WORK EXPERIENCE

Ford Motor Company

USA

Full Stack Developer

Jun 2024 - Present

- Developed and maintained RESTful APIs with Node.js and C#, facilitating seamless integration across platforms; successfully supported the deployment of services that handled over 1 million requests per day with an uptime of 99.9%.
- Collaborated with cross-functional teams to streamline development processes through the implementation of Agile methodologies, reducing project delivery times by 25% while maintaining code quality standards as evidenced by a decrease in bug reports by 35%.
- Optimized database management systems using PostgreSQL and MongoDB, which led to a significant increase in system reliability; reduced downtime by 50% during peak usage periods while handling data transactions exceeding 2 million per day.
- Optimized existing codebases through advanced JavaScript techniques, resulting in a reduction of server response time by 35% and contributing to a decrease in operational costs by \$50,000 annually.
- Diagnosed and resolved over 1,200 critical bugs within a complex web application framework, enhancing overall system performance by 40% and reducing user-reported issues by 75%.

Medtronic

India

Full Stack Developer

Jan 2019 - Jul 2022

- Optimized database queries across Microsoft SQL Server and MongoDB platforms for over 50 applications, achieving a reduction in data retrieval times by up to 60% while ensuring compliance with best practices for security and efficiency.
- Collaborated with cross-functional teams to integrate AWS services such as EC2 and S3 into existing projects, which improved deployment efficiencies by 60% and reduced operational costs by \$150K annually through enhanced resource management.
- Implemented RESTful APIs leveraging Spring Boot, which facilitated seamless integration with third-party services and increased application scalability by 60%, ultimately supporting an increase in user engagement by 30%.
- Spearheaded the development of a scalable web application using Angular and Spring Boot, resulting in a 40% improvement in load times and enabling user growth from 10,000 to over 50,000 monthly active users within six months.
- Optimized existing test suites by refactoring over 2,000 lines of legacy code, resulting in a reduction of testing time by 30%, which enabled faster release cycles for new features across multiple projects.
- Engineered innovative solutions for front-end functionality that improved overall site performance, contributing to a 25% reduction in bounce rates while enhancing accessibility for over 10,000 users.

SKILL

Programming Languages: • Java, JavaScript, C++, Kotlin, Swift, J2EE, C#, Python

Web Technologies: • HTML5, CSS, AJAX, JSON, jQuery.

Frontend Frameworks/Libraries: • Angular, React.js, Bootstrap, Tailwind

Backend Technologies: • Angular, React.js, Bootstrap, Tailwind

Databases: • Microsoft SQL Server, MySQL, MongoDB, Oracle, PostgreSQL, DB2

Tools: • Git, Android Studio, XCode, Figma, Visual Studio Code, JIRA, AWS, Postman, Junit, Eclipse

Cloud Computing: • AWS (Lambda, EC2, SNS, RDS, S3, SQS, Elastic Load Balancing), GCP, Azure, Firebase.

Other Skills: • Data Structures and Algorithms, Problem-Solving, Clear Communication, Critical Thinking, Strategic Thinking, Team Collaboration, Time Management

EDUCATION

The University of Texas at Arlington

Arlington, TX

Master of Science in Computer Science

Graduation Date: May 2024

Gujarat Technological University

India

Bachelor of Engineering in Computer Engineering

Graduation Date: May 2022
