

PAUL MILLA

SENIOR FULLSTACK ENGINEER

Austin, TX, 78749 | (310) 431 9336 | paulmilla222@gmail.com

Summary

Senior Fullstack Engineer with 9+ years of experience in building scalable web applications using **MEAN**, **MERN**, and **MEVN** stacks. Expertise in **Angular**, **React**, **Vue.js**, **Node.js**, and **Express.js** for developing high-performance solutions. Skilled in **state management**, **API integration**, **cloud platforms** (AWS, GCP, Azure), and **DevOps** practices including **Docker** and **Kubernetes**. Strong background in optimizing performance, ensuring security with **OAuth 2.0** and **JWT**, and leading **Agile** teams to deliver complex projects on time.

Work Experience

Google | Senior Frontend Engineer

Apr 2024 – Feb 2025

- **MEAN & MERN Architecture Design:** Led the development of full-stack applications using **Angular** (MEAN) and **Node.js** (MERN), creating high-performance, scalable web apps for enterprise retail clients.
- **State Management & API Integration:** Implemented state management solutions with **NgRx**, **Redux Toolkit**, and **React Query**, ensuring seamless data synchronization and API integration with **RESTful** APIs and **GraphQL**.
- **Frontend Optimization:** Enhanced frontend performance by 40% using lazy loading, **tree-shaking**, and **code splitting**, reducing bundle size and improving page load speed.
- **Microservices & Full-Stack Development:** Led the migration of legacy backend systems to a **microservices architecture** using **Node.js** and **Express.js**, improving modularity and scalability. Integrated **MongoDB**, **PostgreSQL**, and **GraphQL** for efficient data handling.
- **API Integration & Security:** Integrated **JWT-based authentication** and **OAuth 2.0** for secure API access. Ensured sensitive data protection while maintaining seamless user authentication across platforms.
- **Cross-Platform Solutions:** Delivered WCAG-compliant, fully responsive designs, improving accessibility and cross-browser compatibility.
- **Testing Excellence:** Achieved 95% test coverage using **Karma**, **Protractor**, **Jest**, and **Mocha**, ensuring high code quality and reliability.
- **Micro-Frontend Architecture:** Spearheaded the transition to **micro-frontend architecture**, enabling independent deployments and enhancing scalability.
- **CI/CD Integration:** Implemented **CI/CD pipelines** using **GitLab CI/CD**, **Docker**, and **Kubernetes (AKS)**, reducing deployment time by 25% and improving workflow efficiency.
- **Collaborative Development:** Worked closely with product managers and designers using **Agile/Scrum** methodologies to deliver timely, high-quality features and improvements. Participated in daily stand-ups and sprint planning.
- **Cloud Platforms:** Deployed and optimized cloud-native solutions using **AWS**, **GCP**, and **Azure** services (AKS, Blob Storage), reducing costs and improving performance.
- **Containerization:** Containerized applications using **Docker**, improving portability and reducing deployment issues across different environments.

SkyGrid | Senior Frontend Engineer

Aug 2019 – Apr 2024

- **MERN Stack Development:** Designed and built **React**-based applications with **Node.js** and **MongoDB**, leveraging **Next.js** for server-side rendering (SSR) and static site generation (SSG) to improve SEO and page load speed.
- **UI Component Libraries:** Developed reusable UI components using **Material-UI**, **Chakra UI**, and **Tailwind CSS**, enhancing consistency and accelerating team development. Utilized **AntD** for complex forms and data-heavy UI components.

