

Vishal Chapala

+1 (224) 225-5715 | vishalreddychapala25@gmail.com

Summary

Around 6 years of IT experience as a **JAVA/J2EE** developer in the areas of Analysis, Design, Development, Coding, Implementation and Testing of web based and client server multi-tier applications.

- Experience in using Core technologies like **Java, Servlets, JSP, Custom tags, Spring Boot, JDBC, Microservice, Java Beans, EJB, JavaScript, Web Services, Angular JS, Angular 2/4/6/8/9, jQuery, MVC, Struts, Spring.**
- Strong experience in Core Java skills including **Multithreading, Collections, Garbage Collection.**
- Experience in developing applications using **Spring Boot** and implementing **Hibernate** database access methodologies.
- **Micro Services** have been built using **spring boot, spring cloud** and deploying to AWS Cloud.
- Setup and built AWS infrastructure **various resources, VPC, EC2, S3, Dynamo DB** and **RDS** in **Cloud Formation JSON templates.**
- Highly experienced with modern JavaScript frameworks and libraries like **Angular, Node.js** and **Dojo, JQuery**
- Extensive experience on developing web applications using **Spring Boot, Spring Security, Spring Core, Spring MVC, Spring AOP, Spring Actuator, Spring ORM, Spring JPA** and **Spring REST.**
- Experience with messaging systems like **Kafka, Kafka event sourcing.**
- Worked in using **React JS** components, Forms, Events, Keys, Router, Animations and Redux concept.
- Extensive experience in developing **Microservice** using **Spring Boot, Netflix OSS (Zuul, Eureka, Ribbon, Hystrix)** and followed domain driven design.
- Expertise in **Bootstrap, Angular 6/8/9** **9.js** and **Node.js** (Express, Mongoose, Body-Parser, HTTP, File systems, Browser Sync etc...) and used Log 4j for logging.
- Good experience on working with **Amazon Web Services** like **EC2, S3, Amazon Simple DB, Amazon RDS, Amazon Elastic Load Balancing, Amazon SQS, AWS Identity and access management, AWS Cloud Watch, Amazon EBS** and **Amazon Cloud Front.**
- Knowledgeable in fundamental UI/UX design principles, such as layout, color theory, typography, and responsiveness, to create user-friendly Java-based applications.
- Skilled in using Linux commands and shell scripts to interact with LDAP directories and perform system administration tasks.
- Implemented **Docker** containers to create images of the applications and dynamically provision slaves to **Jenkins** CI/CD pipelines.
- Ran Log aggregations, website Activity tracking and commit log for distributed system using **Apache Kafka.**
- Experience in writing **ANT, Gradle, Maven** and **Jenkins** build scripts, writing unit test cases using **JUnit, Mockito, Easy Mock, TestNG** and used **Log4j, Slf4j, Log InSight** for bug tracking.
- Developed **CI/CD system** with **Jenkins** on **Kubernetes** environment, utilized **Kubernetes** and **Docker** for the runtime environment for the **CI/CD system** to build, Test and Deploy.
- Created **Micro services** as part Lambda function development using **Node.js** Serverless architecture.

TECHNICAL SKILLS

Programming Languages	C, C++, Core Java, Groovy, PHP, R, PL/SQL
Web Technologies	HTML5, CSS3, JavaScript, AJAX, JSON, Bootstrap, JQuery, Angular JS, Angular 2/4/6/8/9, React JS, Redux, Node JS, Express JS.
J2EE Technologies & frameworks	Servlets, EJB, JSP, JSF, JDBC, SOAP, WSDL, REST, XML, JAXP, JAXB, JPA, Spring, Hibernate, Spring MVC, Spring Boot, Spring Data, Spring Batch
Databases	Oracle, DB2, SQL Server, MYSQL, MongoDB, IMS DB.
Application/Web Servers	Oracle Web logic, IBM Web Sphere, JBoss, Glassfish, Apache Tomcat
Messaging Services	JMS, Active MQ, Rabbit MQ, Kafka
Build & Configuration Tools	Ant, Maven, Gradle, Jenkins, PCF, CCP.
Testing Tools	Junit, TestNG, GWT, Mockito, Jasmine, Karma, Mocha, Chai.
Version Control Tools	GIT, SVN, CVS, Bit bucket, TFS

Project Management Tools	JIRA, Rally, Microsoft Project
Cloud Technologies	AWS, EC2, EBS, S3, Docker, ECS, ECR, ELB, Auto Scaling, Cloud Front, VPC, IAM, RDS, Glacier, API Gateway, Cloud Watch, PCF.
Monitoring Tools	App Dynamics, Grafana, Splunk Dashboards.

