

Vishnu Nemani +1 (682) 408 7727

Software Developer

✉ vishnu.nemani31@gmail.com 📍 Arlington, TX in <https://www.linkedin.com/in/vishnu-nemani-38a6a018b/>

PROFESSIONAL SUMMARY

Dynamic Software Developer with **4+ years of expertise** in designing, developing, and deploying **high-performance applications** across diverse industries. Utilized **cutting-edge technologies** like **Spring Boot, AngularJS, and AWS** to deliver **scalable solutions** with **99.99% uptime** for real-time operations. **Proficient in crafting secure and efficient Web APIs**, optimizing database performance by up to **40%**, and ensuring seamless **cloud-based integrations**. Tailored **CI/CD pipelines**, enabling **rapid feature deployments** and reducing operational costs by **25%**.

SKILLS

- **Languages:** Java, Python, JavaScript, TypeScript, C, C++, SQL
- **Frameworks and Libraries:** Spring, Spring boot, Microservices
- **Web Technologies:** HTML, CSS, Bootstrap, React, Redux, Angular.JS, Node.JS
- **Databases:** MySQL, SQL Server, Oracle
- **Cloud Technologies (AWS):** AWS, Kubernetes, Cloud Formation, Lambda, EFS, IAM, EC2, S3, Route53
- **Tools:** GitHub, Postman, UML software, Service Now
- **Others:** Dell Boomi, Docker, Integration & Configuration management, Web Forms, APIs, Testing, CI/CD
- **Environment:** SDLC, Agile, Scrum, Waterfall, Windows, Mac OS, Linux

WORK EXPERIENCE

Picket, United States – Full-Stack Developer

Sept 2023 - Present

- **Developed and launched a real-time internal portal** for vendors and customers to **track property prices, place bids, and browse listings**, using **Angular** and **Java Spring Boot**, enabling **instant property updates and bid status notifications**.
- **Engineered** robust Web APIs utilizing Java 8/J2EE, TypeScript, Spring, SOAP, and REST technologies; enhanced data interchange between property listings and user dashboards to facilitate real-time updates for over **1 million users**.
- **Optimized database operations for real-time property tracking** by crafting **SQL and NoSQL queries**, such as **stored procedures and indexes**, improving query response time by **40%** for high-volume transactions.
- **Created reusable components** using **React.JS**, enabling consistent UI elements across the portal and reducing feature development time by **30%** while maintaining **real-time interactivity** for customers and vendors.
- **Implemented CI/CD pipelines** via **GIT** and **Jenkins**, enabling **real-time code deployments**, ensuring new features like **property alerts and bid tracking** were available immediately after development.
- **Deployed AWS Lambda functions** to execute **real-time property security and data validation checks**, reducing costs by **25%** and delivering instantaneous updates on property statuses.
- **Fabricated a load-testing environment** with **Node.JS**, simulating **real-time portal usage** for over **10,000 concurrent users**, ensuring the system's scalability and reliability during peak bidding hours.

Amazon, United States – Software Developer

Dec 2022 – Aug 2023

- **Formulated** scalable **cloud-based applications** and services for **AWS customers**, enabling seamless data processing for applications handling over **200,000 daily user interactions** with **99.99% uptime**.
- **Architected** code using **Java** and **Python**, reducing **execution time** by **35%** through efficient algorithms and clean, modular design, ensuring long-term maintainability and readability.
- **Augmented AWS services**, including **EC2, S3, Lambda, and DynamoDB**, to improve **system performance** by **40%** while cutting operational costs by **25%**, supporting business scalability.
- **Resolved complex technical issues** impacting **real-time customer services**, providing timely solutions that minimized downtime to less than **5 minutes** per incident and improved customer satisfaction scores by **30%**.

- **Facilitated in building internal tools and automation frameworks**, enhancing developer productivity by **20%** and ensuring code consistency through automated validation pipelines.
- **Led the development** of frontend and backend systems, leveraging **Java** and **TypeScript** to create scalable, secure applications that supported **real-time transaction processing** for **global clients** with zero data integrity issues.

Jade Global, India – Jr. Software Developer

Jan 2020- Aug 2021

- **Collaborated across teams** to deliver end-to-end **integration solutions**, driving the **entire lifecycle** from **design** and **development** to **ongoing support**, ensuring seamless integration for a **global supply chain system** supporting **over 500,000 transactions daily**.
- **Architected robust integration workflows** using **Dell Boomi**, enabling real-time data synchronization between **enterprise systems**, achieving **95% faster data processing** compared to legacy solutions.
- **Configured connectors** within **Dell Boomi** to establish seamless connections with **external systems, databases, and APIs**, facilitating accurate and reliable data flow for **customer and vendor operations**.
- **Executed rigorous unit and system testing**, validating integration workflows for **100% accuracy** and reliability, ensuring error-free data transfers for **mission-critical business processes**.
- **Monitored integration performance metrics** and **optimized strategies**, reducing **latency** by **40%** and enhancing overall efficiency for **real-time inventory tracking systems**.

Transol Systems Pvt. Ltd., India – Java Developer

Jan 2019 – Dec 2019

- **Devised** scalable database schemas, creating **efficient tables** and **complex queries** in **PostgreSQL**, enhancing data retrieval efficiency by **30%** for real-time reporting systems.
- **Spearheaded cross-browser compatible pages** leveraging **jQuery**, **JavaScript**, and **AngularJS**, ensuring a **responsive user interface** that achieved a **20% increase in user engagement** across devices.
- **Built and integrated business components** within the **Spring Framework**, streamlining application workflows and improving process automation for a **multi-tenant e-commerce platform**.
- **Deployed the application** using **Docker containers**, ensuring seamless **scalability** and **portability**, reducing deployment time by **50%** and enabling consistent performance across environments.
- **Engineered and executed** an enterprise-grade application using **Spring Boot** with **JPA** and **Spring MVC** to develop **RESTful APIs**, seamlessly integrated with **Hibernate** for efficient **ORM capabilities**, handling **1 million database transactions daily**.
- **Managed project workflows** by tracking user stories and tasks in **Jira**, ensuring timely delivery of features and achieving **95% sprint completion rates** in an Agile development environment.

EDUCATION

University of Texas at Arlington, United States - Masters in Information Systems

Dec 2022

Gitam University, India – Bachelor in Computer Science

June 2020