- **Real-Time Data Solutions:** Implemented real-time dashboards using **WebSockets**, **RxJS**, and **Node.js**, delivering seamless live updates in mission-critical applications.
- **Cloud-Native Applications:** Optimized frontend and backend performance on **Azure Kubernetes Service (AKS)**, reducing load times by 35% and improving system reliability. Implemented **Azure Blob Storage** for enhanced data caching and retrieval.
- **GraphQL & Apollo Client:** Integrated **GraphQL** with **Apollo Client** for optimized data fetching, reducing API overhead and enabling faster client-server communication.
- **Performance Optimization:** Reduced page load times by 35% using **Webpack**, **Lazy Loading**, and **AOT** compilation strategies. Leveraged **tree-shaking** to eliminate unused code and improve app performance.
- **Automated Testing Pipelines:** Established **Cypress** and **Jest** testing pipelines, ensuring robust unit, integration, and end-to-end testing coverage and improving release cycles.
- **CI/CD Pipeline:** Utilized **GitLab CI/CD**, **Docker**, and **Kubernetes (GKE)** to streamline the deployment of applications, improving overall developer productivity and reducing downtime.
- **Security Best Practices:** Implemented **JWT-based authentication**, **OAuth 2.0**, and **SAML** for secure access to APIs and user data.
- **Agile Development:** Actively participated in daily standups, sprint planning, and code reviews, contributing to an efficient and collaborative Agile development environment.
- **Serverless Functions:** Developed serverless applications on **AWS Lambda**, enabling cost-effective and scalable cloud solutions.

Rackspace Technology | Frontend Developer

Sep 2015 – Aug 2019

- **MEVN Stack Migration:** Led the migration of legacy applications to **Vue.js** and **Node.js**, improving user interface flexibility and enhancing developer productivity.
- **Secure Authentication & API Design:** Implemented **OAuth 2.0** authentication and built **RESTful** and **GraphQL** APIs, enabling secure access and improving data retrieval efficiency.
- **Data Visualization:** Built interactive dashboards for data visualization with **React** and **D3.js**, providing actionable insights to enterprise clients.
- **Micro-Frontend Experimentation:** Contributed to early implementations of **micro-frontend** architecture, using **Webpack** and **React** to improve team independence and scalability.
- **CI/CD Integration:** Integrated **Docker** and **GitLab CI/CD** to streamline the deployment process, reducing manual errors and enhancing application stability.
- **Testing Practices:** Delivered reliable applications by integrating automated unit testing with **Protractor** and **end-to-end workflows** with **Cypress**.
- **DevOps & Containerization:** Integrated **Kubernetes (GKE)**, **Docker**, and **AWS Lambda** for continuous deployment, containerization, and serverless computing.
- **Component Libraries & UI Frameworks:** Developed UI components using **Bootstrap**, **Material-UI**, and **Tailwind CSS**, enabling faster and more consistent development across teams.
- **Legacy System Modernization:** Modernized legacy applications built with **jQuery** and **Bootstrap**, introducing modularity and responsive design principles.
- **Project Management:** Coordinated with cross-functional teams using **Agile/Scrum** methodologies, ensuring the timely and high-quality delivery of features and updates.

Education

University of Texas at Austin, BS Computer Science

Sep 2012 – Aug 2015

Skills

Frontend Technologies:

- MEAN/MERN/MEVN Stacks: Angular, React, Vue.js, Node.js, Express.js
- UI Frameworks & Libraries: Material-UI, Chakra UI, Tailwind CSS, AntD, Bootstrap
- Frontend Development: HTML5, CSS3, SASS, LESS, TypeScript, JavaScript (ES6+), jQuery, Gatsby, Next.js, Svelte
- Performance Optimization: Lazy Loading, Tree Shaking, AOT Compilation, Code Splitting, Change Detection

- State Management: Redux, RTK, NgRx, MobX, Context API, React Query
- Real-Time Data: WebSockets, RxJS, Apollo Client (GraphQL)

Backend Technologies:

- Databases: MongoDB, PostgreSQL, MySQL
- API Development: RESTful APIs, GraphQL, WebSocket
- Authentication: OAuth 2.0, JWT, SAML
- Server-Side Frameworks: Node.js, Express.js, Hapi.js
- Cloud Platforms & DevOps: AWS (Lambda, S3, EC2), GCP, Azure (AKS, Blob Storage), Docker, Kubernetes, Azure DevOps
- CI/CD & Build Tools: GitLab CI/CD, Webpack, Babel, Parcel, Storybook
- Testing Frameworks: Jest, Cypress, Protractor, Karma, RTL

Design & Collaboration:

- UI/UX Tools: Figma, Adobe XD, Sketch
- Version Control: Git, GitHub, GitLab
- Project Management: JIRA, Agile, Scrum