PROFESSIONAL WORK EXPERIENCE

Amazon
Full stack Java Developer

Sep 2022 – Present

- Involved in Full stack development based on J2EE using Hibernate and **Spring Framework**.
- Designed and developed the **REST** based **Micro services** using the **Spring Boot**.
- Designed, configured, and managed public/private cloud infrastructures using **Amazon Web Services (AWS)**, which includes **VPC, EC2, S3, Cloud Front, ELB** and **Elastic Beanstalk**.
- Experience with Spring Boot, Spring MVC, Spring Security, and Spring Data for building enterprise-level applications.**
- Expert in HTML5/CSS3 development and have experience **React.js**, Responsive design.
- Worked in using **React JS components, Forms, Events, Keys, Router, Animations and Flux concept**.
- Implemented various authentication methods (e.g., OAuth, API Keys) in Postman to test secure APIs.
- Implemented **React JS** code to handle cross browser compatibility issues in Chrome, IE 7, 8, 9, Safari.
- Designed and implemented GraphQL APIs for efficient data retrieval and reduced network overhead.
- Proficient in configuring and managing Linux servers for Java application deployment, including Ubuntu, CentOS, and Red Hat.
- Implemented **Micro Services** based Cloud Architecture on **Amazon Web Services (AWS)** Platform and Cloud Foundry.
- Responsible for implementing the business requirements using **Spring Boot**, Spring Data and SpringSecurity.
- Worked with java libraries to access **AWS** facilities as Simple Storage service, Simple queue, and Simple DB.
- Used **React Js** for creating interactive UI's using one-way data flow, virtual DOM, **JSX**, React Native concepts and maintained states in the stores and dispatched the actions usingRedux.
- Used **Amazon Cloud Watch** to monitor **AWS** services and Amazon Cloud Watch logs to monitor application.
- Responsible for **ReactUI** and architecture. Including **Tree**, Building components **library**, **TableGrid** and Slide-View.
- Involved in the development of the User Interfaces using **HTML,JSP, JS, Dojo Tool Kit, CSS and AJAX**.
- Created web services and desktop applications to access and display data needed by support teams using **Ajax, JavaScript, React JS, Node.JS, CSS and HTML**.
- Integrated applications with relational databases (MySQL, PostgreSQL) and NoSQL databases (MongoDB), including CRUD operations and optimizations.
- Proficient in managing and querying directory services using LDAP protocol for enterprise-level applications.
- Implemented Web based pages and site design using **HTML, XHTML, DHTML, CSS, Themes, Master Pages, Site Map, XML, TSF, XSLT, JavaScript, jQuery, and Ajax**.
- Developed **Spring Batch** application for **batch** processing using Spring4.0 and improved the performance of the backend **batch** processes using Multithreading and concurrent package API.
- Jersey implementation of JAX-RS is utilized to develop **RESTful** Web services.
- Created tables, triggers, stored procedures, **SQL** queries, joins, integrity constraints and views for multiple databases, **Oracle** using Toad tool.
- Experience in setting up and configuring Java environments on Linux, including JDK installations and configuring environment variables (JAVA_HOME, PATH).
- Designed and developed a **JDBC** driver that intercepts a create view DDL parses it, converts it to a relational model, and stores in the database.
- Developed **RESTful web services** using **JAX-RS**, Apache CXF and spring frameworks and persistence using **Hibernate** and **JPA ORM** frameworks.
- Implemented LDAP-based authentication for Java-based applications to ensure secure user login processes.
- Created **React JS** directives, factories, and services for developing single page web applications.
- Implemented navigation using **Spring MVC** controllers, configured controllers using Spring MVC annotations and configuration files.
- Experience with setting up and configuring LDAP servers (e.g., OpenLDAP) on Linux systems to manage user authentication and access controls.

