SUMMARY

Experienced iOS Engineer with over 8 years of expertise in designing, developing, and deploying high-quality mobile applications. Skilled in both native iOS development (Swift, Objective-C). Proven ability to lead cross-functional teams and manage complex projects from ideation to deployment. Passionate about optimizing app performance, enhancing user experiences, and implementing scalable architecture.

SKILLS

Programming Languages:	Swift, Objective-C, Java, Python, JavaScript, Kotlin, Dart
Architecture:	MVC, MVVM, MVVM-C, MVP, VIPER, Clean Architecture, Reusable Component Design, Singleton, Delegation, Coordinator, Protocol-Oriented Programming, SOLID principles
Mobile Frameworks:	iOS, tvOS, WatchOS, VisionOS, UIKit, SwiftUI, AppKit, Cocoa Touch, Flutter, React Native, Combine, Async/Await, RxSwift, CoreLocation, MapKit, Core Animation, AVFoundation, PhotoKit, Core Image, OpenGL, Metal, RealityKit, SpriteKit, ARKit, Google Maps SDK
Database:	Realm, CoreData, SQL, NoSQL, Firebase, MongoDB
Tools:	Git, Bitbucket, GitHub, GitLab, Jira, Confluence, Fastlane, Bitrise, Jenkins, Xcode, Visual Studio Code, Android Studio, IntelliJ IDEA, Docker, Maven, Gradle, CocoaPods, Carthage, Swift Package Manager
JavaScript Libraries:	Redux, React Saga, Redux Dev Tools
CI/CD	Fastlane, Bitrise, Jenkins, GitHub Actions, Travis CI
Cloud	Microsoft Azure, Firebase, Azure IoT Hub, Azure Functions, Azure Search, Computer Vision, Text Analytics, Microsoft Bot Framework
Testing	XCTest, XCUITest, Code Profiling, Performance Optimization
Other:	Agile, RESTful APIs, GraphQL, Microservices, Crashlytics, Instruments, Apple Push Notification Service (APNs), User Notifications, Apple's Human Interface Guidelines, Mentorship

WORK EXPERIENCE

Folio3 Software

Senior iOS Engineer

August, 2020 - Present

- Spearheaded development of over 10 enterprise-grade applications for iOS and React Native, incorporating scalable architectures like MVC, MVVM and VIPER to ensure code reusability and efficient debugging, reducing code duplication by 30%.
- Engineered robust Flutter SDKs and Plugins that integrated native functionalities on both iOS and Android platforms, allowing seamless cross-platform capabilities and reducing integration time for product teams by 70%.
- Worked closely with Product, Design, and Backend teams to optimize backend integrations, resulting in a 15% decrease in app latency, leading to an enhanced user experience across both native and cross-platform applications.
- Implemented Agile methodologies and applied SOLID principles across all development projects, which reduced troubleshooting and debugging time by 40%.
- Created comprehensive technical documentation, including architecture diagrams, code annotations, and deployment guides to expedite cross-team understanding. Also mentored junior developers in design patterns, code quality, and clean architecture, ultimately improving the team's code consistency and quality.
- Automated build, testing, and deployment workflows using CI/CD tools (Fastlane, Jenkins, GitHub Actions, Travis), which enhanced productivity by 20% and minimized manual errors.
- Conducted performance audits and applied optimizations, utilizing tools such as Instruments to boost app performance and reduce load times.
- Developed reusable components in React Native for enhanced front-end flexibility, allowing quick adaptations to client requirements and ensuring smooth project scaling across iOS and Android.

- Published and managed the delivery of over 10 iOS apps on Appstore.
- Published technical blogs and led knowledge-sharing sessions focusing on iOS, React Native development and Software Engineering best practices, enabling skill enhancement across the development team.

