

Xander Nguyen, Software Engineer

Aurora, United States, (630) 890-5585, xander.nguyen313@gmail.com

PROFILE	Dynamic Software Engineer with 3 years of experience, specializing in optimizing application performance and enhancing software quality. Proven ability to refactor test suites and streamline API interactions, significantly improving efficiency. Expertise in automated job processing and implementing test-driven development practices, ensuring robust and reliable software solutions. Committed to leveraging innovative technologies and methodologies to drive project success and deliver exceptional results.
---------	---

EMPLOYMENT HISTORY

Mar 2022 — Dec 2024	Software Engineer, CVS Health - Achieved a 100% improvement in Spring Integration test efficiency by refactoring test suites to minimize application context reloads, significantly reducing execution time and enhancing test performance. - Optimized API endpoints to reduce HTTP requests from Angular web applications, consolidating multiple calls (n-calls) into a single call during app load, significantly improving performance and efficiency. - Designed and implemented an automated batch job to process over 50,000 patient records, calculate medication adherence, and generate detailed reports for clients, eliminating the need for manual effort. - Reduced batch job execution time from over 10 hours to 30 minutes by implementing query optimizations and leveraging Spring bulk insert, significantly enhancing processing efficiency. - Ensured the quality and reliability of our software products through the implementation of test-driven development practices. - Integrated Cypress end-to-end testing into the Angular application to ensure long-term stability and prevent code-breaking changes, enhancing overall application reliability. - Achieved 95% code coverage for both back-end and front-end applications by developing comprehensive unit tests using JUnit 5 and Jest frameworks. - Contributed to the migration from Jenkins to GitHub Actions, enabling automated build, test, publish, and deployment processes, and improving the efficiency and reliability of the CI/CD pipeline.
Nov 2021 — Mar 2022	Software Engineering Cohort, Interapt - Developed a backend application that queries data from IMDB API and allowed users to create a library of their favorite movies using Spring Boot Framework. - Created an interactive Tic-Tac-Toe game using HTML, CSS, and JavaScript. - Implemented OAuth 2.0 login model, enhancing user authentication and reducing security vulnerabilities.

EDUCATION	Computer Science, Lewis University	Romeoville, IL
	Associate in Applied Science, College of DuPage	Glen Ellyn, IL

SKILLS	HTML/CSS	Ruby on Rails
	JavaScript	Git
	Java	Visual Studio Code
	SQL	IntelliJ
	TypeScript	Postman
	Angular	Jenkins
	Spring Framework	Github Actions
