

PROFILE SUMMARY

- **Leadership & Management:**
 - ✓ 13 years of proven management experience leading cross-functional teams in fast-paced, Agile environments.
 - ✓ Skilled in coaching, mentoring, and developing team members to achieve technical excellence and professional growth .
- **QA Automation Expertise:**
 - ✓ Over 6 years of dedicated experience in QA automation testing using Selenium WebDriver and Java, ensuring robust, defect-free web and Windows applications.
 - ✓ Proficient in API testing and automation with Rest Assured, streamlining test processes and improving reliability.
- **Strategic Test Planning & Execution:**
 - ✓ Adept at designing and implementing comprehensive test strategies, including detailed test plans, cases, and regression suites aligned with SDLC/STLC best practices (Agile, Scrum, and Waterfall).
 - ✓ Experienced in analyzing QA workflows, identifying process bottlenecks, and instituting corrective actions to enhance team performance.
- **Process Improvement & Metrics:**
 - ✓ Demonstrated success in monitoring KPIs and quality metrics to evaluate team performance and product quality, driving continuous improvement initiatives.
 - ✓ Proven ability to assess overall process efficiency and implement strategies to optimize project delivery.
- **Tool Proficiency & Collaboration:**
 - ✓ Proficient in utilizing test management and tracking tools such as qTest, HP ALM Quality Center, confluence, and JIRA, ensuring seamless collaboration between QA and development teams.
- **Comprehensive Experience:**
 - ✓ Brings over 20 years in software development, with specialized expertise in QA, development and leadership to deliver high-quality software solutions.

AREAS OF EXPERTISE

Test Automation | Web Services Testing & Automation | Designing Automation framework | Test Planning | Test Scenario and Test Case Design | Database Testing | Test Reporting | Database Testing | Middleware Testing | Regression Testing | GUI Testing | Manual Testing | User acceptance testing | Project Management | Business requirement analysis | Client Management

TECHNICAL SKILLS

Testing Tools: Selenium WebDriver | TestNG | Cucumber | RestAPI | Sauce Labs | PCloudy | Postman | SOAPUI | Appium
Test Management: qTest | Jira | ALM/HP Quality Center 9.2
Designing Tool: Eclipse | Visual Studio
Web Technology: HTML | CSS | HTTP | HTTPS | Web Services | XML | REST | XSS | XPATH | AJAX | FTP | ASP.Net| MVC
Languages: Core Java | JavaScript | C#.net | VB.Net | Python
RDBMS: SQL Server | Oracle
CRM: Salesforce
Build Tool: Maven| TeamCity
Software Versioning: GitHub| SVN| TFS
CI Tool: Octopus | Jenkins
Log monitoring Tool: AWS CloudWatch | MuleSoft Anypoint Platform | Confluent Kafka topics

QA Manager, Capgemini Technology Services

Nov'18-Oct'24

Clients: LPL Financial, USA

SOFTWARE TESTING EXPERIENCE

- ✓ Worked on multiple LBS applications, most recently on the Subscriber Management System. SMS is a hybrid application built on both on-premises infrastructure and AWS, serving back-office users and management with subscription information associated with Advisors. SMS functions as a downstream system to Salesforce and an upstream system to the Billing Platform and several other back-office applications, aiding in the operations of Advisory units.
- ✓ Developed test automation scripts using Selenium WebDriver, Sauce labs, TestNG, Maven, Rest assured and BDD(Cucumber) for **In-Sprint & Regression Automation**
- ✓ Developed test automation scripts for **API testing** using Java and Rest Assured.
- ✓ Written Test plan, Test Scenarios and Test cases based on the requirements. Prepared test data

- ✓ Performed data integration testing for **DIS jobs**, ensuring data flow to the Billing Platform application.
- ✓ Verified messages on **Confluent Kafka topics** to broadcast real-time changes to other applications.
- ✓ Validated file uploads to the S3 bucket and ensured the Lambda function was triggered via API Gateway by reviewing **AWS CloudWatch logs**.
- ✓ Configured and managed IAM policies in **AWS**, ensuring secure, role-based access to services, including AWS CloudWatch, for monitoring logs and troubleshooting issues. Familiar with best practices for permission management, multi-factor authentication (MFA), and least privilege principles to enhance system security.
- ✓ Implemented **IAM best practices** to establish robust access controls for QA environments, ensuring team members had appropriate permissions to conduct testing and quality assurance activities while safeguarding sensitive data.
- ✓ Utilized **CyberArk for secure database connectivity**, managing privileged access credentials to safeguard sensitive data and ensure compliance with security protocols during testing and quality assurance processes.
- ✓ Collaborated with the Development Manager and DevOps team to define roles and manage user authentication and authorization processes using **ForgeRock**, ensuring secure access control for web applications.
- ✓ Validated batch job data flow by monitoring logs on the **MuleSoft Anypoint Platform**.
- ✓ As part of integration testing, prepared test data in Salesforce and validated real-time data flow from SMS to **Salesforce**.
- ✓ Conducted integration testing for social media platforms such as **Facebook, Twitter, and LinkedIn** for the marketing solution content calendar application, ensuring data was displayed correctly on these platforms.
- ✓ During sprint planning, estimated user story scopes and efforts using Agile estimation techniques and tools such as **qTest, HP ALM Quality Center, and JIRA** for task management.
- ✓ During collaboration meetings, actively participated in architectural decisions for project modules and provided implementation suggestions to the development team.
- ✓ Led project and program-level **defect triage meetings**, tracked issues in Jira, and reported to the client. Discussed all reported defects/issues with the development team, provided guidance, and offered suggestions for fixes.
- ✓ Involved in all **ceremonies** like PI, Sprint planning, Backlog refinement, daily scrum etc. Demonstrated work completed to all stakeholders after the sprint.
- ✓ As a manager, oversaw Project Management activities including resource management, project planning, estimation, risk management, defects prevention, and tracking.
- ✓ Tracked and assessed **KPIs** through **quality metrics** to evaluate team performance, product quality, and delivery efficiency, leading to the identification of improvement opportunities and implementation of corrective actions.
- ✓ Completed the WFH setup for the entire team in just 15 days, resulting in minimal billing loss and indirectly contributing to an increase in account-level revenue.
- ✓ Coordinating with multiple teams such as asset management, network, and security team for new joiner to set up the desktop in ODC.
- ✓ **Mentored junior team members** to enhance skill development, conducted performance reviews, and implemented feedback sessions to support team growth and maintain high standards of quality.
- ✓ Conducted **coaching** sessions on API testing for nearly 150 resources across all locations, enabling them to be better equipped to identify and resolve issues.
- ✓ Received appreciations and the **Customer Delight award**, leading to promotion to Senior Manager