LiveBazaar

Senior iOS Engineer

Remote

December, 2018 - July, 2020

- Led a team of 7 in building a high-performance iOS application for a large-scale e-commerce platform, focusing on modularized components to enhance reusability, improve user experience, and reduce build times by 30%.
- Optimized performance by following Apple's Human Interface Guidelines, streamlining UI/UX components, and implementing lazy loading techniques, leading to a 20% increase in app speed and responsiveness.
- Created extensive technical documentation, including architecture diagrams, code standards, and usage guides for reusable components, which reduced new developer onboarding time by 25% and enhanced team productivity.
- Conducted detailed code profiling using Instruments, and other debugging tools to identify and resolve performance bottlenecks, resulting in a 30% improvement in app efficiency and faster load times.
- Led efforts to improve app quality and reliability, achieving over 90% code coverage with XCTest and XCUITest. This rigorous testing approach reduced post-release bugs by 15% and improved user satisfaction.
- Integrated multiple third-party frameworks, such as Cocoapods and Swift Package Manager (SPM), to expand functionality and maintain high performance, reducing development time for new features by 20%.
- Oversaw CI/CD pipeline setup using Jenkins and GitHub Actions, automating build, test, and deployment processes to streamline development cycles and reduce manual errors, which increased release frequency by 15%.

AboutXtreme

iOS Developer

June 2016 - December 2018

- Developed customer-facing mobile applications with iOS and React Native and REST APIs using Node.js and MongoDB, enhancing app responsiveness and user experience for retail clients.
- Developed and deployed cloud-based solutions using Microsoft Azure for multiple client projects, focusing on scalable architecture and efficient data handling.
- Designed iOS Applications for IoT solutions with Azure IoT Hub, leveraging Azure Functions to process real-time sensor data, enabling actionable insights for industrial automation.
- Developed enterprise-grade chatbots and virtual assistants using Microsoft's Bot Framework and Cognitive Services, enhancing customer engagement for finance and e-commerce clients.
- Implemented Azure Search to make unstructured data searchable, using Computer Vision and Text Analytics to extract key insights from images, videos, and documents, improving data accessibility by 40%.

PROJECTS

Indoor Navigation using ARKit and SLAM (iOS) *ARKit, iOS, SLAM, SceneKit, RealityKit, Swift, CoreData, CoreAnimation, MXPannel*

Led the development of an innovative iOS application utilizing ARKit and SLAM algorithms for indoor navigation. Enabled users to effortlessly navigate complex indoor environments by implementing advanced Computer Vision and AI techniques for real-time position tracking and augmented reality (AR) path rendering. Integrated SceneKit and RealityKit for immersive AR experiences, optimized performance with CoreAnimation, and managed persistent data using CoreData.

Flutter Plugin for Jibestream SDK *Flutter, Dart, iOS, Android, Firebase, Cocoapod*

Developed a cross-platform Flutter plugin that bridges the Jibestream SDK functionalities for both iOS and Android platforms. Empowered Flutter applications to seamlessly implement native SDK features, enhancing UI components and utility functions. Leveraged Dart to wrap native SDKs, integrated Firebase for backend support, and managed dependencies using Cocoapods.

LiveBazaar *Swift, iOS, Combine, XCTest, SwiftUI, Apple Pay/PayPal/Stripe, Firebase Cloud Messaging, Google Analytics*

Architected and led a team of seven developers to create a modular Live E-commerce iOS application targeting the MENA region. Delivered a user experience akin to Taobao Live, incorporating live streaming, advanced animations, and real-time engagement features. Implemented MVVM architecture with SwiftUI and Combine, optimized streaming with AVFoundation and CoreAnimation, integrated CoreLocation for location-based services, and facilitated secure payments through Apple Pay, PayPal, and Stripe.

BodyPixel - Blood Pressure App *iOS, SwiftUI, Firebase, CoreBluetooth, Combine, SPM*

Developed a dedicated iOS application for monitoring and managing blood pressure. Provided users with an intuitive platform to track health metrics, improving personal health management and wellness. Utilized CoreBluetooth for device connectivity, employed SwiftUI for responsive UI design, managed asynchronous data streams with Combine, and integrated Firebase for data storage and analytics.

