

SUMMARY

Software Engineer with 4 years of experience in designing, developing, and deploying scalable and secure software solutions. Proficient in Core Java, Python, JavaScript, and C++, with expertise in Spring Framework, Microservices, and Cloud Technologies (AWS, Docker, Kubernetes). Skilled in building RESTful APIs, responsive UIs (React, Bootstrap), and cross-platform mobile applications (Flutter). Experienced in Agile methodologies, CI/CD pipelines (Jenkins), and database optimization (MySQL, PostgreSQL, Hibernate). Delivered 10+ microservices, reduced deployment times by 30%, and improved system performance by 20%. Passionate about leveraging cutting-edge technologies to solve complex problems and deliver high-quality software solutions.

SKILLS

Methodology: SDLC, Agile, Waterfall
Languages: Core Java, Java 8, Python, C++, PHP, JavaScript, HTML5, CSS
Frameworks: Spring MVC, Spring Boot, Spring Security, Microservices, Docker, Kubernetes, Terraform, Node.js, Hibernate, JPA, Flutter, React, Bootstrap, jQuery
IDEs: NetBeans, IntelliJ IDEA, Visual Studio Code
J2EE Technologies: Servlets, JSP, JSTL, JavaBeans, JDBC
Web Technologies: Ajax, JSON, XML
Application Server: Apache Tomcat, Web Sphere
Cloud Technologies: AWS (IAM, EC2, RDS, EBS, Aurora, ElastiCache, CLI, Route 53, S3, ECS, ECR, Lambda), Azure
Databases: MySQL, PostgreSQL, NoSQL
Build /Other tools: UML, MS Visio, Maven, Gradle, Jenkins, Junit
Version Control Tools: Git, GitHub

EDUCATION

Master of Science in Information Technology and Management	May 2024
The University of Texas at Dallas	
B. Tech in Computer Engineering	May 2021
UKA TARSADIA University, India	

EXPERIENCE

ServiceNow, TX | Jan 2024 - Current | Software Engineer

- Designed and delivered software solutions using Agile methodologies, reducing project delivery time by 20% while improving team collaboration and efficiency.
- Developed and optimized backend systems using Core Java and Java 8 features like Lambdas and Streams, improving code performance by 15%.
- Built scalable and secure enterprise applications using Spring MVC, Spring Boot, and Spring Security, reducing security vulnerabilities by 25%.
- Designed and deployed 10+ microservices using Docker, achieving 30% faster deployment times and improved system scalability.
- Deployed and managed cloud-based applications on AWS (EC2, S3, Lambda, RDS), reducing infrastructure costs by 20% while ensuring high availability.
- Implemented CI/CD pipelines using Jenkins, automating build and deployment processes and reducing manual errors by 40%.

Ican Studioz App Solutions LLP, India | July 2021 - Oct 2022 | Software Developer

- Developed 5+ scalable web applications using Python for backend logic and JavaScript for front-end interactivity, improving user engagement by 25%.
- Designed and implemented responsive user interfaces using React and Bootstrap, reducing page load time by 30% and enhancing user experience.
- Built RESTful APIs and server-side applications using Node.js, improving application performance by 20% and handling 10,000+ concurrent users.
- Optimized database queries and managed relational databases (MySQL, PostgreSQL), reducing query response time by 35%.
- Utilized Visual Studio Code for development and debugging, increasing developer productivity by 15% through efficient code management and debugging tools.

Infinite Infolab, India | Jan 2020 - July 2021 | Software Engineer

- Developed high-performance system-level applications using C++ and built 8+ web applications using PHP, achieving 20% faster execution times.
- Orchestrated 15+ containerized applications using Kubernetes and automated infrastructure provisioning with Terraform, reducing deployment time by 40%.
- Created 3+ cross-platform mobile applications using Flutter, reducing development time by 30% and ensuring consistent performance across platforms.
- Implemented Hibernate and JPA for database interaction, reducing boilerplate code by 50% and improving data retrieval efficiency.
- Enhanced web application interactivity using Ajax and JSON, reducing server load by 20% and improving user experience.
- Deployed and managed 10+ Java-based web applications on Apache Tomcat, ensuring 99.9% uptime and high availability.
- Automated build processes using Maven and Gradle, reducing build time by 25% and streamlining dependency management.
- Wrote 200+ unit tests using JUnit, improving code coverage to 90% and ensuring robust, error-free software delivery.

PROJECTS

Cloud-based Inventory Management System | Java, Spring Boot, AWS Lambda, AWS RDS, MySQL, Docker, JIRA

- Collaborated with a cross-functional team to design a cloud-based inventory system using Java and Spring Boot, leveraging AWS Lambda for serverless execution, reducing system downtime by 30% and improving scalability.
- Optimized database performance by implementing MySQL in a multi-region architecture using AWS RDS, enabling real-time data synchronization and reducing query latency by 25%.

Data Extraction from Reddit Powered by Athena | Python, Apache Airflow, Docker, AWS Athena

- Developed an ETL pipeline for Reddit data using Apache Airflow, Docker, and Python, facilitating efficient data extraction and storage into AWS S3, streamlining insight generation.
