

Wishnu Vardhan Ravi

Salesforce Developer/Admin

St. Louis, MO, USA | +1 (636) 515-6727 | wishnu@aogjob.com

Summary:

Salesforce Lightning Developer with over 5+ years of comprehensive experience in CRM solutions and software development across multiple organizations. Highly proficient in designing, developing, and implementing Salesforce applications using Apex, Visualforce, and Lightning Web Components (LWC). Demonstrated expertise in managing full lifecycle projects from design through to testing and deployment, utilizing advanced integration techniques with multiple platforms including Jitterbit, MuleSoft, and external databases. Skilled in optimizing CRM operations and system performance through custom solutions and automation, improving data management, user experience, and operational efficiency. Adept in Agile methodologies and a leader in driving continuous integration and delivery using tools such as AWS, GitHub, Jenkins, and Chef.

Technical Skills:

Salesforce CRM: Workflows and validation rules, Approval Processes, Sales, Service, Profiles, Roles, Permission sets, Relationships, Custom objects, Dashboards, Reports, Search Layouts, Page Layouts, Record Types, Process builders, Reporting, Platform Events, Sales, and Service Cloud, Data loader, Workbench, Lightning Flows

Force.com Tools: LWC, CPQ, VS Code, Developer Console, Force.com, Data Loader, Asynchronous Process, Batch, Schedule, Queueable Apex's, Lightning and Lightning web components, Aura, Visualforce, Apex, Triggers

Web Design Tools: Eclipse, Spring STS, IntelliJ, JBoss Developer Studio, SQL Query Analyzer, Adobe Photoshop, Dreamweaver, Tortoise SVN, MS Office, Visio 5.0, Adobe Acrobat Pro

Salesforce Tools: Force.com Eclipse IDE Plugin, Change Sets, Import Wizard, Force.com Data Loader, Workbench, Dataloader.io, Force.com Excel Connector, Connect for Outlook, Exchange Sync, Informatica Cloud Data Wizard, Adobe E sign, S-Docs, Conga, CRM fusion

Languages: SOQL & SOSL Language, Apex Language (Classes, Trigger, Batch, Schedule), Java, JavaScript, jQuery, Salesforce CLI, Salesforce DX

Web Technologies: HTML, XML, CSS, JavaScript, SOAP, REST, AppExchange, AWS, Jenkins, APIs (REST/SOAP).

Database: SQL Database, Oracle, Data Migration, DocuSign

Deployment tools/Security tools: Change Sets, Jira, ANT Tool, Jenkins, Postman, Git, GitHub, VS Code, Check Mark tool, COPADO, CI/CD tools, MuleSoft, unit & integration testing

Education:

Master's in Applied Computer Science | May 2023

Southeast Missouri State University, MO, USA

Bachelor's in commerce and computers| May 2017

Acharya Nagarjuna University, AP, India

Professional Experience:

Cox Automotive Inc, Atlanta, GA

Feb 2024 - Current

Role: *Salesforce Developer*

- Developed multiple Visualforce pages and Apex controllers, enhancing functionality through custom Apex triggers, batch Apex processes, and scheduled jobs to optimize CRM operations.
- Led the design and implementation of data archiving solutions using Batch Apex and Apex Scheduler, improving data management and system performance.
- Executed comprehensive testing protocols including unit, integration, regression, and UAT to ensure system adherence to business specifications and quality standards.
- Enhanced Salesforce CRM capabilities by integrating REST API testing using tools like Rest Explorer and POSTMAN, and undertaking the development of advanced SFDC reporting tools.
- Streamlined workflow automation by utilizing Salesforce Lightning Process Builder, creating custom workflow rules, email alerts, and field updates to boost process efficiency.
- Managed release cycles and data migration projects across various Salesforce instances, leveraging Data Loader for scheduled data backups.
- Developed and implemented numerous Lightning Web Components (LWC), enhancing UI and UX for service case management and community projects.
- Integrated Salesforce with external applications using Jitterbit and MuleSoft, ensuring seamless real-time data exchange and maintaining data integrity across systems.
- Configured Single Sign-On (SSO) solutions and implemented multiple Salesforce Cloud solutions, including Sales, Service, and Marketing Clouds, to unify user experiences across platforms.

