About

Senior Full Stack Developer with 10 years of professional experience in development field Specialized in Java, React, Angular, and C# & Python Frameworks.

Senior software developer with a passion for solving complex problems and developing innovative solutions using cutting-edge technologies and also have a proven track record of delivering high-quality software products on time and on budget.

Proficient in multiple programming languages, including Java, JavaScript and C++ and experienced in full-stack development, from front-end design to back-end implementation with React, Vue.js, Angular, Spring Boot, Django and Microservices.

A team player who collaborates effectively with cross-functional teams, including product managers, designers, and QA engineers, to deliver exceptional software products that exceed customer expectations.

Skills

- **Backend / MVC / Microservices**

Experience

SENIOR FULLSTACK DEVELOPER

•Codagami –McDonald's• Sep 2023 – Present

- Designed and implemented a suite of microservices in Java with Spring Boot, coupled with developing dynamic, responsive front-end interfaces using Angular, enhancing the modularity and user experience of McDonald's digital ordering systems.
- Led the development and integration of RESTful APIs, facilitating seamless interactions between McDonald's backend services and Angular-based frontend applications, significantly enhancing operational efficiency and customer interaction across digital and drive-thru platforms.
- Implemented WebSocket in Angular for real-time user notifications and status updates, enhancing customer experience during peak hours.
- Standardized development and production environments using Docker, facilitating consistent setups and reducing deployment conflicts.
- Conducted comprehensive performance testing across both Java backend services and Angular frontend applications, using tools like JMeter for backend and Lighthouse for frontend, ensuring optimal performance and quick load times.
- Led the transition of legacy systems to modern Java platforms with corresponding Angular frontends, utilizing Spring Cloud for backend orchestration and Angular's modular architecture for frontend scalability, reducing overall system maintenance.
- Actively maintained technical documentation for all software modules and API endpoints using Confluence, enhancing team knowledge and onboarding processes. Provided mentorship and code reviews for junior developers, raising team competencies and fostering a culture of continuous improvement.

SENIOR FULLSTACK DEVELOPER

•Coherent Solutions • MAY 2021 – Sep 2023

•Senior Full Stack Developer • JAN 2022 – Sep 2023

- Developed high-performance APIs using Java Spring Boot, ensuring efficient data transfer and real-time communication between the front-

Java | Spring Boot | Spring MVC
Spring Security | Spring Data JPA
Hibernate
Node | Express.js | Nest.js
Python Django | C# .NET

- **Frontend**

Typescript | JavaScript | ES6+
React.js | Redux | React Hook
| Next.js | React-Native | Remix
Angular2+
Vue.js | Nuxt | VueX
Vanilla
HTML | HTML 5
CSS | Saas | Less

- **Responsive Frameworks**

Bootstrap | Tailwind CSS | Material
UI | Kendo UI

- **API Integration**

RESTful API | GraphQL | SOAP

- **Database**

SQL

MySQL | SQL Server | T-SQL | Oracle
| PostgreSQL | MariaDB

Cloud

Cosmos DB | DynamoDB

NoSQL

Redis | MongoDB | Apache
Cassandra | Lite DB | CouchDB

- **JS/TS Tools**

Babel | Webpack | ESbuild

- **Container Technology**

Docker | Kubernetes

- **Cloud Services**

AWS | GCP | AZURE

- **Testing Frameworks**

JUnit | JEST | Mockito

- **Version Control**

GitHub | GitLab | Bitbucket

- **Agile / Scrum Environment / CI CD Pipeline**

Jenkins | Jira | Trello | Asana | Rally

- **Additional Skills**

RabbitMQ, Apache Kafka
Greenfield Project Development

end and back-end components of a sophisticated trading platform.

- Designed a modular front-end architecture using React, enhancing component reusability and maintainability, while ensuring a consistent and intuitive user experience across various segments of the platform.
- Implemented custom authentication and authorization mechanisms in Java Spring Security, utilizing JWT for secure token management and robust API access control.

- Optimized database interactions and performance in PostgreSQL by implementing advanced indexing strategies, which significantly reduced query execution times and enhanced system responsiveness for end users.

