

Venkata Suraj Grandhi *Java Full Stack Developer*

✉ venkatasurajgrandhi@gmail.com ☎ (937) 972-6989 📍 Dayton, OH 🌐 LinkedIn

Summary

Results-driven Java Full Stack Developer with 3+ years of experience in designing, developing, and deploying scalable, high-performance web applications. Proficient in Java (8, 11, 17), Spring Boot, and Hibernate, with deep expertise in building microservices architecture and RESTful APIs. Adept at solving complex technical challenges, optimizing application performance, scalability, and security. Skilled in cloud-native development, leveraging AWS services (EC2, S3, RDS) to enhance infrastructure efficiency while reducing costs. Strong front-end development expertise in React.js, JavaScript, and TypeScript, delivering dynamic and intuitive user interfaces. Experienced in CI/CD automation using Jenkins, Docker, and Kubernetes, ensuring seamless software delivery in Agile environments. Passionate about engineering excellence, DevOps, and modern software practices, driving innovation and delivering impactful solutions.

Professional Experience

Java Full Stack Developer, Key Bank February 2024 – present | Remote, USA

- Designed and developed scalable RESTful APIs and microservices using Spring Boot, integrating them seamlessly with React.js to deliver high-performance, user-friendly, and responsive web applications.
- Optimized system performance by implementing Apache Kafka for real-time data streaming, improving data processing efficiency, and enhancing scalability with optimized relational (PostgreSQL, MySQL) and non-relational (DynamoDB, MongoDB) database strategies.
- Enhanced cloud infrastructure by leveraging AWS services, including EC2 for scalable compute, S3 for secure storage, and RDS for database management, reducing cloud costs by 20% while ensuring high availability and fault tolerance.
- Developed robust testing strategies using TDD and BDD methodologies with Jest, Mockito, and Cucumber, ensuring high code quality, seamless functionality, and compliance with business requirements.
- Streamlined DevOps processes by designing and maintaining CI/CD pipelines using Jenkins, integrated with Git for version control, implementing automated build, test, and deployment workflows to accelerate software delivery.
- Orchestrated deployments of containerized applications using Docker and Kubernetes (AWS EKS), enabling seamless multi-environment rollouts, reducing deployment times, and improving release efficiency.

Software Engineer, Cognizant July 2021 – August 2022 | Hyderabad, India

- Led the development of scalable middleware solutions using Java, Spring Boot, and React.js, facilitating seamless communication between front-end and back-end systems.
- Designed and implemented RESTful APIs with Spring Boot, integrating JUnit for automated testing to ensure reliability, maintainability, and adherence to performance benchmarks.
- Enhanced front-end functionality by implementing dynamic routing with React Router and optimizing state management using React Hooks, improving application responsiveness and maintainability.
- Optimized database performance by refining schemas and data access layers using Spring Data JPA, ensuring scalability and efficient query execution.
- Automated deployment workflows using Jenkins CI/CD pipelines, reducing manual intervention and accelerating software releases.
- Deployed and managed cloud-based solutions on AWS (EC2, S3, RDS), optimizing infrastructure costs and improving system availability.

Software Engineering Intern, DXC Technology May 2020 – June 2021 | Hyderabad, India

- Designed and developed a comprehensive ERP system using Java, Spring Framework, and Angular, improving backend efficiency and delivering an intuitive user interface.
- Implemented core backend functionalities with Spring MVC, integrating JDBC with MySQL and leveraging multithreading, collections, and exception handling for enhanced application stability.
- Strengthened application reliability by writing and executing unit tests using JUnit and Mockito, achieving high test coverage and ensuring seamless functionality.
- Optimized deployment workflows using Tomcat and Maven, ensuring smooth application releases with minimal downtime.

Skills

Programming & Scripting Languages: Java (8,11,17), JavaScript, TypeScript

Framework and Tools: Spring Boot, Hibernate, Restful API, React.js, Angular, Node.js, Express.js, Redux, React Router, React Hooks, REST/SOAP, GraphQL, MVC Framework, RESTful APIs, Gradle, Micro-services

Databases: PostgreSQL, MySQL, MongoDB, Redis, MS SQL (SQL Server)

Cloud & DevOps: AWS (EC2, S3, RDS), Kubernetes (AWS EKS), Docker, Jenkins, Maven, Heroku, Git, GitHub Actions

Testing and others: JUnit, Mockito, Jest, JMeter, Spring Security, Agile, Scrum, Swagger, Postman, Git, Nginx

Education

Master of Science, Computer Science, University of Dayton

May 2024 | Dayton, OH

B.Tech, Electrical and Instrumentation Engineering, VIT University

May 2021 | Vellore, TN, India