- Developed scalable applications using Scala and functional programming principles.
- Collaborated with UX designers and product teams to translate wireframes and prototypes into fully responsive, pixel-perfect React components, ensuring 100% adherence to design guidelines.
- Implemented performance profiling and debugging tools like Chrome DevTools, React Developer Tools, and Lighthouse to identify and resolve memory leaks, slow rendering components, and inefficient API calls, improving application efficiency.
- Built and maintained TypeScript-based frontend applications using frameworks like React and Angular.
- Involved in creating the comparison document for selecting the **API Gateway**.
- Developed, debugged, integrated, and deployed applications using **Eclipse (IDE)** and used **GIT** as a Version Control.
- Worked on container-based deployments using **Docker**, working with **Docker images**, **Docker Hub** and **Docker-registries** and **Kubernetes**.
- Triggered the automation jobs using Jenkins to get the cucumber **JSON** reports.
- Utilized Postman to create and run automated tests for RESTful APIs, ensuring correct functionality and data exchange between services.
- Involved in writing test scripts using java and executed it through selenium cucumber.

Environment: HTML, CSS, React Js, Hibernate, Node JS, Micro Services, AWS, EC2, S3 Lambda, Auto Scaling, Cloud Watch, SQL, JSP, AJAX, Spring boot, Json, JPA, HTML, CSS, Java Script, JQuery, Spring Boot, Docker, Kubernetes, Jenkins, Apache Kafka, Oracle, Eclipse, Git

WellsFargo

May 2021 – Aug 2022

- Involved in SDLC Requirements gathering, Analysis, Design, Development and Testing of application using AGILE (SCRUM) and Test Driven Development (TDD) development methodology.
- Involved in all phases of the Software development life cycle (SDLC) using Agile Methodology, designed use case diagrams, class diagrams, and sequence diagrams as a part of Design Phase.
- Developed UI using Swing, JSP, JSF, HTML, CSS, JavaScript, and JQuery.
- Integrated GraphQL with existing REST services and secured endpoints using authentication and authorization mechanisms.
- Developed scalable backend services using TypeScript with Node.js, ensuring type safety and maintainability.
- Added dynamic functionality to the application by implementing JQuery, Node.js.
- Developed and maintained reusable React component libraries that adhere to Material UI, Tailwind, and Bootstrap design standards, ensuring consistent UI elements across applications while reducing development time by 25%.
- Modularized front end CSS and JS code with Sass. Built a real time mouse/click user analytics web service with Node.js
- Developed web applications using Spring MVC, JQuery, HTML, Bootstrap and worked on Multithreading and Collections Framework including List, Map etc. Added interactivity to the UI pages using JavaScript.
- Worked with Core Java technologies Collections, Serialization, Generics, Annotations and Exception Handling to implement Back-End Business Logic including Entity Beans and Session Beans.
- Created a single page site to display the status of customer orders using React.js, Redux and EXT.js.
- Configured Spring security in the application to secure the method calls and RESTful webservices.
- Implemented JDBC API for communicating with database layer.
- Performed load and performance testing of APIs using Postman and integrated results into CI/CD pipelines.
- Responsible for installing JBoss, administering and support of staging, QA and Production environment and performed failover test. Deployed application in JBoss on UNIX.
- Developed and optimized GraphQL resolvers with DataLoader to minimize redundant database queries.
- Developed Request Handlers using Servlets as Controlling mechanism.
- Implemented CORS (Cross Origin Resource Sharing) using Node.JS and developed REST services using Node and Express, Mongoose modules.
- Developed Apache Camel middleware routes, JMS endpoints, Spring service endpoints and used Camel free marker to customize REST responses.
- Automated data workflows and optimized performance using Spark and cloud services.
- Used Rational Clear Quest for tracking the changes in the application.
- Involved in Unit Testing using JUnit and Integration of Use Cases.
- Used version tools like SVN for source code and project documents

Environments : Agile, HTML, CSS, JavaScript, JQuery, AJAX and Angular JS, XML, SWING, Nodejs, JSP, JAVA, Spring Frameworks, Hibernate, RESTful Web services, SOAP, Servlets, JBoss, JMS, Maven, Log4j, Jenkins, JIRA, Apache camel,

