Information Systems and Technology with proficiency in SQL, Python, PySpark, and data warehousing principles. Adept at collaborating with cross-functional teams to deliver impactful data solutions, enabling business intelligence and supporting data-driven strategies.

SKILLS

Python

SQL

PySpark

Data Warehousing

Airflow

GCP Composer

GCP BigQuery

GCP Dataproc

WORK EXPERIENCE

Senior Data Engineer

HSBC

10/2021 – 11/2023,

- Built **scalable data pipelines** for the **Customer Marketing Data Insights** project, enabling efficient data processing and insights generation for various marketing campaigns.
- Utilized programming languages such as **Python**, **PySpark**, and **SQL** to develop and optimize data workflows.
- Worked with diverse data sources, including **JSON** and **CSV files**, ensuring seamless integration and transformation.
- Leveraged tools like **GCP BigQuery** for data warehousing, **GCP Composer** for orchestration, and **GCP Dataproc** for implementing **Apache Spark** to transform data into actionable formats.
- Collaborated with cross-functional teams to define and align **data requirements** with business objectives, improving data accessibility and usability.

Data Engineer

Veritas Technologies LLC

10/2019 - 06/2021,

- Served as Data Engineer for NetBackup projects, ensuring seamless execution of data pipelines and effective team coordination.
- Developed and maintained ETL pipelines using Python and SQL to support data processing and analysis needs.
- Collaborated with cross-functional teams to gather requirements and align data workflows with business objectives.
- Designed and implemented data validation scripts, ensuring data accuracy and consistency across systems.
- Troubleshoot and resolved data quality issues, contributing to improved data integrity and reporting accuracy.

Technical Lead

Tata Consultancy Services

12/2009 - 08/2019,

- Started as part of the development team responsible for developing middleware for car diagnostics using C++.
- Designed and implemented a Logger Module for middleware applications to enhance error tracking, debugging, and performance monitoring.
- Utilized tools like Visual Studio and Microsoft Visual Source Safe for development and version control.
- Appreciated for performance and promoted to Technical Lead of the team.
- As Technical Lead, managed a team, coordinating daily tasks, guiding in design, conducting design and code reviews, creating code and design guidelines, and highlighting technical risks to management.

EDUCATION

- **BE – Information Technology**
Nagpur University, India
2005 - 2009,
- **MS – Information Systems and Technology**
University of North Texas, USA
2024,