IntraNav QR App for Factory Sensor Positioning and Tracking *Swift, ARKit, RealityKit, VisionFramework, SwiftUI*

Developed an Augmented Reality application for precise sensor positioning and tracking within industrial factories. Enhanced operational efficiency by enabling accurate placement and monitoring of sensors using AR and Computer Vision. Employed ARKit and RealityKit for AR functionalities, utilized VisionFramework for QR code detection, and crafted intuitive interfaces with SwiftUI.

The Neuro Plan *Swift, SwiftUI, MVVM, SOLID, CI/CD, Fastlane, Jenkins, Analytics, RxSwift, Cocoapods, SPM*

Developed an iOS application promoting healthy lifestyle behaviors through personalized protocols. Assisted users in identifying strengths, risks, and opportunities to enhance overall well-being. Implemented MVVM architecture adhering to SOLID principles, established CI/CD pipelines using Fastlane and Jenkins, integrated analytics for user behavior insights, and managed dependencies with Cocoapods and SPM.

AnyRoad *Swift, SwiftUI, MVVM, SOLID, CI/CD, Fastlane, Jenkins*

Contributed to the development and maintenance of an existing iOS application. Improved application stability and user experience through rigorous testing and feature enhancements. Performed unit testing with XCTest, UI testing with XCUITest, debugged issues, and added new features following MVVM architecture.

Lucky And Blessed Apparel

Developed a B2B eCommerce mobile application integrating multiple payment gateways. Streamlined purchasing processes for wholesale customers, increasing sales efficiency. Integrated CS-Cart REST APIs and implemented secure payment options using PayPal, Stripe, and Apple Pay.

Southern Grace Clothing

Developed a B2B eCommerce application for the fashion retail sector. Enhanced user engagement and sales through a mobile commerce platform. Utilized CS-Cart APIs and integrated PayPal, Stripe, and NMI payment gateways for seamless transactions.

Precision Glass

Developed a cross-platform application featuring background location tracking and messaging services. Improved business processes by enabling real-time location tracking and communication. Implemented background location services and integrated Firebase Cloud Messaging for instant notifications.

Washare Global

Developed an iOS application revolutionizing laundry services. Provided a platform for users to earn or save money through convenient laundry solutions, redefining traditional laundry chores. Designed user-centric interfaces, optimized app performance, and integrated scheduling and payment functionalities.

Transcore *Swift, SwiftUI, MVVM, CoreBluetooth, SOLID, CI/CD, Fastlane, Jenkins, Analytics*

Developed an iOS application interfacing with Bluetooth Low Energy devices for toll tax collection. Enhanced toll collection efficiency and security with anti-cheat mechanisms and occupancy settings. Utilized CoreBluetooth for BLE communication, implemented SOLID design principles, and established CI/CD pipelines with Fastlane and Jenkins.

Person Re-Identification Using AlignedReID *Deep Learning, Computer Vision, PyTorch, Django, Python, React*

Led a final-year project focused on re-identifying individuals in CCTV footage based on appearance

attributes. Advanced surveillance technology and security applications through innovative use of deep learning. Implemented deep learning models using PyTorch, developed backend services with Django, and created interactive front-end interfaces with React.

EDUCATION

National University of Computer and Emerging Science

Bachelor of Science Computer Science *GPA: 3.40*

Relevant Coursework: Computer Programming, Data Structures, Computer Organization and Assembly Language, Operating System, Database Systems, Design and Analysis of Algorithm, Artificial Intelligence, Fundamentals of Computer Vision, Software Engineering, Computer Network, Information System Security, Data Science

HONORS & AWARDS

Dean's List

NUCES

Recognized for academic excellence by ranking in the top 5% of the class.

President Rover Scout

Pakistan Boy Scouts Association

Led community service projects and organized events, demonstrating leadership and teamwork skills.
