Summary

Quality Assurance Specialist with over 7 years of experience.

- Proficient in analyzing requirements, and creating and executing test strategies, test plans, test scenarios, and test cases.
- Knowledgeable in all phases of STLC, SDLC, and Agile Methodologies.
- Skilled in performing various types of testing, including Functional, Smoke, Regression, Integration, System, Nonfunctional, Load, Stress, Performance, Database, API, UI, UX, and Exploratory testing.
- Expert in Java, JavaScript/TypeScript, SenseTalk, and SQL programming languages.
- Skilled in building end-to-end automation frameworks using Selenium, Playwright, Eggplant Functional, Eggplant Digital Automation Intelligence (DAI), Cucumber-JUnit, TestNG, Rest Assured, JDBC and ODBC drivers.
- Experienced in integrating CI/CD pipelines with Jenkins and GitHub Actions.
- Competent in version control and managing code repositories with Git, GitHub, GitLab, and SourceTree.
- Well-versed in Jira for project management and bug tracking, as well as in TestRail and Zephyr Scale for test case management.

Skills

- **Testing tools:** Selenium WebDriver, Selenium Grid, Cucumber-JUnit, TestNG, Apache POI, JDBC, Maven, Rest-Assured, Postman, Playwright, Nightwatch.js, Apache JMeter, BrowserStack, Eggplant Functional, ODBC drivers, Eggplant Digital Automation Intelligence (DAI)
- **Cloud Platforms:** Salesforce, AWS
- **Languages:** Java, JavaScript, SQL, HTML, XML, Gherkin, SenseTalk
- **Databases:** Oracle, MySQL Workbench, PostgreSQL, pgAdmin, Microsoft SQL Server, Microsoft SQL Server Management Studio, DataGrip
- **Version Control:** Git, GitHub, GitLab, SourceTree
- **CI/CD:** Jenkins, GitHub Actions
- **Test case management:** Test Rail, Zephyr Scale
- **Project management:** Jira

- **IDE:** Eclipse, IntelliJ IDEA, Visual Studio Code

Experience

QA Automation Engineer

Shift4

Silver Spring, MD

09/2024 – Present

- Led development and maintenance of End-To-End Test Automation Framework for Salesforce application using Eggplant Functional, Eggplant DAI, AWS, Selenium Grid, Selenium WebDriver, and ODBC drivers.
- Used Git and GitLab for version control, code repository management, and CI/CD integration.
- Analyzed user stories, communicated with the team, and performed Manual Testing by creating and executing test scenarios and test cases.
- Stored and maintained test cases using Test Rail.
- Conducted database testing on Microsoft SQL Server and PostgreSQL using SQL, SQL Server Management Studio, and pgAdmin.

Software Development Engineer in Test

Tribute Technology

Waunakee, WI

05/2023 - 08/2024

- Developed and maintained 3 end-to-end Behavior-Driven Development (BDD) Automation Frameworks across 3 different applications, utilizing Nightwatch.js, Java, Gherkin, Maven, Selenium WebDriver, Cucumber-JUnit, Rest Assured, JDBC, and Page Object Model.
- Configured BrowserStack within the Automation Frameworks and executed cross-browser and cross-device testing.
- Used Git and GitHub for version control, code repository management, code reviews, and continuous development and maintenance of automation frameworks.
- Integrated automated tests into CI/CD pipelines with GitHub Actions and achieved continuous testing throughout the Software Development Life Cycle.
- Supported software releases by executing Regression testing and worked with developers to fix defects identified during testing.

- Participated in Agile ceremonies and discussed development progress, testing effort, defects, and strategies to improve test coverage and quality assurance.
- Tracked bugs, managed tasks, communicated with developers, and supported the development process using Jira.

Quality Assurance Analyst

Allstate Insurance

Northbrook, IL

09/2019 - 05/2023

- Conducted analysis of user requirements, communicated with cross-functional team, and developed test strategies, test plans, test scenarios, and test cases.
- Executed Manual testing, documented testing processes and outcomes, and collaborated with the development team to resolve software bugs.
- Performed various types of testing, such as Smoke, Regression, Integration, System, Load, and Stress testing.
- Developed test scripts following the Behavior-Driven Development (BDD) format, with Java, Selenium WebDriver, Cucumber-JUnit, Maven, Apache POI, and Page Object Model.
- Performed database validation using MySQL Workbench, SQL queries, and JDBC library.
- Implemented API testing with Postman and Rest Assured library.
- Built and executed Load tests using Apache JMeter.
- Scheduled jobs to run automated Smoke and Regression test suites using Jenkins CI/CD tool.
- Stored, managed, and linked test cases to user stories using Zephyr Scale.

Software Tester

Walmart

Reston, VA

11/2017 - 09/2019

- Performed requirements analysis, designed and executed test scenarios and test cases, and verified software behavior against user requirements.
- Created Data-Driven automation framework using Maven, Java, Selenium WebDriver, and TestNG, following the Page Object Model structure.
- Applied OOP concepts of Java (Encapsulation, Abstraction, Polymorphism, Inheritance) to the framework for more reusable, maintainable, and easy-to-read tests.

- Configured Jenkins CI/CD tool and automated execution of Smoke and Regression test suites.
- Led Smoke and Regression testing, analyzed results, reported defects, and collaborated with developers to resolve identified issues.
- Conducted back-end testing using SQL Developer tool and Java JDBC library.
- Integrated Postman and Rest Assured library for RESTful API testing.