- Designed and developed Microservices business components using Spring Boot.
- Implemented RESTful Web services in Service Oriented Architecture (SOA) to retrieve data from client side and made REST API calls from Angular and parsed the data to client.
- Provided Security and Authorization using Spring Security.
- Setup and built AWS infrastructure various resources, VPC, EC2, S3, Dynamo DB and RDS in Cloud Formation JSON templates.
- Consumed REST based Microservices with Rest template based on RESTful APIs.
- Used Angular 6/8/9, HTML, JavaScript, Bootstrap, JQuery, JSF (Rich Faces/Prime Faces) programming for creating GUI interface of the web page and to get AJAX functionality for the website.
- Developed Open stack API to Integrate with Amazon EC2cloud-based architecture in AWS, including creating machine Images and worked on AWS, High Availability Practices and deploying backup/restore infrastructure.
- Performed form validations using reactive forms from the Angular 9 framework.
- Created Angular 9Directives, Components, Pipes, Injectable across the whole system, such as to build the custom filter.
- Implemented MVC design pattern to organize Angular controllers, custom directives, factories, and views.
- Created Angular 9 controllers, services and used Angular filters for filter functionality in search box and integrator functionalities.
- Implemented a Node.js server to manage authentication.
- Experienced first-hand the best/worst practices for integrating Microservices into existing system architecture.
- Worked with Node JS framework including authoring complex directives, services, controllers, and filters.
- Implemented unit and integration tests using Jest and Mocha to ensure code reliability and performance.
- Working on AWS Lambda for event driven workflow, working on Databases, Creating and Hosting micro services on EC2 Instances, and automating things using JSON Scripts, Creating Endpoints for the services, integrating through API's, involved in creation of APIs and API Gateways for by establishing Secure connection between the end-points.
- Used Micro service architecture, with Spring Boot based services interacting through a combination of REST and Apache Kafka message brokers.
- Expertise in Docker for convenient environment setup for development and testing. Installed Docker Registry for local upload and download of Docker images and even from Docker hub.
- Ran Log aggregations, website Activity tracking and commit log for distributed system using Apache Kafka.
- Created plugins to extract data from multiple sources like Apache Kafka, Database and Messaging Queues
- Involved in writing XML configuration file for Hibernate-Database connectivity.
- Used Hibernate mappings, relationships between tables and entity classes to access and update information in the database.
- Implemented modules into Node.JS to integrate with designs and requirements.
- Utilized Kubernetes and Docker for the runtime environment of the CI/CD system to build, test, deploy
- Packaged and deployed the application in IBM WebSphere.
- Used Maven building tool for creating EAR file deployed in application servers and used for dependency management of code in application.
- Defined AWS Security Groups which acted as virtual firewalls that controlled the traffic allowed to reach one or more AWS EC2 instances.
- Created Stored Procedures, functions, views, indexes and constraints, triggers required SQL tuning to reduce the response time in the application.
- As a version control tool used GIT and IDE as Eclipse to build the code.
- Built NoSQL schemas and maintaining sessions by MongoDB.
- To identify user login information written UNIX shell scripts.
- Developed and executed unit test cases using JUnit.
- For application logging and notification, tracing mechanisms used Log4J.
- To keep track of issues and tasks on individuals used JIRA ticketing system.

Environment: Agile, Scrum, Spring, MVC Design Patterns, Spring Boot, Spring Security, Spring Data, Hibernate, Java, JPA, JSP, Angular 6/8/9, HTML5, CSS3, JavaScript, AJAX, JQuery, Bootstrap, Node JS, Jenkins, Apache Kafka, XML, AWS, Microservices, Cassandra, RESTful, Docker, Kubernetes, SQL, Oracle 12c, MongoDB, GIT, JUnit, Maven, Log4j, JIRA, Eclipse, WebSphere.

EDUCATION

Texas State University: San Marcos, Texas

Jan 2021– Aug 2022

Masters in Computer Science

Relevant Coursework: Data Structures, Database Theory and Design, Algorithm Analysis and Design, Parallel processing, Distributed Systems, Object Oriented programming