Project Manager, Capgemini Technology Services- Hyderabad

Sep'16-Oct'18

Clients: Wells Fargo

- ✓ Led a team of 25 members at the client premises while adhering to their work culture
- ✓ Successfully delivered the projects - Customer Consolidation (Custcon), and Rating Management Application (RMA) on time and within budget, achieving all project milestones and objectives.
- ✓ Created and obtained sign-off for business requirement documents, analyzed requirements, and developed project plans.
- ✓ Estimated effort hours for project activities and managed task distribution among the team using JIRA as a CSM.
- ✓ Led daily stand-up meetings with the team to track task status and communicated progress to the client.
- ✓ Handled project management tasks: resource management, planning, estimation, risk management, defect prevention, and tracking.
- ✓ Performed design and code reviews and coordinated with the QA team for test case reviews

- ✓ Developed and assisted in SSIS ETL packages for monthly customer credit ratings and enhanced them for data integration
- ✓ Analyzed performance test reports and provided inputs for tuning improvements.
- ✓ Built automation for .NET web applications using Jenkins.
- ✓ Supported UDeploy for all web applications, web service, and batch application deployments. Supported Autosys for batch job scheduling.
- ✓ Streamlined development and deployment processes through automation and tooling.
- ✓ **Received positive feedback from clients and the CG management team, including multiple appreciation emails and recognition for exceptional performance.**

Project Lead, IGATE Solutions

Feb'11-Aug'16

- Clients:** Aloka, WAM Italy, Rio Tinto
- ✓ **Led a prestigious Japanese project by coordinating with multiple stakeholders** and maintaining a project tracker, resulting in timely delivery. Coordinated with translators for all customer meetings and documentation to facilitate translation.
 - ✓ Demonstrated quick learning abilities by working with new software such as ARAS PLM, SolidWorks, and OSIsoft PI AF SDK.
 - ✓ Utilized SolidWorks APIs to reconstruct 3D models and associated 2D drawings for components and machines by passing required parameters through an external text file.
 - ✓ **Gained expertise in PLM workflow, guiding the team to resolve issues.**
 - ✓ Optimized SQL queries to generate reports that met all client requirements and demonstrated them during virtual meetings.
 - ✓ Designed and developed custom tools, including a Windows service for PI point data retrieval and a critical process monitoring application, resulting in customer satisfaction and a request for similar solutions for another plant.
 - ✓ **Received POB Award for rapid development and promotion to Senior Technical Specialist**

Technical Lead, Patni Computer Systems

Jul'04-Jan'11

- Clients:** AT&T U.S.A., Merge Healthcare, U.S.A., Metron, Taunton, UK
- ✓ **Joined as Senior Software Engineer and promoted to Technical Lead.**
 - ✓ **At Metron, Taunton, UK, led a team of four members to complete knowledge transfer, and managed a team of six members offshore using a TDD approach.**
 - ✓ Generated reports using Microsoft Word and Excel through BMIS, written logic for VBA-based report generation.
 - ✓ **Collaborated with various teams, including mainframe, QA, and business end users, to ensure the timely completion of complex projects.**
 - ✓ Conducted brainstorming sessions to elicit requirements to prepare BR and TR documents.
 - ✓ Successfully migrated Customer Archival and Retrieval System (CARS) application from VB6 to VB.NET in a short timeframe.
 - ✓ Monitored progress through daily standup calls and peer review meetings and managed defect management with QA team, preparing daily status reports for stakeholders to track project progress.
 - ✓ **Received 'Best Team' award for delivering a critical project successfully.**

Software Engineer, Ameya Software

Feb'01-Jun'04

- Clients:** Brilliant Alternatives Inc. U.S.A., Danisco Animal Nutrition, U.K. Provimi B.V.
- ✓ Led development of a HRMS application in VB.Net.
 - ✓ Conducted requirement analysis meetings, prioritized requirements, and maintained tracking/status reports.
 - ✓ Emphasized unit testing to ensure quality.
 - ✓ Integrated data with MS Word and Excel.

Bachelor of Engineering (Computer Science) from Walchand Institute of Technology, India

- **ASTQB - ISTQB Certified Tester Foundation Level (CTFL)** – Issued [Jan 2025]
- **CSM® Certified Scrum Master**
- **Microsoft Certified Programmer for Developing and Implementing Windows-based Applications with Microsoft Visual Basic .NET and Microsoft Visual Basic 6.0**