- Set up and maintained continuous integration and delivery pipelines using AWS, GitHub, Jenkins, and Chef, enhancing development operations and team collaboration in an Agile environment.

Epic Systems, CA, USA

Feb 2023 - Jan 2024

Role: *Salesforce Developer*

- Coordinated the implementation and migration of Salesforce Service Cloud, focusing on case and entitlement management. Transitioned from Salesforce Classic to Lightning Experience, significantly enhancing business operations and user interaction.
- Created high-volume customer and partner portals using Visualforce, Apex, and Lightning components. Improved functionality and user experience through tailored solutions.
- Managed the design and deployment of custom objects, entity-relationship data models, validation rules, and page layouts. Ensured these elements met specific application needs, enhancing overall performance.
- Led Salesforce CPQ implementations, resulting in a 30% increase in sales efficiency. Optimized the quoting process, significantly reducing the quote-to-cash cycle time.
- Extensively worked on Salesforce Lightning Web Components (LWC) and Aura Components. Conducted end-to-end testing to ensure robust application performance.
- Utilized ETL scripts to integrate data from external systems like the Denodo Database into Salesforce. Enhanced data accuracy and availability, improving business process efficiency.
- Initiated end-to-end release management processes using tools like COPADO and Jenkins. Implemented CI/CD practices to streamline workflows and reduce deployment errors.
- Experienced in Agile and Scrum methodologies, actively participating in all phases of the software development lifecycle, including planning, development, testing, and deployment.
- Integrated Salesforce with multiple external applications such as Oracle, SAP, DocuSign, and Geo-Pointe, significantly enhancing system capabilities and user satisfaction.
- Managed customer interactions through Salesforce Chatter and custom Lightning community pages, improving communication and collaboration among internal teams.
- Developed and maintained project management tools, including JIRA workflows and Git repositories. Ensured efficient coordination and execution of multiple projects simultaneously.
- Provided comprehensive Salesforce training and support, including UAT demos. Managed user profiles, permission sets, roles, and sharing rules to ensure optimal engagement and adherence to best practices.

Sigma Info Solution | Bangalore, India

August 2017 - Jun 2021

Role: *Salesforce Admin/Developer*

- Expert in configuring and administering Salesforce to align with business requirements, optimizing functionality and performance across departments.
- Led the successful migration from Salesforce Classic to Lightning Experience, utilizing tools like Data Loader and CLI for efficient data transitions.
- Designed and developed over 30 custom Lightning Web Components (LWCs) using the Salesforce Lightning Design System to enhance user experience and functionality.
- Managed Salesforce Service Cloud and implemented high-volume customer and partner portals, including custom Visualforce site deployments.
- Established version control practices using Git and GitHub across multiple development teams, integrating Salesforce with Visual Studio for enhanced development processes.
- Created and customized over 25 Visualforce pages with custom controllers, significantly improving data processing efficiency and user interaction.
- Designed and managed Salesforce Marketing Cloud for numerous campaigns, increasing engagement by 30% with Email Studio, and effectively managed document workflows with Conga Composer.
- Authored and executed comprehensive integration test plans and user acceptance tests, maintaining a minimum code coverage of 85% to ensure software quality and reliability.
- Proficient in leading software development lifecycles using Agile and Scrum methodologies, managing multiple Salesforce environments.
- Developed custom Apex classes and managed complex business solutions, including implementing Apttus CPQ to boost quote-to-cash efficiency by 20%.
- Automated business processes using Salesforce Flow and Process Builder, reducing manual tasks by 30% and enhancing operational accuracy and efficiency.
- Collaborated with stakeholders to translate business needs into effective Salesforce configurations, while also leading system maintenance to ensure platform reliability and security.

Certifications:

- Certified Salesforce Platform Developer-1.
- Certified Salesforce Platform Developer-2.
- Certified Service Cloud Consultant.
- Certified Salesforce Administrator.