•Senior Full Stack Developer • MAY 2021 – JAN 2022

- Integrated Angular Material design principles to create a seamless and intuitive shopping experience, contributing to an impressive reduction in cart abandonment rates and a notable increase in successful checkouts.

- Designed and implemented a personalized product recommendation engine using RxJS and NgRx, resulting in an outstanding increase in cross-selling and a substantial rise in average order value.

- Contributed to the development of a customer reviews and ratings feature using Angular Reactive Forms, leading to a substantial increase in user-generated content and enhancing product credibility.

SENIOR FULL STACK DEVELOPER

•Vital Design• JUL 2020 – MAY 2021

- Involved in the development and maintenance of numerous web and mobile applications utilizing TypeScript, React, React Native and AWS (EC2, S3, RDS).

- Refactored and optimized legacy codebase for improved performance, enforcing adherence to industry-standard best practices.

- Leveraged Storybook to streamline development by managing and building reusable components across multiple projects as NPM packages.

- Implemented HoCs, functional components and code splitting to enhance code readability and maintainability, resulting in reduced bundle sizes and increased efficiency.

- Developed comprehensive unit tests with Jest for React components and implemented automated testing with Cypress to increase test coverage.

SENIOR FULL STACK DEVELOPER

•Capital Technology Group• JAN 2018 – JUL 2020

- Designed and implemented a secure Electronic Health Record (EHR) application using Java Spring MVC and Hibernate, ensuring compliance with HIPAA regulations and enhancing data security for sensitive patient information.

- Integrated third-party healthcare APIs (FHIR, HL7) into a Java-based application, enabling seamless data exchange between clinical systems and improving interoperability across healthcare platforms.

- Developed a secure online patient portal using Java Spring MVC and Spring Security, providing patients with easy access to medical records,

Education

Michigan State University

Bachelor's Degree in Computer Science, 2010 - 2014

prescriptions, and appointment scheduling.

- Optimized healthcare system databases using Hibernate with PostgreSQL, improving data retrieval times and system stability for a high-traffic hospital application.
- Provided technical expertise in React and React Native for developing new product features and enhancing existing functionalities, utilizing advanced JavaScript (ES6) techniques.
- Automated billing and insurance claims processing workflows using Java, enhancing the efficiency of claim submissions and accelerating reimbursement times.
- Extensively utilized AWS services including EC2, DynamoDB, and S3 to support scalable and reliable cloud-based solutions.
- Employed JIRA to manage projects following the Agile development model with Scrum methodology, ensuring timely delivery and continuous integration.

FULL STACK DEVELOPER

•Clari • MAY 2016 – DEC 2017

Created three primary projects, including:

- Developed a portfolio website utilizing Java, Spring MVC, HTML5, CSS3, Bootstrap, JavaScript, and Angular, showcasing professional projects and technical skills.
- A Financial Portal implemented in three phases.
- Implemented the initial phase as a Spring MVC web application.
- Developed a RESTful web service in the second phase, utilizing Spring Boot with Swagger integration for API documentation and testing.
- Created a cross-platform mobile application using React Native in the final phase, enhancing user accessibility and engagement.
- Fully designed and developed a multifunctional issue tracker web application using Spring Boot, integrating security and role-based access control. Employed JPA/Hibernate for ORM, alongside Angular for the front end, based on a code-first relational database approach in PostgreSQL.
- Contributed to the development and maintenance of web and mobile applications using React and React Native, focusing on responsive design and seamless user experience.

JUNIOR FULL STACK DEVELOPER

•Devbridge • JUL 2014 – MAY 2016

- Developed a Java-based application enabling superintendents to oversee team assignments and members to monitor progress and submit timecards, improving operational efficiency and team coordination.
- Constructed a backend system using Java with Spring to facilitate seamless integration of various third-party services with an Enterprise Resource Planning (ERP) system via RESTful APIs.
- Collaborated effectively with client and development teams from concept to deployment, ensuring project success.
- Implemented a responsive front-end for the application using React, leveraging a Bootstrap theme to enhance user interaction and aesthetics.
