

YEMMY FAGBAMIYE

Power BI /Power Apps Developer /Analyst

📍 Houston, TX, US
☎ +1 713-909-6879
✉ yfagbamiye@gmail.com

Summary

Senior Power BI Developer with over 10 years of extensive experience creating, analyzing, executing and designing visual reports. Expertise in SQL 2005/2008 Business Intelligence [BI], and experience with SAP BW and HANA. Also proficient in data warehousing concepts, and have worked extensively with relational databases like Oracle 11g/10g and IBM DB2 etc. Strong knowledge of visualization, data warehousing and Big Data solutions and how data architecture fits into larger DW and DB implementation projects as a major component of the effort. My clients include JNJ, Mosaic, GMC, Hospira, Marathon Oil, US Navy, Shell, Monsanto, McKesson and Biotech companies.

Work experience

2013-11 - present

Lead Power BI Developer/ Architect-CGI

Environment - Power Apps, Power Automate, Azure and AWS

Tools : Power BI

- Developed visual reports, dashboards and KPI scorecards using Power BI desktop and the Power BI Service.
- Designed innovative approaches to view and interact with data for analysis.
- Created complex transforms to pull the data from various databases and data sources.
- Created various reports using Power BI and involved in performance tuning.
- Migrated multiple reports from Excel, Tableau, Spotfire and BO to Power BI.
- Developed complex calculated measures using Data Analysis Expression language (DAX).
- Worked on all phases of data development lifecycle, from gathering requirements, implementation, testing, training and support.
- Created functional requirements as input to application design while identifying the type of visualization that best suits the client's needs.
- Attended project reviews with business analysts to ensure functional requirements are met.
- Designed and developed ETL SSIS packages to facilitate incremental load process.
- Worked with Microsoft team on product limitations and communicated limitations and tool capabilities to the business stakeholders
- Worked in Agile Scrum Methodology as part of the global BI team.

SR. Spotfire Developer

2012-06 - 2013-11

Halliburton, Houston, US

Environment - NSQL, Oracle, Teradata

Tools - Spotfire Professional, Web player, SharePoint.

- Developed complex Spotfire Dashboards and reports using Tibco Spotfire Professional.
- Created various complex Cross tables, Bar Charts, Line Charts and Heat maps for the HR Department.
- Conducted Unit testing of the reports.
- Responsible for migrating reports from Development to Acceptance/ Production server.
- Interacted with the business users and documented their query and reporting needs, then analyzed the data and business logic underlying the requirements.
- Published reports on the server for Tableau readers and granted tab level access.
- Analyzed and reviewed client data to identify KPI's pertaining to operations.
- Worked in Agile Scrum methodology as part of the global BI team.
- Attended project reviews with business analysts [SME's] to ensure functional requirements were met.
- Performed troubleshooting and optimized reports and stored procedures.
- Responded to ad-hoc reporting and data requests from enterprise HR, MM and Financial personnel.
- Served as end user support for Tibco Spotfire user base.
- Produced time sensitive reports for HR, MM and Financial personnel.
- Analyzed existing reports and identified opportunities for them to be upgraded to Spotfire Professional.

BI Consultant

2009-02 - 2012-06

Hewlett Packard [HP], Houston, US

Environment - SSIS, SSAS, SSRS, Tibco Spotfire, SQL 2005/2008 and Oracle

Tools - Visual Studio, TOAD, Tableau, SSRS, Spotfire Professional

- Ensured that source to target transformations maintained data integrity.
- Developed SSIS packages and TSQL stored procedures for data loading, integration, data access and external data feeds.
- Dimensional data modeling star schemas, key performance indicators and other OLAP considerations.
- Performed performance tuning and optimization of SQL databases.

- Extensive experience scheduling SSIS packages.
- Strong analytical and troubleshooting skills.
- Performed backend testing by SQL statements with Oracle to ensure correct data was returned by application.
- Created SQL server stored procedures, functions, views and tables to build ETL feeds.
- Configured slow and fast changing dimensions.
- Worked on report design, query design, testing and query performance tuning using aggregates and indexes.
- Involved in requirement gathering and conceptual design for developing the data warehouse.
- Developed complex dashboards and reports using Tibco Spotfire Professional.
- Performed user training on reports created in SSRS and Tibco Spotfire Professional.

SAP BW Consultant

2001-01 - 2009-01

BearingPoint, Houston, US

Environment - SAP CRM, SAP BW, Oracle, Teradata

Test tools - TOAD, Visual Studio, SSRS, Tibco Spotfire

Clients - Schlumberger, Marathon Oil, JNJ, Mosaic, GMC, Citibank, AIG

- Gathered requirements for SAP BW implementation with major oil company as the client.
- Designed and maintained Infocubes, ODS Objects, Infosources Infopackages and transfer rules for the datawarehouse solution.
- Implemented data warehousing solution for FI/CO, SD, HR and MM modules.
- Involved in preparing the AS-IS and TO-BE business process documents.
- Designed logical data models based on functional requirements and load strategy specifications to capture source data, data consolidation mechanisms and integration scenarios for reporting purposes.
- Worked on Report Design, Query Design, Testing and Query Performance Tuning using Aggregates and indexes.
- Defining ODS objects, Aggregates, Multicubes and Data loads from various source systems like R/3 systems, Non R/3 systems and Legacy systems and flat files.
- Created Datasource enhancements, Generic extractors, Logistics Cockpit configuration and customization, Business Content, User exits, and customized delta built up for the datasources.
- Well versed with EDI, ALE, IDOC interfacing technologies, and experience in Troubleshooting Dataloads and Update routines using SAP's OSS notes.
- Business Analyzer, Infocube Query, Web Application Designer, Business Explorer for Reporting

Database Admin

1999-09 - 2000-12

Barclays Bank, London, UK

Environment - SQL Server, Access

- Maintained multiple, interacting MS SQL Databases on multiple servers.
- Performed DBMS installation and patching.
- Was responsible for backup of servers and recovery.
- Created stored procedures from user requirements.
- Performed server installation and software distribution.
- Performed ad-hoc requests for data manipulations, imports, exports, and updates.
- Enforced best practices in database administration and security protocols.
- Tracked and resolved data user issues and concerns, such as helping to extract data and develop reports.
- Interacted with internal clients to develop database solutions that met business requirements.

Education

University of London

1991-08 - 1996-09

Bachelor of Science in Computer Science and Minor in Accounting.

Competence

- Database Types: SQL, Hive LLAP, Salesforce, Azure Data lake, Snowflake, SAP HANA and Teradata.
- Reporting Tools: Power BI, Power APPs/Power Automate, Tableau and Tibco Spotfire Professional, Power Apps, Power Automate
- Methodologies: Agile Scrum and Waterfall.
- Skills: T-SQL, DAX, MDX, Oracle, MS SQL Server Integration Services (SSIS), SAP BW SAP HANA, XML, PL/SQL, Teradata, Business Objects, Salesforce and Java.
